## 1. Introduction

The ERP HR Modules shall provide a comprehensive, integrated, and automated platform for managing the entire employee lifecycle within the organization. The system shall encompass seventeen integrated modules that collectively address the full spectrum of human resource management, from strategic workforce planning through to employee separation and off-boarding. These modules shall operate under a unified governance framework, ensuring consistency, transparency, traceability, and full compliance with bank policies and Ethiopian Labor Law.

The system shall be built on a foundation of integration, with the Employee Master Data Module serving as the central repository and single source of truth for all employee information. Every module shall interact seamlessly with this core repository, ensuring that all HR processes are informed by accurate, up-to-date, and consistent data. This integration shall eliminate data silos, reduce manual interventions, and provide real-time visibility into workforce operations across the organization.

The ERP HR Modules shall address the full spectrum of HR functions, including workforce planning, recruitment and selection, competency-based assessment, employee master data management, attendance tracking, leave and time-off management, separation and off-boarding, payroll processing, discipline management, employee self-service, career pathing, insurance notification, revolving staff salary advances, competency management, survey and anonymous feedback, onboarding and induction, HR portal and communications, and HR data analytics. Each module shall be designed with a clear purpose, defined business rules, comprehensive functional requirements, and seamless integration capabilities.

The system shall be accessible to all employees, managers, and HR administrators through a user-friendly interface that includes both the ERP dashboard and the Employee Self-Service portal. External candidates shall also have access to view vacancy postings and submit applications through the HR Portal, ensuring a seamless candidate experience from application to onboarding.

The implementation of this system shall transform HR operations from manual, paper-based, and fragmented processes to an integrated, automated, and data-driven function that supports the Bank's strategic objectives. It shall provide the foundation for a modern, efficient, and compliant HR function that delivers value to employees, managers, and the organization as a whole.

## **2. Purpose**

The purpose of the ERP HR Modules shall be to provide a unified, integrated platform that automates and streamlines all HR processes from workforce planning through to employee separation. The system shall ensure accurate and consistent data across all modules through a single source of truth, enforce business rules and compliance requirements automatically, provide real-time visibility and reporting capabilities, and significantly improve employee experience through comprehensive self-service capabilities.

The system shall eliminate the current dependency on manual spreadsheets, paper-based workflows, and fragmented processes that create inefficiencies, increase error rates, and limit visibility into workforce operations. By automating end-to-end HR processes, the system shall reduce processing times, enhance data accuracy, and free HR professionals to focus on strategic activities rather than administrative tasks.

The ERP HR Modules shall support evidence-based decision-making at all levels of the organization through comprehensive data consolidation and analytics capabilities. HR administrators shall have access to real-time data and configurable reports that provide insights into workforce trends, operational performance, and compliance status. Managers shall have visibility into their teams' attendance, leave, performance, and development data to support effective people management. Employees shall have transparent access to their personal information, leave balances, career progression opportunities, and HR services through self-service portals.

The system shall strengthen organizational governance and compliance through automated enforcement of business rules, policy adherence, and comprehensive audit trails. Every transaction shall be recorded with timestamp, user identification, and change details, creating an

immutable record that supports internal and external audits. The system shall ensure that all HR activities comply with applicable labor laws, tax regulations, and organizational policies.

Furthermore, the system shall support the Bank's strategic human capital objectives by enabling effective workforce planning, talent acquisition, competency development, career progression, and succession management. The integration of competency management, career pathing, performance management, and learning and development shall create a cohesive ecosystem for talent development and retention. The HR Data Analytics module shall provide the insights needed to identify workforce trends, anticipate challenges, and make proactive decisions that support the Bank's long-term strategic goals.

### 3. Scope

The ERP HR Modules shall cover the entire employee lifecycle including the following integrated modules:

| Module                                             | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Workforce Planning Module</b>                   | Automates the annual workforce planning and approval process, enabling work units to prepare, submit, review, approve, and monitor workforce requests through a controlled electronic workflow. Integrates workforce establishment, organizational structure, position management, job catalogue, cost estimation, and recruitment planning to ensure allocation decisions align with business requirements and approved budgets.                                                   |
| <b>Recruitment and Selection Management System</b> | Provides a structured, automated, and transparent approach to managing all recruitment activities. Supports both internal (promotion/transfer) and external hiring within a unified framework, including vacancy management, eligibility screening, candidate assessment, scoring and ranking, offer generation, and probation management. Integrates with Workforce Planning for automated vacancy creation and with Assessment Management for comprehensive candidate evaluation. |
| <b>Assessment Management System</b>                | Provides a comprehensive, integrated platform for managing all candidate assessment activities within the recruitment lifecycle. Encompasses two                                                                                                                                                                                                                                                                                                                                    |

|                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                      | core sub-modules: The Exam System (Written Assessment) and the Competency-Based Interview System (CBIS). Supports the full assessment lifecycle including question bank management, exam creation and delivery, proctoring, scoring, interview scheduling, competency-based evaluation, and result integration with the Recruitment Module.                                                                                                    |
| <b>Employee Master Data</b>                          | Serves as the central repository for all employee information within the organization. Maintains a comprehensive digital dossier for each employee, including personal data, job history, documentation management, organizational structure synchronization, and real-time propagation of changes to all dependent modules. Enforces data completeness through gatekeeping controls and maintains immutable audit trails of all data changes. |
| <b>Attendance Management System</b>                  | Provides a centralized platform for recording, validating, monitoring, and managing employee attendance across all work locations, work schedules, and job categories. Supports configurable work calendars, multiple attendance scenarios, attendance validation, supervisor interventions, force checkout management, and seamless integration with Leave, Discipline, Payroll, and Employee Master Data.                                    |
| <b>Time-Off and Leave Management System</b>          | Provides a comprehensive, automated, and user-friendly platform for managing all employee leave-related activities. Supports the full leave lifecycle including leave type configuration, accrual calculations, request submission, approval workflows, balance tracking, expiration management, early return processing, and payroll integration for absence-related adjustments.                                                             |
| <b>Separation and Off-boarding Management System</b> | Provides end-to-end automation for all employee separation types including voluntary resignation, age-related retirement, medical retirement, probation termination, and employer-initiated termination. Encompasses digital clearance workflows, exit interview management, final settlement calculations, certificate of release generation, and system access                                                                               |

|                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                              | revocation. Ensures compliance with notice periods, bank policy, and Ethiopian Labor Law.                                                                                                                                                                                                                                                                                                                                                  |
| <b>Payroll Processing and Compensation Management System</b> | Ensures accurate, transparent, consistent, and compliant payroll processing across all employee lifecycle events. Handles complex scenarios including mid-month changes, location-based benefits, role changes, acting assignments, disciplinary deductions, retroactive adjustments, and statutory deductions. Enforces automated proration logic, effective date-driven processing, and comprehensive audit trails.                      |
| <b>Discipline Management System</b>                          | Provides a controlled, transparent, and auditable system to manage employee misconduct. Enforces disciplinary actions in compliance with the bank's HR policies, regulatory requirements, and collective agreements. Supports offense classification, investigation management, disciplinary committee processes, decision enforcement, suspension management, appeal handling, and automatic payroll integration for financial penalties. |
| <b>Employee Self-Service (ESS) - Request Management</b>      | Provides a user-friendly, self-service interface for employees to submit, track, and manage various requests. Includes request submission with real-time confirmation, request tracking dashboard, mandatory field validation, save as draft functionality, status visibility, and multi-channel notifications. Supports Guarantee Letter requests, personal data updates, and other employee-initiated transactions.                      |
| <b>Career Pathing and Development</b>                        | Provides employees with a transparent, self-service tool to explore potential career paths within the organization. Enables employees to visualize job progressions, understand competency requirements for future roles, perform competency gap analysis, and align personal development goals with organizational needs. Integrates with Performance Management (PMS), Competency Management, and Learning Management Systems.           |
| <b>Insurance Notification</b>                                | Provides a standardized and paperless process for employees to report insurance incidents through the Employee Self-Service (ESS) portal.                                                                                                                                                                                                                                                                                                  |

|                                                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                        | Ensures timely notification within 30 working days, accurate data capture, efficient review by POMD, and compliance with the Bank's insurance policy.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>RESL Module -<br/>Revolving Staff<br/>Salary Advance<br/>(RSSA)</b> | Automates the end-to-end management of Revolving Staff Salary Advance requests, approvals, guarantor management, monitoring, reporting, and compliance in accordance with the Bank's policies and procedures. Eliminates manual request processing, improves operational efficiency, strengthens internal controls, and maintains a complete audit trail of all RSSA transactions.                                                                                                                                                                                                                                                                                                |
| <b>Competency<br/>Management System</b>                                | Provides a comprehensive, integrated platform for defining, assessing, managing, and developing employee competencies across the organization. Operationalizes the Bank's Integrated Competency Framework comprising 469 competencies organized across three pillars: Core Competencies (5), Leadership Competencies (6), and Technical Competencies (458). Supports the full competency lifecycle including framework administration, baseline assessment, gap analysis, Individual Development Plan (IDP) management, and integration with recruitment, performance management, career planning, and succession management.                                                     |
| <b>Application Tracking<br/>System (ATS)</b>                           | Serves as the external-facing gateway for all recruitment activities, providing a seamless, user-friendly platform for external candidates to discover, apply for, and track their applications for job vacancies. Enables candidate registration and profile management, automatic vacancy publication from the Recruitment Module, intelligent candidate screening and shortlisting, application tracking with status updates, and comprehensive communication management. Supports bulk communications and administrator content management for recruitment-related news and posts. Fully integrated with the Recruitment Module, Assessment Management System, and HR Portal. |

|                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Survey and Anonymous Feedback</b>              | Provides a centralized digital platform for collecting, managing, and analyzing employee feedback, opinions, and assessments. Supports various survey types including Employee Satisfaction Surveys, Employee Engagement Surveys, Employee Experience Surveys, and ERP System Satisfaction Surveys. Provides employees with a secure and confidential digital channel to share feedback, suggestions, concerns, complaints, compliments, and improvement ideas without revealing their identity.                                                                                              |
| <b>Onboarding and Induction Management System</b> | Provides a centralized, automated, and auditable framework for integrating newly hired employees into Bunna Bank. Bridges candidate transition from talent acquisition to full operational deployment. Orchestrates workflows between POMD, PPDD, Work Unit Supervisors, assigned Onboarding Buddies, and the employee to ensure compliance, rapid job readiness, and seamless integration across all head office and district locations.                                                                                                                                                     |
| <b>HR Portal and Communications Management</b>    | Serves as the centralized digital gateway and user interface for all HR-related information, services, and communications within the ERP HR ecosystem. Provides employees, managers, and external candidates with a single, unified access point to view vacancies, HR news and announcements, policies, forms, and quick links to essential HR services. Fully configurable with HR administration capabilities for efficient content management, vacancy publication, news dissemination, and employee engagement.                                                                          |
| <b>Enterprise HR Dashboard</b>                    | Provides a centralized, real-time visualization platform for monitoring key HR performance indicators and metrics across the entire organization. Consolidates data from all HR modules to provide HR administrators, managers, and senior leadership with a comprehensive, at-a-glance view of workforce health, operational performance, and strategic HR metrics. Features configurable KPI management, interactive visualizations, drill-down capabilities, trend analysis, and automated threshold alerts. Supports role-based access control and personalized dashboard configurations. |

|                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>HR Data Analytics and Business Intelligence Module</b> | Provides a comprehensive, integrated platform for collecting, consolidating, analyzing, and reporting HR data across the entire employee lifecycle. Transforms raw HR transactional data from all ERP HR modules into meaningful insights, actionable intelligence, and decision-support information. Enables evidence-based workforce management, strategic HR decision-making, workforce planning, and organizational performance improvement. Consolidates data from all HR modules into a single, unified analytics platform. |

| <b>CEO</b>                  | Workforce plan approval and strategic decisions.                        |

## 6. Business Rules

The ERP HR Modules shall operate under the following overarching business rules:

- **Single Source of Truth:** All employee data shall originate exclusively from approved HR actions in Employee Master Data.
- **Effective Date Driven:** All changes (hire, transfer, promotion, demotion) shall be applied strictly based on Approved Effective Date.
- **Audit Trail:** Every change to system data shall be recorded with Timestamp, User ID, Previous Value, and New Value.
- **Role-Based Access:** System access shall be restricted based on defined roles and responsibilities.
- **Segregation of Duties:** No user shall initiate, approve, and review the same transaction.
- **Regulatory Compliance:** All calculations shall comply with applicable tax laws, pension regulations, and Ethiopian Labor Law.
- **Integration Requirement:** All modules shall integrate seamlessly with Employee Master Data as the central repository.
- **Immutability:** Audit logs shall be non-editable and retained per compliance policy.

## 7. Module 1: Workforce Planning Module

### 7.1 Introduction

The Workforce Planning Module is an ERP/HCM-based solution designed to automate and standardize the Bank's annual workforce planning process. The module enables work units to prepare, submit, review, approve, and monitor workforce requests through a controlled electronic workflow.

The system integrates workforce establishment, organizational structure, position management, job catalogue, payroll, recruitment, and reporting functions to ensure allocation decisions are aligned with business requirements, strategic objectives, and approved budgets. It provides accurate workforce data, cost analysis, approval governance, and audit capability to support effective workforce management.

## **7.2 Objectives**

The objectives of the Workforce Planning Module are to:

- Automate the annual workforce planning and approval process.
- Ensure workforce requests are aligned with business needs and strategic priorities.
- Maintain accurate workforce establishment and position records.
- Support workforce cost estimation and budget control.
- Strengthen approval governance, transparency, and accountability.
- Enable data-driven workforce decisions through reports and dashboards.
- Support recruitment planning based on approved workforce requirements.
- Ensure data integrity, security, and audit trail management.

## **7.3 Business Rules**

- Workforce planning shall be conducted once per budget year unless an exceptional workforce request is approved.
- Every request must have a valid business justification.
- Recruitment shall not commence until the workforce request has been approved.
- Users shall only submit requests for their own work unit.
- Existing Establishment shall be system-generated and cannot be edited by end users.
- Total Proposed Establishment shall be system-calculated and read-only.

- Only workforce Administrators may modify approved workforce establishment records.
- All approvals shall be recorded with user ID, date, time, and comments.
- The system shall maintain complete historical records for all workforce plans.

#### 7.4 Functional Requirements

| FR ID                         | Requirement                       | Description                                                                                                                                                                                                                                                  |
|-------------------------------|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Data Management</b>        |                                   |                                                                                                                                                                                                                                                              |
| FR-WPD-001                    | Data Creation                     | The system shall allow Workforce Planning & Organizational Development (WF&OD) Officers to create and maintain master data, including Workforce Establishment data , Job titles, Job grades, Job qualifications, work units name , reporting work units name |
| FR-WPD-002                    | Data Update                       | The system shall allow WF&OD Officers to edit and update existing master data records while maintaining data integrity.                                                                                                                                      |
| FR-WPD-003                    | Data Deactivation                 | The system shall allow WF&OD Officers to deactivate obsolete job titles, grades, qualifications, and other master data without deleting historical records.                                                                                                  |
| FR-WPD-004                    | Import and export Data            | The system shall allow WF&OD Officers to Import and Export data in bulk using approved file formats such as Excel                                                                                                                                            |
| FR-WPD-005                    | Notification                      | The system shall notify authorized users when master data changes require review or approval, where applicable                                                                                                                                               |
| FR-WPD-006                    | Role-Based Access Control         | The system shall restrict the creation, modification, deletion, and approval of master data based on user roles and permissions.                                                                                                                             |
| FR-WPD-007                    | Version control                   | The system shall maintain version history of master data records and allow authorized users to review previous versions.                                                                                                                                     |
| FR-WPD-008                    | Duplication control               | The system shall prevent duplicate data entry                                                                                                                                                                                                                |
| <b>Budget Year Management</b> |                                   |                                                                                                                                                                                                                                                              |
| FR-WP-001                     | Workforce Planning Cycle Creation | The system shall allow WF&OD to create a new workforce planning cycle for each budget year.                                                                                                                                                                  |
| FR-WP-002                     | Workforce                         | The system shall automatically copy the approved                                                                                                                                                                                                             |

|                                   |                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------------------|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                   | Establishment Baseline Copy         | workforce establishment from the previous budget year as the baseline.                                                                                                                                                                                                                                                                                                                                                                                                                      |
| FR-WP-003                         | Workforce Plan History Management   | The system shall allow users to view current and historical workforce plans.                                                                                                                                                                                                                                                                                                                                                                                                                |
| FR-WP-004                         | Duplicate Workforce Plan Prevention | The system shall prevent duplicate workforce plans for the same budget year and work unit.                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Workforce Planning Request</b> |                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| FR-WP-005                         | Workforce Planning Request Creation | The system shall allow authorized users to create a workforce planning request.                                                                                                                                                                                                                                                                                                                                                                                                             |
| FR-WP-006                         | Request Number Generation           | The system shall automatically generate a Request Number.                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| FR-WP-007                         | Budget Year Auto-population         | The system shall automatically populate Budget Year.                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| FR-WP-008                         | Work Unit Auto-population           | The system shall automatically populate Requesting Work Unit.                                                                                                                                                                                                                                                                                                                                                                                                                               |
| FR-WP-009                         | Reporting Work Unit Auto-population | The system shall automatically populate the corresponding reporting work unit.                                                                                                                                                                                                                                                                                                                                                                                                              |
| FR-WP-010                         | Multiple Job Request Management     | The system shall allow multiple job requests within a single workforce planning submission.                                                                                                                                                                                                                                                                                                                                                                                                 |
| FR-WP-011                         | Request Type                        | The system shall support the following request types: New Position, Additional Position, The system shall require users to select one request type for each requested position.                                                                                                                                                                                                                                                                                                             |
| FR-WP-012                         | Business Justification              | The system shall require users to provide a business justification before submission. Available justification categories shall include Business Growth, New Branch Expansion, Regulatory Requirement, Digital Transformation, Increased Workload, Business Process Reengineering, Operational Risk, Compliance Requirement, Customer Service Improvement, New Product, Organizational Restructuring, Other (Specify). The system shall require additional remarks when "Other" is selected. |

| Position Information |                                          |                                                                                                                                                                                                                                                                                     |
|----------------------|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-WP-013            | Job Title Selection                      | The system shall allow users to select a <b>Job Title</b> from a predefined dropdown list. If the required job title is not available, the user shall be able to select <b>"Other"</b> , upon which the system shall enable a free-text field for entering the new job title.       |
| FR-WP-014            | Job Grade Auto-population                | The system shall automatically populate the Job Grade based on the selected Job Title. If the selected job title is a new position that has not yet been assigned a job grade, the system shall allow the user to select the appropriate Job Grade from a predefined dropdown list. |
| FR-WP-015            | Existing Workforce Display               | The system shall display the Existing Workforce Establishment for the selected Job Title.                                                                                                                                                                                           |
| FR-WP-016            | Additional Workforce Request Entry       | The system shall allow users to enter the Additional Workforce Request.                                                                                                                                                                                                             |
| FR-WP-017            | Total Proposed Establishment Calculation | <p>The system shall automatically calculate the Total Proposed Establishment (Existing Establishment + Additional Request).</p> <ul style="list-style-type: none"> <li>For the newly entered job tile establishment will be zero</li> </ul>                                         |
| FR-WP-018            | Additional Request Validation            | The system shall validate that Additional Requests are positive integers.                                                                                                                                                                                                           |
| FR-WP-019            | Total number of additional requests      | The system shall calculate the total number of additional requests by work units , by reporting work units and bank level                                                                                                                                                           |
| Cost Estimation      |                                          |                                                                                                                                                                                                                                                                                     |
| FR-WP-020            | Annual Salary Calculation                | The system shall calculate the estimated annual salary automatically based on Job Grade.                                                                                                                                                                                            |
| FR-WP-021            | Pension Contribution Calculation         | The system shall calculate employer pension contribution.(based on payroll principle )                                                                                                                                                                                              |
| FR-WP-022            | Allowance and Benefit Calculation        | The system shall calculate allowances and benefits where applicable.(based on payroll principle )                                                                                                                                                                                   |
| FR-WP-023            | Annual Personnel Cost Calculation        | The system shall calculate the total annual personnel cost.                                                                                                                                                                                                                         |
| FR-WP-024            | Personnel Cost Override                  | Users with appropriate privileges may override the estimated cost with justification.                                                                                                                                                                                               |

|                             |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Recruitment Planning</b> |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| FR-WP-025                   | Recruitment Quarter Selection   | The system shall allow users to select the planned recruitment quarter for each workforce request. The available quarters shall be Q1, Q2, Q3, and Q4. Upon selecting a quarter, the system shall display and allow the user to select the corresponding recruitment month(s) as follows: <b>Q1:</b> July, August, September; <b>Q2:</b> October, November, December; <b>Q3:</b> January, February, March; <b>Q4:</b> April, May, June. |
| FR-WP-026                   | Recruitment Schedule Generation | The system shall generate a recruitment schedule based on approved requests.                                                                                                                                                                                                                                                                                                                                                            |
| FR-WP-027                   | Workflow Status Update          | The system shall automatically update the status after each workflow action.                                                                                                                                                                                                                                                                                                                                                            |
| <b>Review and Comments</b>  |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>FR-WP-028</b>            | Reviewer Assignment             | The system shall automatically assign the appropriate reviewer based on the reporting work unit and route the request for review. Reviewers for each work units are Reporting work units                                                                                                                                                                                                                                                |
| FR-WP-029                   | Review Comment Management       | The system shall allow reviewers to enter review status by selecting from the drop down list (Accepted or Modified or Rejected) with comments. <ul style="list-style-type: none"> <li>Modification shall allow only additional requests</li> </ul>                                                                                                                                                                                      |
| FR-WP-030                   | Additional Information Request  | The system shall allow work units to view the status of the reviewed data                                                                                                                                                                                                                                                                                                                                                               |
| FR-WP-031                   | Review Audit Trail              | All review comments shall be permanently stored as part of the audit trail.                                                                                                                                                                                                                                                                                                                                                             |
| <b>Validators Workflow</b>  |                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| <b>FR-WP-032</b>            | Validator Assignment            | The system shall automatically assign the appropriate validators and route the request for validation. Validators are budget hearing committee (Chief People and Culture Office, People Operations Management Directorate and Strategic Planning & Performance Management Directorate)                                                                                                                                                  |
| FR-WP-033                   | Validator Comment Management    | The system shall allow validators to review workforce planning requests and record the validation outcome by selecting a status from a predefined dropdown list                                                                                                                                                                                                                                                                         |

|                          |                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| FR-WP-059                     | Work unit Workforce Request Report                | The system shall generate Workforce Requests by work unit .                                                       |
| FR-WP-060                     | Job Title Workforce Request Report                | The system shall generate Workforce Requests by Job Title.                                                        |
| FR-WP-061                     | Job Grade Workforce Request Report                | The system shall generate Workforce Requests by Job Grade.                                                        |
| FR-WP-062                     | Additional Workforce Request Report               | The system shall generate the Additional Workforce Request report.                                                |
| FR-WP-063                     | Approved Workforce Establishment Report           | The system shall generate the Approved Workforce Establishment report.                                            |
| FR-WP-064                     | Position Establishment Report                     | The system shall generate the Position Establishment report.                                                      |
| FR-WP-065                     | Recruitment Plan by Quarter Report(time to fill ) | The system shall generate the Recruitment Plan by Quarter report.                                                 |

|                   |                                            |                                                                   |
|-------------------|--------------------------------------------|-------------------------------------------------------------------|
| FR-WP-066         | Budget Impact Analysis Report              | The system shall generate the Budget Impact Analysis report.      |
| FR-WP-067         | Workforce Cost Report                      | The system shall generate the Workforce Cost report.              |
| FR-WP-068         | Approval Status Report                     | The system shall generate the Approval Status report.             |
| FR-WP-069         | Rejected Workforce Request Report          | The system shall generate the Rejected Workforce Requests report. |
| FR-WP-070         | Historical Workforce Planning Trend Report | The system shall generate Historical Workforce Planning Trends.   |
| <b>Dashboards</b> |                                            |                                                                   |
| FR-WP-071         | Workforce Planning Dashboard               | The system shall provide workforce planning dashboard indicators. |
| FR-WP-072         | Approved Establishment Indicator           | Dashboard shall display Total Approved Establishment.             |
| FR-WP-073         | Current Employee Indicator                 | Dashboard shall display Current Employees.                        |
| FR-WP-074         | Additional Position Request Indicator      | Dashboard shall display Additional Positions Requested.           |
| FR-WP-075         | Approved Additional Position Indicator     | Dashboard shall display Additional Positions Approved.            |
| FR-WP-076         | Estimated Personnel Cost Indicator         | Dashboard shall display Estimated Personnel Cost.                 |
| FR-WP-077         | Workforce Growth Indicator                 | Dashboard shall display Workforce Growth (%).                     |
| FR-WP-078         | Approval Progress Indicator                | Dashboard shall display Approval Progress.                        |
| FR-WP-078         | Request Status Indicator                   | Dashboard shall display Requests by Status.                       |
| FR-WP-080         | Reporting work unit Request Indicator      | Dashboard shall display Requests by reporting work unit.          |
| FR-WP-081         | Job Grade Request                          | Dashboard shall display Requests by Job Grade.                    |

|                           | Indicator                           |                                                                                          |
|---------------------------|-------------------------------------|------------------------------------------------------------------------------------------|
| FR-WP-082                 | Recruitment Quarter Indicator       | Dashboard shall display Recruitment by Quarter.                                          |
| <b>Audit and Security</b> |                                     |                                                                                          |
| FR-WP-083                 | Workforce Planning Audit Trail      | The system shall maintain a complete audit trail of all transactions.                    |
| FR-WP-084                 | Transaction Activity Logging        | The system shall record the creator, reviewer, approver, date, time, and action taken.   |
| FR-WP-085                 | Approved Record Protection          | The system shall prevent unauthorized modification of approved records.                  |
| FR-WP-086                 | Role-Based Access Control           | The system shall enforce Role-Based Access Control (RBAC).                               |
| FR-WP-087                 | Workforce Planning Record Archiving | The system shall archive workforce planning records for future reference and compliance. |

## 8. Module 2: Recruitment and Selection Management System

### 8.1 Introduction

The Recruitment and Selection Management System shall provide a structured, automated, and transparent approach to managing all recruitment activities. The system shall support both internal(promotion/transfer)and external hiring within a unified framework, ensuring consistency, fairness, and compliance throughout the recruitment lifecycle.

### 8.2 Purpose

The purpose of the Recruitment and Selection Management System shall be to enable efficient, transparent, and compliant hiring processes. It shall enforce standardized evaluation, scoring, and ranking methodologies, ensure alignment with workforce plans, and maintain a centralized candidate pool for future use.

### 8.3 Business Rules

The Recruitment Module shall operate under the following business rules:

- **Unified Process:** The system shall support a unified recruitment workflow for both Internal and External hiring.
- **Automated Validation:** All recruitment requests must be validated against the approved workforce plan (Position ID and Headcount).
- **Sourcing Control:** HR shall designate vacancies as Internal Only, External Only, or Both.
- **Internal Eligibility Rules:**
  - PMS Score: Read-Only from PMS system.
  - Discipline Status: Active penalties = Ineligible.
  - Promotion History: Promotion within 12 months = Ineligible.
  - Transfer History: Transfer within 12 Months in current position and Branch (for transfer Vacancy purpose)
  - Experience: Non-Bank experience weighted at 50%, Non Clerical staff experience must be deducted for clerical position
- **Assessment Rules:** Minimum score of 50% required in any individual assessment component. (it must be flexible when our procedure change the assessment rules must be changed to current rules)
- **Scoring and Ranking:**
  - **Internal:**  $(PMS \times PMS\%) + (Exam \times Exam\%) + (Interview \times Interview\%)$
  - **External:**  $(Exam \times Exam\%) + (Interview \times Interview\%)$
  - **Transfer:** (Application Date (20%), Total Experience (20%), Service in Current Location (20%), PMS Score (30%), Recommendation (10%).

**Note:** All Scoring and Ranking must be flexible when our procedure changes the assessment rating rules and must be changed to current rules

  - **Tie-Breaking:** Female candidates ranked higher; if same, higher PMS score.
- **Offer Cascade:** If offer is declined or response window expires, next ranked candidate shall be offered.
- **Probation:** 60 days for Non-Managerial, 75 days for Managerial.
- **Talent Roster:** Reserve status expires after 6 months.

## 8.4 Functional Requirements

### General Process Governance

| FR ID      | Requirement                                           | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-001 | Strategic Workforce Planning Integration              | <ul style="list-style-type: none"> <li>The recruitment process starts from the Workforce Planning Module. The system shall pull the approved annual staffing budget and feed it directly into the Recruitment Module. It shall list and display each District and Work Unit's approved manpower, broken down into Quarterly and Monthly vacancy reports to trigger recruitment automatically.</li> <li>When workforce planning report feed in Recruitment Module the system must include hire/post status.</li> <li>After clicking hire/post status the system automatically displays eligible criteria for the position and qualified employees as per the screening criteria.</li> </ul>                                                                                                                                                                                                  |
| FR-REC-002 | Dynamic Replacement & Requisition Validation Workflow | <ul style="list-style-type: none"> <li>The system shall support flexible vacancy requisitions initiated by Work Units or Districts due to replacements, promotions, or transfers. Upon request, the system shall cross check the real time Vacant Post Data: if the post is confirmed vacant, the system shall approve and allow the vacancy request to proceed to the POMD. If the target position is not vacant, the system shall automatically reject the request and display the message to the requestor as: <i>"There is no vacant post available within your work unit. Please contact HR if you have any justification of the request."</i> Additionally, even if the Work Unit does not initiate a request for an open position, the system shall flexibly leverage the vacant post report to trigger and publish the vacancy automatically based on the establishment.</li> </ul> |

## Screening and Shortlisting

| FR ID      | Requirement                 | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-031 | Blacklist Check             | <p>System shall check all applicants against integrated Blacklist Database.</p> <ul style="list-style-type: none"> <li>○ The system shall integrate the updated inter-bank blacklist pool database for applicant screening. During application submission or profile parsing, the system shall automatically cross-reference the applicant's name against the active blacklist pool table for reference and verification.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| FR-REC-032 | External Screening          | <p>System shall provide screening interface to filter external applicants based on configurable criteria</p> <p>The system shall provide a configurable screening module that allows HR users to define and adjust filtering criteria for external applicants. The system shall support filtering based on the following applicant parameters:</p> <ul style="list-style-type: none"> <li>• <b>Demographics &amp; Personal Details:</b> Date of Birth, Place of Birth, Gender</li> <li>• <b>Employment &amp; Work Status:</b> Current Working Status, Current Company</li> <li>• <b>Availability:</b> Willingness to Join Immediately, Available from Date</li> <li>• <b>Academic Qualifications:</b> Highest Cumulative Grade Point Average (CGPA)</li> <li>• <b>Experience Metrics:</b> <ul style="list-style-type: none"> <li>○ Total Relevant Experience</li> <li>○ Banking Sector Experience</li> <li>○ Non-Banking Experience</li> </ul> </li> </ul> |
| FR-REC-033 | Internal Re-Validation      | System shall re-validate eligibility at time of screening.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| FR-REC-034 | Criteria-Based Shortlisting | System shall generate shortlist based on configurable match against Competency Requirements, Required Certifications,                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

|            |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------------|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                       | <p>Experience Relevance, and PMS Score.</p> <p>The system generates shortlists by evaluating applicants against required job competencies across standard categories, including General, Technical, Leadership, and Communication skills. The ERP compares the job's target proficiency levels against the candidate's actual skill levels retrieved from PMS records for internal staff or assessment submissions for external applicants. Candidates must achieve a configurable minimum overall match percentage to qualify for the shortlist.</p> |
| FR-REC-035 | Assessment Invitation | System shall generate and send assessment invitations to shortlisted candidates.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

### Selection, Ranking, and Scoring

| FR ID      | Requirement             | Description                                                                                                                                                                                                                                                                                                  |
|------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-046 | Internal Scoring        | System shall calculate final score: $(PMS \times PMS\%) + (Exam \times Exam\%) + (Interview \times Interview\%)$ . For promotion purpose. Transfer vacancy use : $(PMS \times PMS\%) + (Current\ place\ of\ Assignment\ (it\ include\ position\ and\ branch)\ \% + Application\ Date\ + Recommendation\ \%)$ |
| FR-REC-047 | External Scoring        | System shall calculate final score: $(Exam \times Exam\%) + (Interview \times Interview\%)$ .                                                                                                                                                                                                                |
| FR-REC-048 | Qualification Minimum   | System shall disqualify candidates scoring Less than 50% in any assessment component.                                                                                                                                                                                                                        |
| FR-REC-049 | Auto-Ranking            | System shall sort candidates in descending order of final score.                                                                                                                                                                                                                                             |
| FR-REC-050 | Tie-Breaking Logic      | System shall apply hierarchical tie-breaking: Gender Priority first, then Higher PMS Score.                                                                                                                                                                                                                  |
| FR-REC-051 | Reserve Pool Management | System shall maintain Reserve Candidate Pool for high-performing non-selected candidates.                                                                                                                                                                                                                    |
| FR-REC-052 | Reserve Expiry          | System shall automatically expire reserve status after Six (6) Months.                                                                                                                                                                                                                                       |

|            |                     | Maternity the system shall render their specific status flag on Leave to inform HR officers.                                                                                                                                                     |
| FR-REC-057 | Document Generation | System shall generate Promotion Letter or Transfer Letter. Also Acting and Assignment letter                                                                                                                                                     |
| FR-REC-058 | Master Data Update  | System shall trigger updates to Employee Master Data and IT Access provisioning to the new employee is hired.                                                                                                                                    |
| FR-REC-059 | Offer Issuance      | System shall generate and send Job Offer Letter.                                                                                                                                                                                                 |
| FR-REC-060 | Response Window     | System shall track Three (3) Day response window from date of offer issuance.                                                                                                                                                                    |
| FR-REC-061 | Cascade Logic       | If offer is declined or response window expires, system shall trigger offer workflow for Next Ranked Candidate.                                                                                                                                  |
| FR-REC-062 | Employment Letter   | Upon acceptance, system shall generate official Employment Acceptance Letter and forward the case to required document organization process.<br>Up on completion of the document organization, system shall generate official Employment letter. |

### Probation Management

| FR ID      | Requirement            | Description                                                                                                                                                             |
|------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-063 | Duration Configuration | Non-Managerial: 60 Days; Managerial: 75 Days.                                                                                                                           |
| FR-REC-064 | Proactive Notification | System shall send notification to Supervisor Five (5) Days prior to probation end date.<br>System shall also send notification to the assigned HR Officer for follow up |
| FR-REC-065 | Outcome Recording      | System shall support outcome: Satisfactory (Confirmation) or Unsatisfactory (Termination).                                                                              |

### Employee-Initiated Transfer Process

| FR ID      | Requirement       | Description                                                                                                                                                                                                   |
|------------|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-066 | Grade Restriction | <ul style="list-style-type: none"> <li>The system shall restrict internal transfer applications strictly to vacancies sharing the exact same pay/career grade as the applicant's current position.</li> </ul> |

|            |                   |                                                                                                                                                                                                                                                                                                       |
|------------|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                   | <ul style="list-style-type: none"> <li>If the job grade of the target vacancy differs from the employee's current job grade (whether higher or lower), the system shall automatically block the application and prevent submission of the transfer request.</li> </ul>                                |
| FR-REC-067 | Service Rule      | System shall validate Minimum of One (1) Year in current position and location for eligibility.                                                                                                                                                                                                       |
| FR-REC-068 | Discipline Impact | Any Active Written Warning (First, Second and Last) = Ineligible (system should be flexible as per procedure change).                                                                                                                                                                                 |
| FR-REC-069 | Exchange Transfer | System shall support "Exchange Transfer" logic only when Both Employees have zero active disciplinary records, with approval from both employee districts to confirm exchange transfer, and shall match requests whenever there are applicants in exchange transfer.                                  |
| FR-REC-070 | Withdrawal Rules  | Employees may cancel pending request via Self-Service. System shall update transfer requests by obtaining confirmation from applicants with pending requests un responded for more than a year, and cancel the transfer request if the employee changes their mind or does not respond within a week. |
| FR-REC-071 | Refusal Penalty   | If employee refuses Approved Transfer, system shall flag record, notify HR, and list the employee as ineligible for 12 months.                                                                                                                                                                        |

### Transfer Ranking Algorithm

| FR ID      | Requirement          | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-072 | Weighted Scoring     | <p>System shall calculate Transfer Suitability Score: Application Date (20%), Total Experience (20%), Service in Current Location (20%), PMS Score (30%) and Recommendation from supervisor (10%). The system shall be configurable as per changes in the procedure)</p> <p>System shall rank employees for same area based on the criteria and notify applicants their ranking.</p> <p>System shall also update the ranking whenever there are new applicants for the specific area or response for the existing requests are made.</p> |
| FR-REC-073 | Discipline Deduction | System shall reject applications if active disciplines available.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|            |                    |                                                                                                    |
|------------|--------------------|----------------------------------------------------------------------------------------------------|
| FR-REC-074 | Minutes Generation | System shall generate Transfer Committee Minutes with ranked list, scores, and selection decision. |
|------------|--------------------|----------------------------------------------------------------------------------------------------|

## Internal Labor Market

| FR ID      | Requirement                                                             | Description                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------|-------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-075 | Internal Labor Market Transfer Candidate Qualification & Ranking Engine | The system shall automatically aggregate, weight, and rank all internal transfer applicants targeting the request of same Work Unit or Branch. The ranking algorithm shall evaluate candidates based on defined qualification criteria of transfer ( PMS Score (Minimum 75%), Total Work Experience at Bunna Bank, Application Date/Time Stamp, Length of Service in Current Assignment, and Immediate Supervisor Recommendation.) |
| FR-REC-076 | Internal Labor Market Mutual Transfer Matching Engine                   | The system shall identify and match candidates requesting mutual place swaps across different Branches or Work Units. The matching engine shall validate that both swapping candidates meet the baseline transfer criteria and match on position level and job role to facilitate direct exchange approvals.                                                                                                                       |
| FR-REC-077 | Internal Labor Market Candidate Eligibility Pre Screening               | The system shall enforce automatic hard gates for transfer applicants. If a candidate does not meet the minimum prerequisite threshold—specifically a PMS Score of 75% or higher or any mandatory minimum tenure at their current post—the system shall block the application submission and notify the applicant of their ineligibility.                                                                                          |
| FR-REC-078 | Internal Labor Market Automated Priority & Tie-Breaking Logic           | The system shall calculate composite candidate scores and maintain an automated priority queue for each vacant position. In cases where multiple candidates meet all criteria, the system shall apply predefined tie-breaking rules (prioritizing earlier Application Date/Time and longer Total Experience at Bunna Bank) to determine final transfer placement.                                                                  |

## Acting / Supplementary Role

| FR ID | Requirement | Description |
|-------|-------------|-------------|
|-------|-------------|-------------|

|            |                                                              |                                                                                                                                                                                                                                                                                                                                                                                        |
|------------|--------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-079 | Acting Role Request & District Director Approval Workflow    | The system shall enable HR or the requesting Work Unit/Branch to initiate an Acting/Supplementary Role assignment when a vacant post is identified. The request shall be routed automatically to the District Director for review and formal Approval or Rejection.                                                                                                                    |
| FR-REC-080 | Automated Employee Profile & Benefit Adjustment              | Upon the District Director's approval of an Acting Role assignment, the system shall automatically update the employee's profile data to reflect the new supplementary position and automatically attach/calculate any corresponding Acting Benefits, Allowances, or Pay Adjustments associated with the target post.                                                                  |
| FR-REC-081 | Acting Assignment Expiry & Termination Notification Workflow | The system shall track the duration of the acting period and automatically trigger a system notification/alert to HR when the assignment period ends, a permanent candidate is assigned, or termination is initiated. HR shall then finalize the termination, prompting the system to revert the employee's profile, benefits, and system access rights to their substantive position. |

### Application Status Notification

| FR ID      | Requirement                     | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|------------|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-REC-082 | Applicant Decision Notification | <ul style="list-style-type: none"> <li>During the selection process The system automatically updates and displays each employee's current status in their account.               <ul style="list-style-type: none"> <li>* Employees who pass get a message updating their current status to "Qualified" and inviting them to prepare for the interview.</li> <li>* Employees who do not pass get a message updating their current status to "Not Qualified" for this round.</li> </ul> </li> </ul> |
| FR-REC-083 | Vacancy Status                  | <p>When the result is finalized the system updates the job position to Vacancy Closed status to all applicants. The applicant receives their final test and interview scores.</p> <p>The system updates their candidate profile to Re eligible, allowing them to apply for new job openings.</p>                                                                                                                                                                                                   |

### Requirement Report

| FR ID      | Requirement                                      | Description                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## 9. Module 3: Assessment Management Module

### 9.1 Introduction

The Assessment Management System Module shall provide a comprehensive, integrated platform for managing all candidate assessment activities within the recruitment lifecycle. The module shall encompass two core sub-modules: the Exam System (Written Assessment) and the Competency-Based Interview System (CBIS). The module shall support the full assessment lifecycle including question bank management, exam creation and delivery, proctoring, scoring, interview scheduling, competency-based evaluation, and result integration with the Recruitment Module.

The system shall be fully integrated with the Recruitment and Selection Management System, Workforce Planning Module, Employee Master Data, and other ERP HR modules to ensure seamless data flow and process automation.

### 9.2 Purpose

The purpose of the Assessment Management System Module shall be to:

1. **Standardize** candidate assessment across all recruitment activities through a unified assessment framework.
2. **Digitize** the entire assessment lifecycle from question bank creation through final scoring.
3. **Enforce** objective scoring and ranking methodologies aligned with the Bank's policies.
4. **Provide** real-time visibility into candidate performance across all assessment stages.
5. **Ensure** assessment integrity through robust proctoring and anti-cheating measures.
6. **Generate** comprehensive reports for decision-making and compliance purposes.
7. **Maintain** auditable records of all assessment activities.
8. **Integrate** seamlessly with Recruitment, Payroll, and other ERP modules.

### 9.2.1 Business Rules

The Assessment Management System Module shall operate under the following business rules:

#### Core Assessment Rules

| Rule ID   | Rule Description                                                                          |
|-----------|-------------------------------------------------------------------------------------------|
| BR-AMS-01 | All assessments shall be linked to a specific job position and recruitment request.       |
| BR-AMS-02 | Assessment configuration shall support Written Exam Only, Interview Only, or Both.        |
| BR-AMS-03 | Weight distribution shall be automatically applied based on candidate type and role.      |
| BR-AMS-04 | All scoring and ranking must be flexible to accommodate procedure changes.                |
| BR-AMS-05 | Minimum score of 50% required in any individual assessment component.                     |
| BR-AMS-06 | Candidates scoring below 50% shall be automatically disqualified from further processing. |
| BR-AMS-07 | All assessment activities shall maintain a complete audit trail.                          |

## 10. Weight Distribution Rules

| <b>Candidate Type</b>      | <b>Role Level</b>   | <b>Assessment Components</b>                                   | <b>Weight Distribution</b>                                                                                             |
|----------------------------|---------------------|----------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------|
| <i>External Applicants</i> | Managerial & Junior | Exam + Interview                                               | 50% Exam + 50% Interview                                                                                               |
| <i>External Applicants</i> | Non-Managerial      | Exam + Interview                                               | 60% Exam + 40% Interview                                                                                               |
| <i>Internal Applicants</i> | Managerial          | PMS + Interview                                                | 60% PMS + 40% Interview                                                                                                |
| <i>Internal Applicants</i> | Non-Managerial      | PMS + Exam + Interview                                         | 40% PMS + 30% Exam + 30% Interview                                                                                     |
| <i>Internal Applicants</i> | Junior              | PMS + Exam + Interview                                         | 50% PMS + 25% Exam + 25% Interview                                                                                     |
| <i>Transfer Applicants</i> | All Levels          | PMS + Application Date + Experience + Service + Recommendation | PMS (30%) + Application Date (20%) + Total Experience (20%) + Service in Current Location (20%) + Recommendation (10%) |

**Note:** All weight distributions must be configurable to accommodate procedure changes.

### Exam Delivery Rules

| <b>Rule ID</b> | <b>Rule Description</b>                                                                                                       |
|----------------|-------------------------------------------------------------------------------------------------------------------------------|
| BR-AMS-08      | Candidates must be invited to the exam through the Recruitment Module.                                                        |
| BR-AMS-09      | Exam shall only be active during the scheduled time window.                                                                   |
| BR-AMS-10      | Candidates arriving more than the configured late time shall be automatically disqualified. (The time should be configurable) |
| BR-AMS-11      | The system shall enforce tab-switch lockout and screenshot prevention during exams.                                           |
| BR-AMS-12      | Copy/Paste functionality shall be disabled during exams.                                                                      |
| BR-AMS-13      | Manual override for exam results shall require audit trail logging.                                                           |
| BR-AMS-14      | Results not processed within 3 working days shall be flagged as overdue.                                                      |

### Interview Rules

| Rule ID   | Rule Description                                                                  |
|-----------|-----------------------------------------------------------------------------------|
| BR-AMS-15 | Candidates must score at least 50% on written exam to be scheduled for interview. |
| BR-AMS-16 | Original documents must be verified before interview scheduling.                  |
| BR-AMS-17 | Panel members shall declare any conflict of interest before evaluation.           |
| BR-AMS-18 | Each interviewer shall provide individual scores and comments.                    |
| BR-AMS-19 | Final score shall be calculated based on configured weight distribution.          |

### 10.1.1 Functional Requirements - Exam System (Sub-Module)

#### Question Bank Management

| FR ID      | Requirement             | Description                                                                                                                                                                                                     |
|------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-001 | Question Bank Creation  | The system shall allow authorized HR administrators to create and maintain a centralized question bank organized by job position, competency, and question type.                                                |
| FR-EXM-002 | Question Types          | The system shall support multiple question types including: Multiple Choice (Single Answer), Multiple Choice (Multiple Answers), True/False, Short Answer, Essay, and Fill-in-the-Blank.                        |
| FR-EXM-003 | PDF Import              | The system shall allow HR administrators to upload exam papers in PDF format and automatically parse and extract question text, multiple choice options, and answer keys into the system's question repository. |
| FR-EXM-004 | Question Categorization | The system shall automatically categorize questions based on the selected job title and competency.                                                                                                             |
| FR-EXM-005 | Question Metadata       | The system shall store metadata for each question including: Job Position, Competency, Difficulty Level, Question Type, Marks Allocated, and Last Used Date.                                                    |
| FR-EXM-006 | Question Review         | The system shall require review and approval of imported questions before they are added to the question bank.                                                                                                  |

|            |                       |                                                                                                                                               |
|------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-007 | Version Control       | The system shall maintain version control for all questions, tracking modifications, updates, and the user responsible.                       |
| FR-EXM-008 | Question Search       | The system shall allow administrators to search, filter, and view questions by job position, competency, question type, and difficulty level. |
| FR-EXM-009 | Question Deactivation | The system shall allow administrators to deactivate outdated or incorrect questions while preserving historical records.                      |

### Exam Creation and Configuration

| FR ID      | Requirement                  | Description                                                                                                                                                            |
|------------|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-010 | Exam Creation                | The system shall allow authorized users to create exams linked to specific job positions and recruitment requests.                                                     |
| FR-EXM-011 | Automated Question Selection | The system shall automatically generate exams by selecting questions from the question bank based on job position, competency requirements, and configured parameters. |
| FR-EXM-012 | Exam Configuration           | The system shall allow configuration of: Exam Title, Date and Time, Duration, Total Marks, Passing Score, and Question Distribution.                                   |
| FR-EXM-013 | Randomization                | The system shall support randomization of question order and answer options to prevent cheating.                                                                       |
| FR-EXM-014 | Exam Preview                 | The system shall allow administrators to preview the exam before publishing.                                                                                           |
| FR-EXM-015 | Exam Scheduling              | The system shall allow scheduling of exam sessions with defined start and end times.                                                                                   |
| FR-EXM-016 | Candidate Assignment         | The system shall allow assignment of candidates to exam sessions based on recruitment screening results.                                                               |

|            |                      |                                                                                                                            |
|------------|----------------------|----------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-017 | Candidate Invitation | The system shall automatically send exam invitations to candidates with login credentials, exam details, and instructions. |
|------------|----------------------|----------------------------------------------------------------------------------------------------------------------------|

### Exam Delivery and Proctoring

| FR ID      | Requirement           | Description                                                                                                                                        |
|------------|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-018 | Secure Login          | The system shall require candidate authentication using unique credentials before accessing the exam.                                              |
| FR-EXM-019 | Exam Activation       | The system shall only activate the exam during the scheduled time window.                                                                          |
| FR-EXM-020 | Late Arrival Lockout  | The system shall automatically lockout candidates who arrive more than the configured time late and mark them as "Disqualified."                   |
| FR-EXM-021 | Copy/Paste Lock       | The system shall disable copy/paste functionality during the exam.                                                                                 |
| FR-EXM-022 | Screenshot Prevention | The system shall block screenshot and screen-capture attempts during the exam.                                                                     |
| FR-EXM-023 | Tab-Switch Lockout    | The system shall enforce tab-switch lockout, automatically logging violations and marking candidates as "Disqualified" after threshold violations. |
| FR-EXM-024 | Exam Timer            | The system shall display a countdown timer and automatically submit the exam when time expires.                                                    |
| FR-EXM-025 | Question Navigation   | The system shall allow candidates to navigate between questions and mark questions for review.                                                     |
| FR-EXM-026 | Answer Tracking       | The system shall track and save answers as candidates progress through the exam.                                                                   |
| FR-EXM-027 | Auto-Save             | The system shall automatically save candidate answers at regular intervals to prevent data loss.                                                   |
| FR-EXM-028 | Candidate Status      | The system shall display candidate status: Not Started, In Progress, Completed, or Disqualified.                                                   |

### Exam Scoring and Grading

| FR ID      | Requirement           | Description                                                                                                                                                     |
|------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-029 | Automatic Scoring     | The system shall automatically score Multiple Choice, True/False, and Fill-in-the-Blank questions.                                                              |
| FR-EXM-030 | Manual Grading        | The system shall allow authorized graders to manually grade Short Answer and Essay questions through a dedicated grading interface.                             |
| FR-EXM-031 | Grader Assignment     | The system shall automatically assign grading tasks to the responsible person from the job position's work unit.                                                |
| FR-EXM-032 | Bulk Grading          | The system shall support bulk grading of short answer questions across multiple candidates.                                                                     |
| FR-EXM-033 | Result Calculation    | The system shall automatically calculate total scores and determine pass/fail status based on the configured passing score (minimum 50%).                       |
| FR-EXM-034 | Result Processing SLA | The system shall flag not evaluated exams within 3 working days on the HR dashboard and send automated reminder alerts.                                         |
| FR-EXM-035 | Manual Override       | The system shall allow manual entry of exam results individually or via bulk Excel upload with full audit trail logging (who entered the score, when, and why). |
| FR-EXM-036 | Score Verification    | The system shall require supervisor verification for manual score entries.                                                                                      |

### Exam Disqualification and Compliance

| FR ID      | Requirement            | Description                                                                                                                                                                                                |
|------------|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-037 | Disqualification Rules | The system shall record and enforce disqualification for: Late arrival (>As per the configured time), Tab-switch violations, Screenshot attempts, Copy/Paste attempts, and Other anti-cheating violations. |
| FR-EXM-038 | Disqualification Log   | The system shall maintain a complete log of all disqualification events with timestamp and reason.                                                                                                         |

|            |                            |                                                                                                                                           |
|------------|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-039 | Automated Disqualification | The system shall automatically disqualify candidates triggering anti-cheating violations and permanently record status as "Disqualified." |
| FR-EXM-040 | Candidate Notification     | The system shall notify candidates of disqualification status and reason.                                                                 |
| FR-EXM-041 | Appeal Handling            | The system shall support appeal requests from disqualified candidates through the ESS portal.                                             |

### Exam Reports and Analytics

| FR ID      | Requirement              | Description                                                                                                                    |
|------------|--------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-042 | Exam Results Report      | The system shall generate detailed exam results reports showing individual candidate scores, status, and performance analysis. |
| FR-EXM-043 | Candidate Ranking Report | The system shall generate ranked candidate reports based on exam scores.                                                       |
| FR-EXM-044 | Question Analytics       | The system shall generate reports analyzing question performance, difficulty levels, and discrimination indices.               |
| FR-EXM-045 | Disqualification Report  | The system shall generate reports showing disqualification statistics and reasons.                                             |
| FR-EXM-046 | SLA Compliance Report    | The system shall generate reports showing grading SLA compliance and overdue batches.                                          |
| FR-EXM-047 | Export Capability        | The system shall allow authorized users to export exam reports in PDF, Excel, and CSV formats.                                 |
| FR-EXM-048 | Dashboard                | The system shall provide a dashboard showing exam status, completion rates, and overdue grading tasks.                         |

### Integration Requirements

| FR ID      | Requirement             | Description                                                                                                          |
|------------|-------------------------|----------------------------------------------------------------------------------------------------------------------|
| FR-EXM-049 | Recruitment Integration | The system shall display assessment results (Written Exam results) to the Recruitment Module for further processing. |

|                                                      |                                   |                                                                                                                                                                                                                                         |
|------------------------------------------------------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-EXM-050                                           | Candidate Eligibility             | The system shall automatically block candidates scoring below 50% from being scheduled for interviews.                                                                                                                                  |
| FR-EXM-051                                           | Document Verification             | The system shall include mandatory checkbox for "Original Documents Verified" prior to interview scheduling. (When external)                                                                                                            |
| FR-EXM-052                                           | Employee Master Data              | The system shall retrieve candidate information and job position data from Employee Master Data.                                                                                                                                        |
| FR-EXM-053                                           | Notification Integration          | The system shall send notifications through ERP inbox and email.                                                                                                                                                                        |
| FR-EXM-054                                           | Audit Integration                 | The system shall maintain immutable audit logs for all exam activities.                                                                                                                                                                 |
| <b>Transfer Assessment Scheduling and Management</b> |                                   |                                                                                                                                                                                                                                         |
| FR-EXM-055                                           | Transfer Assessment Trigger       | Upon submission of a transfer request through the Employee Self-Service (ESS) Module, the system shall automatically trigger the creation of a transfer assessment workflow in the Assessment Management Module.                        |
| FR-EXM-056                                           | Transfer Assessment Configuration | The system shall allow HR administrators to configure transfer-specific assessment parameters including assessment type (Written Exam, Interview, or Both), weight distribution, and passing score thresholds.                          |
| FR-EXM-057                                           | Automatic Assessment Assignment   | The system shall automatically assign the configured transfer assessment to all eligible transfer applicants who meet the minimum qualification criteria.                                                                               |
| FR-EXM-058                                           | Transfer Exam Creation            | The system shall allow HR administrators to create transfer-specific written exams using questions from the question bank or by uploading new questions, with the ability to define competency areas relevant to the transfer position. |
| FR-EXM-059                                           | Transfer Interview Scheduling     | The system shall allow HR administrators to schedule transfer interviews with configurable panel                                                                                                                                        |

|                                              |                                  |                                                                                                                                                                                                                                            |
|----------------------------------------------|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                              |                                  | composition based on the transfer position requirements.                                                                                                                                                                                   |
| FR-EXM-060                                   | Bulk Transfer Assessment         | The system shall support bulk scheduling and management of assessments for multiple transfer applicants for the same position simultaneously.                                                                                              |
| FR-EXM-061                                   | Transfer Assessment Scoring      | The system shall automatically calculate transfer assessment scores based on configured weight distributions, including Written Exam Score, Interview Score, and any additional transfer-specific criteria.                                |
| FR-EXM-062                                   | Transfer Ranking Integration     | Upon completion of transfer assessments, the system shall automatically integrate assessment scores with the Transfer Ranking Algorithm in the Recruitment Module to determine final transfer ranking and placement.                       |
| <b>Transfer Assessment Result Management</b> |                                  |                                                                                                                                                                                                                                            |
|                                              |                                  |                                                                                                                                                                                                                                            |
| FR-EXM-063                                   | Transfer Result Calculation      | The system shall automatically calculate final transfer scores combining assessment results with transfer ranking criteria (Application Date, Total Experience, Service in Current Location, PMS Score, and Recommendation) as configured. |
| FR-EXM-064                                   | Transfer Result Approval         | The system shall route transfer assessment results through configured approval workflows, including HR verification and management approval.                                                                                               |
| FR-EXM-065                                   | Transfer Result Notification     | Upon final approval, the system shall automatically notify transfer applicants of their assessment results through the ERP notification system and ESS portal.                                                                             |
| FR-EXM-066                                   | Transfer Result Archiving        | The system shall maintain complete historical records of all transfer assessments, including scores, interviewer comments, and approval history.                                                                                           |
| <b>Result Publication Configuration</b>      |                                  |                                                                                                                                                                                                                                            |
| FR-EXM-067                                   | Result Publication Configuration | The system shall allow HR administrators to configure result publication settings including                                                                                                                                                |

|                                 |                              |                                                                                                                                                                                                                       |
|---------------------------------|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                 |                              | publication date, visibility duration, and result display format.                                                                                                                                                     |
| FR-EXM-068                      | Result Publication Trigger   | Upon final approval of assessment results, the system shall allow HR administrators to publish results to the HR Portal with a single action.                                                                         |
| FR-EXM-069                      | Scheduled Result Publication | The system shall allow administrators to schedule result publication for a future date and time.                                                                                                                      |
| FR-EXM-070                      | Result Withdrawal            | The system shall allow administrators to withdraw published results if errors are identified, with full audit trail of withdrawal and reason.                                                                         |
| <b>Result Display on Portal</b> |                              |                                                                                                                                                                                                                       |
| FR-EXM-071                      | Anonymized Result Display    | The system shall display assessment results on the HR Portal with candidate identification limited to Employee ID Number or Candidate ID Number only. Candidate names shall not be displayed to protect privacy.      |
| FR-EXM-072                      | Result View Access           | The system shall allow candidates to access their own results by entering their Employee ID Number or Candidate ID Number and any additional verification information as configured.                                  |
| FR-EXM-073                      | Result Dashboard             | The system shall provide a dedicated results dashboard on the HR Portal where candidates can view their assessment results, scores, and status.                                                                       |
| FR-EXM-074                      | Result Details               | The system shall display detailed result information including: Assessment Name, Assessment Date, Component Scores (Written Exam, Interview, PMS where applicable), Total Score, Pass/Fail Status, and Rank/Position. |
| FR-EXM-075                      | Status Indicators            | The system shall display clear status indicators for each assessment including: Not Started, In Progress, Completed, Passed, Failed, and Under Review.                                                                |
| FR-EXM-076                      | Result Expiry                | The system shall automatically remove published results from the public view after the configured                                                                                                                     |

|                                                        |                                 |                                                                                                                                                                       |
|--------------------------------------------------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                        |                                 | expiry date while maintaining records in the system database.                                                                                                         |
| FR-EXM-077                                             | Candidate Search                | The system shall allow candidates to search and view results by entering their Employee ID Number or Candidate ID Number.                                             |
| <b>Result Publication for Recruitment and Transfer</b> |                                 |                                                                                                                                                                       |
| FR-EXM-078                                             | Recruitment Result Publication  | The system shall allow publication of recruitment assessment results (written exam and interview results) to the HR Portal for both internal and external candidates. |
| FR-EXM-079                                             | Transfer Result Publication     | The system shall allow publication of transfer assessment results to the HR Portal for internal employees.                                                            |
| FR-EXM-080                                             | Shortlist Publication           | The system shall allow publication of shortlisted candidates (by Employee ID/Candidate ID only) for the next stage of the recruitment or transfer process.            |
| FR-EXM-081                                             | Final Selection Publication     | The system shall allow publication of final selection results (by Employee ID/Candidate ID only) for the position.                                                    |
| FR-EXM-082                                             | Result Category Filtering       | The system shall allow users to filter published results by assessment type (Recruitment, Transfer, Promotion), position, and date.                                   |
| <b>Result Communication and Notifications</b>          |                                 |                                                                                                                                                                       |
| FR-EXM-083                                             | Result Publication Notification | The system shall automatically notify candidates when their assessment results are published on the HR Portal.                                                        |
| FR-EXM-084                                             | Result Communication Channel    | The system shall support result notifications through ERP dashboard alerts, email, and SMS.                                                                           |
| FR-EXM-085                                             | Result View Confirmation        | The system shall track and log when candidates view their published results.                                                                                          |

### 10.1.2 Functional Requirements - Competency-Based Interview System (Sub-Module)

#### Job Position & Competency Configuration

| FR ID       | Requirement            | Description                                                                                                                                                  |
|-------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-CBIS-001 | Job Creation           | The system should integrate with the recruitment module and allow Administrators to forward the vacancy to assessment module for initiating the assessments. |
| FR-CBIS-002 | Vacancy Number         | The vacancy number from recruitment module shall be displayed on the assessment module as it is                                                              |
| FR-CBIS-003 | Competency Library     | System shall maintain a library of competencies with Name, Description, required competency level, Method (STAR/STARR/Likert)                                |
| FR-CBIS-004 | Suggested Questions    | Each competency shall store suggested interview questions                                                                                                    |
| FR-CBIS-005 | Job-Competency Linking | Competencies shall be assigned to jobs with weights summing to 100%                                                                                          |

#### Interview Management & Scheduling

| FR ID       | Requirement            | Description                                                                                                                                                                                                              |
|-------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-CBIS-006 | Vacancy Selection      | Admin selects Vacancy Number to schedule interviews                                                                                                                                                                      |
| FR-CBIS-007 | Interview Type         | Admin selects Managerial or Non-Managerial interview type                                                                                                                                                                |
| FR-CBIS-008 | Candidate Management   | The System shall enable the Admin to view all qualified candidates who pass written exam to schedule interview assessment or directly assigned eligible candidates for interview assessment from the recruitment module. |
| FR-CBIS-009 | Interviewer Assignment | One or more interviewers can be assigned to a candidate and the HR Officer should assign the interviewers and the interviewers will have an access automatically                                                         |

|             |                                    |                                                                                                                                        |
|-------------|------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| FR-CBIS-010 | Bulk Scheduling                    | Multiple candidates can be scheduled simultaneously                                                                                    |
| FR-CBIS-011 | Scoring Weights                    | Admin configures weights for Interview, Exam, and PMS (must sum to 100%)                                                               |
| FR-CBIS-012 | Weight & Interview Type Validation | System shall validate that weights sum to 100% and System shall validate interview type selection and apply appropriate scoring logic. |

### Interviewer Dashboard & Evaluation

| FR ID       | Requirement         | Description                                                                             |
|-------------|---------------------|-----------------------------------------------------------------------------------------|
| FR-CBIS-013 | Grouped View        | Dashboard groups assigned interviews by Vacancy Number                                  |
| FR-CBIS-014 | Status Tabs         | Dashboard displays Pending, Draft, and Evaluated tabs                                   |
| FR-CBIS-015 | Candidate Selection | Interviewer selects individual candidate by name to evaluate                            |
| FR-CBIS-016 | Competency Display  | Evaluation form displays competencies with description, weight, and suggested questions |
| FR-CBIS-017 | Rating Styles       | System supports STAR, STARR, and Likert rating methods                                  |
| FR-CBIS-018 | Save Draft          | Interviewer can save partial evaluation as DRAFT                                        |
| FR-CBIS-019 | Submit              | Interviewer can SUBMIT final evaluation                                                 |
| FR-CBIS-020 | Mark Absent         | Interviewer can mark candidate as ABSENT (submits with zero score)                      |

### Evaluation Locking & Read-Only

| FR ID       | Requirement       | Description                                                                |
|-------------|-------------------|----------------------------------------------------------------------------|
| FR-CBIS-021 | Auto-Lock         | System automatically locks evaluation when all interviewers have submitted |
| FR-CBIS-022 | Read-Only View    | Locked evaluations display in read-only format                             |
| FR-CBIS-023 | Lock Notification | System displays lock status and reason to users                            |

## Reporting & Analytics

| FR ID       | Requirement              | Description                                                                                                                                                   |
|-------------|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-CBIS-024 | Candidate Ranking        | System generates ranked report by Total Score                                                                                                                 |
| FR-CBIS-025 | Report Columns           | Report shall display: Rank, Name, PMS (Actual + Weighted), Exam (Actual + Weighted), Interview Scores, Avg Interview (Actual + Weighted), Total Score, Status |
| FR-CBIS-026 | Interviewer Scores       | Report shows individual interviewer scores per candidate                                                                                                      |
| FR-CBIS-027 | Absent Status            | Absent candidates are flagged in reports                                                                                                                      |
| FR-CBIS-028 | PDF Export               | Reports export to PDF with signature blocks for interviewers and observer                                                                                     |
| FR-CBIS-029 | CSV Export               | Which include Serial Number, Name, PMS (Weighted), Exam (Weighted), Interview Scores, Average Interview (Actual and Weighted), Total Score, Rank, Status      |
| FR-CBIS-030 | Competency Detail Report | System generates detailed competency breakdown report                                                                                                         |

## Integration Requirements

| FR ID       | Requirement          | Description                                                             |
|-------------|----------------------|-------------------------------------------------------------------------|
| FR-CBIS-031 | PMS Integration      | PMS scores shall be read from HRIS (Read-Only, Non-Editable)            |
| FR-CBIS-032 | Employee Master Data | All internal Candidate information shall sync with Employee Master Data |
| FR-CBIS-033 | Exam System          | Integration with Exam System for automated result capture               |
| FR-CBIS-034 | Notification System  | System shall send notifications through ERP inbox and email.            |

## Security & Compliance

| FR ID | Requirement | Description |
|-------|-------------|-------------|
|-------|-------------|-------------|

|             |                       |                                                           |
|-------------|-----------------------|-----------------------------------------------------------|
| FR-CBIS-035 | Role-Based Access     | Admin and Interviewer roles have different permissions    |
| FR-CBIS-036 | Audit Trail           | All evaluation changes logged with timestamp and user ID  |
| FR-CBIS-037 | Segregation of Duties | No user can initiate, approve, and review same evaluation |
| FR-CBIS-038 | Immutable Records     | Submitted evaluations become read-only and non-editable   |

### Assessment Management System - Notifications

| FR ID         | Requirement                   | Description                                                                             |
|---------------|-------------------------------|-----------------------------------------------------------------------------------------|
| FR-AMS-NOT-01 | Exam Invitation               | Candidates shall receive exam invitations with login credentials and instructions.      |
| FR-AMS-NOT-02 | Exam Reminder                 | Candidates shall receive reminders before the exam date.                                |
| FR-AMS-NOT-03 | Disqualification Notification | Candidates shall be notified of disqualification status and reason.                     |
| FR-AMS-NOT-04 | Results Notification          | Candidates shall be notified when exam results are available.                           |
| FR-AMS-NOT-05 | Overdue Grading Alert         | HR officers shall receive alerts for results not evaluated exams within 3 working days. |
| FR-AMS-NOT-06 | Interview Invitation          | Candidates scoring above 50% shall receive interview invitations.                       |
| FR-AMS-NOT-07 | Interviewer Assignment        | Interviewers shall receive notification when assigned as an interviewer                 |

## 11. Module 4: Employee Master Data

### 11.1 Introduction

The Employee Master Data Module shall serve as the central repository for all employee information within the organization. The system shall maintain a comprehensive digital dossier for each employee, including personal data, job history, documentation, and organizational structure synchronization. The module shall ensure data completeness, accuracy, and accessibility while maintaining strict security and confidentiality.

### 11.2 Purpose

The purpose of the Employee Master Data Module shall be to provide a single source of truth for all employee information. It shall ensure data consistency across all HR modules, enforce data completeness through gatekeeping controls, provide real-time synchronization of organizational changes, and maintain comprehensive audit trails of all data changes.

### 11.3 Business Rules

The Employee Master Data Module shall operate under the following business rules:

- **Digital Dossier:** A complete digital employee file shall be maintained for each employee.
- **Mandatory Documents:** Critical documents shall be required before onboarding finalization.
- **Onboarding Gatekeeper:** File Completeness Check shall prevent finalization if Critical Documents are missing.
- **Role-Based Access:** Access to employee data shall be restricted based on defined roles.
- **Real-Time Propagation:** Updates to Position, Location, Work Unit, Salary, and Benefits shall reflect in real-time across all dependent modules.
- **Immutable Audit Trail:** All changes to employee data shall be logged and non-editable.

### 11.4 Functional Requirements

| FR ID                                   | Requirement     | Description                                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Data Completeness and Validation</b> |                 |                                                                                                                                                                                                                                                                                                                                                                                                    |
| FR-EMP-001                              | Digital Dossier | <ul style="list-style-type: none"> <li>• System shall maintain digital employee file with mandatory documents linked to unique Employee ID.</li> <li>• Binds all personal, employment, payroll, asset, and historical records to this single primary key.</li> <li>• Blocks creation of duplicate master records if an existing Employee ID or matching core demographic record exists.</li> </ul> |
| FR-EMP-002                              | Document Types  | <ul style="list-style-type: none"> <li>• The system must support all document types ( Educational Credentials, National ID, Prior Work Experience, Selection Minutes, Forensic Certificate,</li> </ul>                                                                                                                                                                                             |

|                                     |                                          |                                                                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------|------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     |                                          | Medical Certificate, Asset Registration, Guaranty related documents ( Guarantor letter, Form and ID) ,Employment Form, Certificate of Release, Reference Check, Tin No., Pension Cards/ related documents, Employment Letter, Probation Period Evaluation, Permanent Employment Letter.) by storing the actual files on an external file server while linking them with ERP. |
| FR-EMP-003                          | Onboarding Gatekeeper                    | <ul style="list-style-type: none"> <li>Before a new hire can be set to "Active", the system automatically sees their profile. It makes sure all required details (like TIN number and Emergency Contact) are filled in and all critical documents (like Guarantor forms and Police Clearance) are attached.</li> </ul>                                                       |

## 12. Module 5: Attendance Management System

### 12.1 Introduction

The Attendance Management System shall provide a centralized platform for recording, validating, monitoring, and managing employee attendance across all work locations, work schedules, and job categories. The module shall support configurable work calendars, multiple attendance scenarios, attendance validation, supervisor interventions, reporting, and seamless integration with Leave, Discipline, Payroll, and Employee Master Data.

## 12.2 Business Rules

The Attendance Management System shall operate under the following business rules:

- **Working hours shall be configurable based on:** Branch, Work Unit, Job Position, Job Category, Employee Group, Location
- The system shall support multiple work schedules for Head Office, Branches, Contact Centers, Drivers, IT Staff, and future employee groups.
- Attendance shall consist of both Morning Check-In, Lunch Check-Out, Afternoon Check-In, Final Check-Out where applicable.
- Attendance policies shall support configurable grace periods and dead times.
- Attendance shall become the primary source for Leave validation, Payroll deduction, Overtime, Discipline, Productivity reporting

## 12.3 Functional Requirements

| FR ID                             | Requirement                  | Description                                                                                                                                            |
|-----------------------------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview and Accessibility</b> |                              |                                                                                                                                                        |
| FR-ATT-001                        | Work Schedule Configuration  | System shall allow HR to configure multiple working calendars based on Branch, Work Unit, Job Position, Job Behavior, Employee Category, and Location. |
| FR-ATT-002                        | Location-Based Working Hours | System shall support configurable working hours based on branch and location.                                                                          |
| FR-ATT-003                        | Flexible Work Schedule       | System shall support flexible working schedules for IT staff, Drivers, Contact Center, Shift Employees, and future configurable employee groups.       |
| FR-ATT-004                        | Check-In Scenario Management | System shall support Normal Check-In, Late Check-In, Early Check-In, Pre-approved Late Arrival, Acknowledged Lateness, Technical Failure, Leave,       |

|                                     |                                        |                                                                                                                                                                                         |
|-------------------------------------|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     |                                        | Operational Disruption, and Overtime Check-In scenarios.                                                                                                                                |
| FR-ATT-005                          | Attendance Status Determination        | System shall automatically determine employee attendance status based on configured work schedules.                                                                                     |
| FR-ATT-006                          | Duplicate Check-In Prevention          | System shall prevent duplicate check-in transactions within a configurable time window.                                                                                                 |
| FR-ATT-007                          | Check-In Device Capture                | System shall capture and store the device information used during employee check-in.                                                                                                    |
| FR-ATT-008                          | Check-In Authentication                | System shall authenticate employee identity before accepting attendance transactions.                                                                                                   |
| FR-ATT-009                          | Check-In Deadline Enforcement          | System shall enforce configurable check-in deadlines after scheduled reporting time.                                                                                                    |
| FR-ATT-010                          | Automatic Absence Detection            | System shall automatically classify employees with no attendance record and no approved leave as absent.                                                                                |
| <b>Check-Out Management</b>         |                                        |                                                                                                                                                                                         |
| FR-ATT-011                          | Check-out Scenario Management          | System shall support Normal Check-Out, Early Check-Out, Approved Early Check-Out, Supervisor Acknowledged Early Check-Out, Overtime Check-Out, Technical Failure, Leave, Late Check-Out |
| FR-ATT-012                          | Duplicate Check-out Prevention         | System shall prevent duplicate Check-Out transactions.                                                                                                                                  |
| FR-ATT-013                          | Configurable Check-Out deadlines       | System shall support configurable Check-Out deadlines.                                                                                                                                  |
| FR-ATT-014                          | Check-out Device Capture               | System shall capture Check-Out device information.                                                                                                                                      |
| FR-ATT-015                          | Check-out Authentication               | System shall authenticate employee identity before Check-Out.                                                                                                                           |
| <b>Manual Attendance Management</b> |                                        |                                                                                                                                                                                         |
| FR-ATT-016                          | Manual Attendance Record Creation      | System shall allow supervisors to manually create attendance records.                                                                                                                   |
| FR-ATT-017                          | Manual Attendance Justification        | Manual attendance shall require mandatory justification.                                                                                                                                |
| FR-ATT-018                          | Manual Attendance Supporting Documents | System shall allow supporting document attachments.                                                                                                                                     |
| FR-ATT-019                          | Manual Attendance Audit Trail          | Every manual attendance adjustment shall be recorded in the audit trail.                                                                                                                |
| <b>Force Checkout</b>               |                                        |                                                                                                                                                                                         |
| FR-ATT-020                          | Automatic Force Check-out              | System shall automatically perform Force Check-Out for employees who fail to Check-Out within the configured period.                                                                    |

|                                 |                                          |                                                                                                                                                                                 |
|---------------------------------|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATT-021                      | Force Check-out History                  | System shall maintain Force Checkout history.                                                                                                                                   |
| FR-ATT-022                      | Force Check-out Discipline Escalation    | Repeated Force Check-Out events shall be forwarded to Discipline Management.                                                                                                    |
| <b>ERP Access Control</b>       |                                          |                                                                                                                                                                                 |
| FR-ATT-023                      | Attendance-Based ERP Access Control      | System shall require successful Check-In before employees are allowed access to ERP modules.                                                                                    |
| FR-ATT-024                      | ERP Access Restriction Until Attendance  | Until attendance is recorded, access to configured ERP modules shall remain restricted.                                                                                         |
| <b>Attendance Reports</b>       |                                          |                                                                                                                                                                                 |
| FR-ATT-025                      | Attendance Report Generation             | System shall generate configurable attendance reports including Present, Absent, Late Arrival, Early Departure, Overtime, Force Checkout, Missing Attendance, Technical Failure |
| FR-ATT-026                      | Attendance Report Filtering              | Attendance reports shall support filtering by Branch, Work Unit, Department, Employee, Position, Date Range                                                                     |
| <b>Notifications</b>            |                                          |                                                                                                                                                                                 |
| FR-ATT-027                      | Missing Attendance Notification          | System shall notify employees of missing Check-In or Check-Out.                                                                                                                 |
| FR-ATT-028                      | Attendance Violation Notification        | System shall notify supervisors of attendance violations requiring action.                                                                                                      |
| FR-ATT-029                      | Attendance Violation Escalation          | System shall notify HR when repeated attendance violations exceed configurable thresholds.                                                                                      |
| <b>Integration Requirements</b> |                                          |                                                                                                                                                                                 |
| FR-ATT-030                      | Approved Overtime Integration            | System shall automatically transmit approved overtime to Payroll or Compensatory Leave based on approved entitlement.                                                           |
| FR-ATT-031                      | Repeated Lateness Integration            | System shall accumulate repeated lateness and provide summarized values for Discipline Management.                                                                              |
| FR-ATT-032                      | Unauthorized Absence Payroll Integration | System shall automatically convert unauthorized absences into payroll deductions where applicable.                                                                              |
| FR-ATT-033                      | Leave and Attendance Synchronization     | System shall synchronize approved leave records with attendance to prevent false absence detection.                                                                             |
| <b>Security</b>                 |                                          |                                                                                                                                                                                 |
| FR-ATT-034                      | Attendance Authentication Configuration  | Attendance transactions shall support configurable authentication methods.                                                                                                      |

|            |                                 |                                                         |
|------------|---------------------------------|---------------------------------------------------------|
| FR-ATT-035 | Attendance Audit Log Management | Attendance records shall maintain immutable audit logs. |
|------------|---------------------------------|---------------------------------------------------------|

## 13. Module 6: Time-Off and Leave Management System

### 13.1 Introduction

The Time-Off and Leave Management System shall provide a comprehensive, automated, and user-friendly platform for managing all employee leave-related activities. The module shall support the full leave lifecycle including leave type configuration, accrual calculations, request submission, approval workflows, balance tracking, expiration management, and payroll integration.

### 13.2 Purpose

The purpose of the Leave Management Module shall be to enable structured and automated management of employee leave activities. It shall ensure accurate accrual calculations, enforce leave policies consistently, provide visibility of leave balances and schedules, and integrate seamlessly with payroll for absence-related adjustments.

### 13.3 Business Rules

The Leave Management Module shall operate under the following business rules:

- **Leave Types:** Annual Leave, Sick Leave, Maternity Leave, Paternity Leave, Marriage Leave, Mourning Leave, Leave Without Pay, Compensatory Leave, Special Leave.
- **Annual Leave:** Base 16 days + 1 day per completed year of service.
- **Sick Leave Tiers:** Months 1-2 (100%), Months 3-4 (50%), Months 5-6 (25%), Month 7+ (0%).
- **Job Security:** 9 months continuous sick leave, then termination review.
- **Maternity:** 30 days prenatal + 90 days postnatal.
- **Paternity:** 3 working days.
- **Marriage/Mourning:** 3 working days.
- **Leave Overlap Detection:** System shall detect and alert overlapping leave dates.
- **Early Return:** Unused portion shall be credited back.

- **Expiration Policy:** Unused leave shall expire after configured carry-over limit and grace period.

### 13.4 Functional Requirements

| FR ID                             | Requirement              | Description                                                                                                                                         |
|-----------------------------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview and Accessibility</b> |                          |                                                                                                                                                     |
| FR-LVE-001                        | User Interface           | System shall provide user-friendly self-service interface for leave requests.                                                                       |
| FR-LVE-002                        | Multi-Device Support     | System interface shall be responsive on desktop and mobile devices.                                                                                 |
| FR-LVE-003                        | Audit Trail              | System shall maintain immutable audit log of all leave actions.                                                                                     |
| <b>Leave Type Configuration</b>   |                          |                                                                                                                                                     |
| FR-LVE-005                        | Annual Leave             | System shall allocate base balance of 16 Days per annum.                                                                                            |
| FR-LVE-006                        | Accrual Increment        | The system shall automatically increase the annual leave entitlement of all employees by one (1) additional day for each completed year of service. |
| FR-LVE-007                        | Scheduled Leave          | System shall support submission of Annual Leave Schedules at beginning of fiscal year.                                                              |
| FR-LVE-008                        | Scheduled Leave Approval | System shall allow supervisors to view and approve Leave Schedules.                                                                                 |
| FR-LVE-009                        | Sick Leave Eligibility   | System shall require Medical Certificate for sick leave exceeding policy thresholds.                                                                |
| FR-LVE-010                        | Sick Leave Tiering       | System shall apply salary calculation: Months 1-2 (100%), Months 3-4 (50%), Months 5-6 (25%), Month 7+ (0%).                                        |
| FR-LVE-011                        | Sick Leave Job Security  | System shall maintain Job Security for up to 9 months continuous sick leave.                                                                        |
| FR-LVE-012                        | Sick Leave Alert         | System shall generate alert when continuous sick leave exceeds 9 months.                                                                            |
| FR-LVE-013                        | Maternity Leave          | System shall allocate 30 consecutive days prenatal and 90 consecutive days postnatal.                                                               |

|            |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|------------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-LVE-014 | Paternity Leave       | System shall allow 3 working days at time of child delivery.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| FR-LVE-015 | Marriage Leave        | System shall allow 3 working days.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| FR-LVE-017 | Leave Without Pay     | System shall automatically flag as LWP if requested days exceed available Paid Leave Balance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| FR-LVE-018 | LWP Payroll Deduction | System shall automatically calculate daily salary deduction rate and transmit to Payroll.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| FR-LVE-019 | Special Leave         | <p>The system shall support the classification of Special Leave into separate leave types to accommodate different business scenarios and date requirements.</p> <p>The existing Special Leave category shall be divided into the following two distinct leave types:</p> <p>1. Special Leave – Court Case</p> <p>The employee shall be required to provide both Start Date and End Date when submitting the leave request. The system shall automatically calculate the leave duration based on the entered leave period. The system shall not allow submission of the request unless both dates are provided.</p> <p>2. Special Leave – National Duty / Assignment / Campaign</p> <p>The employee shall submit the leave request by providing only the Start Date, as the duration may not be known at the time of application. The End Date shall be optional during the initial submission.</p> |

| FR-LVE-037            | Rejected Leave Report | System shall generate a report of rejected leave requests including rejection reason, approver comments, employee, leave type, and requested dates.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| FR-LVE-038            | Pending Leave Report  | System shall generate a report of leave requests awaiting approval, including employee, leave type, requested duration, and current approval stage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| FR-LVE-039            | Leave Trend Analysis  | System shall provide statistical analysis of leave patterns by period, work unit, branch, leave type, and employee category.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| FR-LVE-040            | Leave Balance Summary | System shall generate a consolidated leave balance report showing accrued, used, remaining, and expired leave balances for all employees.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| FR-LVE-041            | Expiry Notification   | <p>The system shall support automatic monitoring of employee annual leave balances against the approved leave expiry policy and provide advance notifications to employees before eligible leave balances expire.</p> <p>The system shall implement the following business rules:</p> <ol style="list-style-type: none"> <li>1. Leave Expiry Monitoring <p>The system shall continuously monitor employee leave balances that are subject to expiration based on the approved leave accumulation and expiry policy.</p> <p>The system shall identify leave balances that are approaching their defined expiry date.</p> </li> <li>2. Expiry Reminder Notification <ul style="list-style-type: none"> <li>– The system shall automatically send reminder notifications to employees before the expiry date of eligible unused leave balances.</li> <li>– The notification shall provide sufficient advance notice to allow employees to plan and utilize their remaining leave days before expiration.</li> </ul> </li> </ol> |

|            |                           |                                                                                                                                                                                                                                                                                                       |
|------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                           | <ul style="list-style-type: none"> <li>– The system shall support configurable notification periods before expiry (e.g., number of days prior to expiration).</li> <li>– Notifications may be delivered through available communication channels such as: System notification &amp; Email.</li> </ul> |
| FR-LVE-042 | Manager Approval Reminder | System shall send reminders to managers for pending leave approvals exceeding configurable SLA thresholds.                                                                                                                                                                                            |

## 14. Module 7: Separation and Off-boarding Management System

### 14.1 Introduction

The Separation and Off-boarding Management System shall provide end-to-end automation for all employee separation types. The module replaces the current manual clearance, exit interview, and settlement processes with a unified, auditable digital workflow. The system shall support voluntary resignation, age-related retirement, medical retirement, probation termination, and employer-initiated termination.

### 14.2 Purpose

The purpose of the Separation Management Module shall be to ensure accuracy and transparency in separation case handling, enforce compliance with notice periods, bank policy, and labor law, and provide a complete auditable record of all separation activities.

### 14.3 Business Rules

The Separation Management Module shall operate under the following business rules:

- **Separation Types:** Voluntary Resignation, Age-Related Retirement, Medical Retirement, Probation Termination, Employer-Initiated Termination.
- **Application Date Lock:** Submission Date shall be recorded as Resignation Start Date; Backdating prohibited.

- **Notice Period Validation:** Last Working Day shall be validated against statutory or contractual Notice Period.
- **POMD Override:** Override requires authorization with mandatory justification.
- **Digital Clearance:** All clearance shall be processed digitally with no paper-based forms.
- **Gatekeeping Logic:** Progression to Certificate of Release requires 100% approval from Mandatory Departments.
- **PF Eligibility:** Service > 2 Years AND Separation Reason ≠ Misconduct Termination.
- **System Access Revocation:** Upon case closure, ERP, Email, and CBS access shall be disabled.

#### 14.4 Functional Requirements

| FR ID             | Requirement                       | Description                                                                                                                                                                                                                                                                               |
|-------------------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Initiation</b> |                                   |                                                                                                                                                                                                                                                                                           |
| FR-SEP-001        | Employee Initiation               | System shall allow employees to submit resignation requests through Resignation Module. The system shall prohibit duplicate submission.                                                                                                                                                   |
| FR-SEP-001A       | Mandatory Resignation Information | The resignation form shall require employees to provide the proposed last working day, detailed reason for leaving, and any other information required by the Bank before submission is accepted.                                                                                         |
| FR-SEP-001B       | Payment Request Declaration       | The resignation form shall include a mandatory section allowing employees to request separation payments including accrued leave pay, unpaid salary, severance pay, PF, and any other payable benefits.                                                                                   |
| FR-SEP-001C       | Debt Settlement Authorization     | The resignation form shall require employees to authorize the Bank to apply any separation payments toward settlement of outstanding obligations including staff loans, RSSA, guarantees, advances, credit facilities, or any other debts before any balance is released to the employee. |
| FR-SEP-002        | Application Date Lock             | System shall automatically record Submission Date as Resignation Start Date. Backdating shall be prohibited unless approved by the Director, People Operations Management Directorate (POMD).                                                                                             |
| FR-SEP-003        | Separation Type Selection         | Employee shall select the applicable separation type.                                                                                                                                                                                                                                     |

|                                       |                               |                                                                                                                                                                                                                               |
|---------------------------------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SEP-004                            | Submission Confirmation       | System shall provide confirmation number, on-screen acknowledgment, and email/SMS notification after successful submission.                                                                                                   |
| FR-SEP-005                            | POMD Initiation               | Authorized POMD users shall initiate Retirement, Medical Separation, Probation Separation, Termination, Death, Contract Expiry, or other management-initiated separation cases.                                               |
| <b>Review and Approval</b>            |                               |                                                                                                                                                                                                                               |
| FR-SEP-006                            | Manager Review                | System shall route requests to the Immediate Manager for review, comments, handover planning, and recommendation.                                                                                                             |
| FR-SEP-007                            | POMD Approval                 | Upon manager review, request shall be routed to POMD for approval, rejection, or return for correction.                                                                                                                       |
| FR-SEP-007A                           | Separation Validation         | System shall validate pending disciplinary cases, ongoing investigations, probation status, active performance improvement plans, and contractual obligations before approving separation.                                    |
| FR-SEP-008                            | Notification Cascade          | Upon POMD approval, system shall notify employee, manager, IT, Finance, Facilities, trigger Clearance Workflow, and trigger Exit Interview Workflow.                                                                          |
| <b>Release Date and Notice Period</b> |                               |                                                                                                                                                                                                                               |
| FR-SEP-009                            | Last Working Day Verification | The system shall automatically calculate the Last Working Day based on the approved notice period and resignation approval.<br>Authorized POMD personnel may modify the date only with a recorded justification and approval. |
| FR-SEP-010                            | Notice Period Validation      | System shall validate statutory, contractual, and policy notice period requirements.                                                                                                                                          |
| FR-SEP-011                            | Override Logic                | Early release shall require approval with mandatory justification.                                                                                                                                                            |
| FR-SEP-012                            | Handover Notes                | Manager shall record confirm handover status.                                                                                                                                                                                 |
| <b>Exit Interview</b>                 |                               |                                                                                                                                                                                                                               |
| FR-SEP -013                           | Exit Interview Deployment     | The system shall automatically assign the digital Exit Interview questionnaire immediately upon approval of the employee's resignation.                                                                                       |
| FR-SEP -014                           | Mandatory Completion          | The system shall require the employee to complete the Exit Interview before the separation process can be finalized, unless waived by authorized POMD personnel.                                                              |

|                                  |                                |                                                                                                                                                                                                                         |
|----------------------------------|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SEP -015                      | Save as Draft                  | The system shall allow employees to save the Exit Interview as a draft and complete it later before submission.                                                                                                         |
| FR-SEP -016                      | Confidentiality                | The system shall restrict access to Exit Interview responses to authorized POMD personnel. Responses shall not be accessible to the employee's immediate supervisor unless explicitly authorized.                       |
| FR-SEP -017                      | Anonymous Reporting            | The system shall support aggregated and anonymized reporting for management dashboards while protecting individual employee identities.                                                                                 |
| FR-SEP -018                      | Analytics                      | The system shall generate dashboards and reports summarizing exit reasons, satisfaction ratings, turnover trends, retention drivers, and recommendations by business unit, position, branch, district, and time period. |
| <b>Digital Clearance Process</b> |                                |                                                                                                                                                                                                                         |
| FR-SEP-019                       | Automated Clearance Initiation | Upon approval of the separation request, the ERP shall automatically initiate a digital clearance workflow without requiring the employee to physically visit departments for signatures or approvals.                  |
| FR-SEP-020                       | Dynamic Clearance Checklist    | The system shall automatically generate a clearance checklist based on the employee's position, work unit, access rights, loans, guarantees, RSSA, and other applicable obligations.                                    |
| FR-SEP-021                       | Automatic Task Assignment      | Clearance tasks shall automatically be assigned electronically to all relevant work units according to configurable workflow rules and delegation of authority.                                                         |
| FR-SEP-022                       | Parallel Clearance Processing  | All clearance tasks shall be processed simultaneously by responsible departments to minimize clearance turnaround time.                                                                                                 |
| FR-SEP-023                       | Department-Specific Workflow   | Each department shall access only the clearance tasks and employee information relevant to its responsibilities while maintaining confidentiality.                                                                      |
| FR-SEP-024                       | System Integration Validation  | The ERP shall automatically validate outstanding liabilities and assigned resources by integrating with CBS, Payroll, RSSA and other applicable systems.                                                                |
| FR-SEP-025                       | Electronic Approval            | Authorized officers shall electronically approve or reject clearance requests, record comments, upload supporting documents, and specify corrective actions where applicable.                                           |
| FR-SEP-026                       | Employee Self-Service Tracking | Employees shall be able to monitor the real-time status of their clearance process through the Employee Self-                                                                                                           |

|                                       |                                          |                                                                                                                                                                                                                                   |
|---------------------------------------|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                       |                                          | Service portal, including pending approvals, rejected items, outstanding obligations, and expected completion dates.                                                                                                              |
| FR-SEP-027                            | Automated Notifications and Escalation   | The system shall send automatic notifications, reminders, and escalations for overdue clearance tasks based on configurable SDT.                                                                                                  |
| FR-SEP-028                            | Clearance Dashboard                      | POMD shall have real-time dashboards displaying clearance progress, pending actions, aging analysis, responsible work units, and bottlenecks.                                                                                     |
| FR-SEP-029                            | Clearance Gatekeeping                    | The system shall prevent generation of the Certificate of Release and initiation of separation payment processing until all mandatory clearance requirements have been completed or appropriately waived by authorized officials. |
| <b>Certificate of Release</b>         |                                          |                                                                                                                                                                                                                                   |
| FR-SEP-020                            | Auto-Generation                          | Upon completion of clearance, system shall auto-generate standardized Certificate of Release (PDF).                                                                                                                               |
| FR-SEP-021                            | Data Population                          | Document shall dynamically populate Employee Full Name, ID, Separation Type, Service Period, Last Working Day, Approval History Summary.                                                                                          |
| <b>Separation Payment Calculation</b> |                                          |                                                                                                                                                                                                                                   |
| FR-SEP-023                            | Automatic Separation Benefit Calculation | System shall automatically calculate accrued leave pay, unpaid salary, severance pay, provident fund, and all other applicable benefits.                                                                                          |
| FR-SEP-024                            | Payment Eligibility Rules                | System shall determine payment eligibility based on separation reason, service period, employment type, disciplinary status, collective agreements, and labor law.                                                                |
| FR-SEP-025                            | PF Eligibility Check                     | System shall validate Provident Fund eligibility according to policy. Minimum of 2 years' service.                                                                                                                                |
| FR-SEP-026                            | Settlement Authorization                 | System shall require employee authorization captured during resignation submission before offsetting separation payments against outstanding liabilities.                                                                         |
| FR-SEP-027                            | CBS Integration                          | Final approved separation payments shall be automatically transmitted from ERP to the Core Banking System (CBS) for payment processing without manual intervention.                                                               |
| FR-SEP-028                            | Payment Breakdown Statement              | System shall generate a detailed settlement statement showing gross entitlement, deductions, liabilities settled, taxes, and net payable amount.                                                                                  |

| Case Closure |                          |                                                                                                                                                                                              |
|--------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SEP-029   | Verification Check       | POMD shall verify completion of clearance, payment processing, statutory reporting, document issuance, and exit interview before closing the case.                                           |
| FR-SEP-030   | System Access Revocation | ERP shall trigger automatic revocation of CBS, Email, ERP, VPN, Active Directory, biometric attendance, and all integrated system access.                                                    |
| FR-SEP-031   | Archiving                | Complete separation case shall be archived for audit, legal, and regulatory purposes.                                                                                                        |
| FR-SEP-032   | Audit Trail              | System shall maintain a complete audit trail of every approval, rejection, modification, payment calculation, settlement, and system integration activity throughout the separation process. |
| FR-SEP-033   | Reporting                | System shall generate reports required for internal and external auditors, and concerned work units.                                                                                         |

## 15. Module 8: Payroll Processing and Compensation Management System

### 15.1 Introduction

The Payroll Processing and Compensation Management System shall ensure accurate, transparent, consistent, and compliant payroll processing across all employee lifecycle events. The system shall handle complex scenarios such as mid-month changes, location-based benefits, role changes, disciplinary deductions, and temporary assignments without manual intervention.

### 15.2 Purpose

The purpose of the Payroll Module shall be to provide accurate and compliant payroll calculations across all scenarios, enforce automated proration logic, maintain a single source of truth, and provide comprehensive audit trails. The system shall reduce dependency on offline spreadsheets and manual adjustments.

### 15.3 Business Rules

The Payroll Module shall operate under the following business rules:

- **Effective Date Driven:** Every payroll-related change shall be applied strictly based on Approved Effective Date.

- **Automatic Proration:** When change occurs within payroll period, system shall split calculation and compute earnings proportionally.
- **Single Source of Truth:** All payroll input shall originate exclusively from Approved HR Actions.
- **Audit Trail:** Every change shall be recorded with Timestamp, Initiator ID, Approver ID, Previous Value, New Value.
- **Regulatory Compliance:** All calculations shall comply with tax laws and pension regulations.
- **Acting Allowance:** Month 1 (No payment), Month 2-6 (Pay allowance), Month 7+ (Stop payment).
- **Cut-Off Enforcement:** No modification after Payroll Cut-Off Date; Override requires formal audited workflow.

#### 15.4 Functional Requirements

| FR ID                                       | Requirement                   | Description                                                                                              |
|---------------------------------------------|-------------------------------|----------------------------------------------------------------------------------------------------------|
| <b>Core Principles</b>                      |                               |                                                                                                          |
| FR-PAY-001                                  | Effective Date Processing     | System shall apply every payroll-related change strictly based on Approved Effective Date.               |
| FR-PAY-002                                  | Automatic Proration           | System shall automatically split payroll calculation and compute earnings and deductions proportionally. |
| FR-PAY-003                                  | Single Source of Truth        | All payroll input data shall originate exclusively from Approved HR Actions.                             |
| FR-PAY-004                                  | Audit Trail                   | Every change shall be recorded with Timestamp, Initiator ID, Approver ID, Previous Value, New Value.     |
| <b>Transfer-Related Payroll Adjustments</b> |                               |                                                                                                          |
| FR-PAY-005                                  | Effective Date Capture        | System shall capture and enforce exact Transfer Effective Date.                                          |
| FR-PAY-006                                  | Period Segmentation           | System shall divide payroll period into Pre-Transfer and Post-Transfer segments.                         |
| FR-PAY-007                                  | Hardship Allowance Adjustment | System shall automatically identify applicable Hardship Allowance Rate based on Location Code.           |
| FR-PAY-008                                  | Hardship Proration            | System shall prorate Hardship Allowance based on Number of Days in each location.                        |

|                                    |                                   |                                                                                                                                    |
|------------------------------------|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| FR-PAY-009                         | Hardship Allowance Audit History  | System shall maintain complete history of hardship allowance eligibility, rates, changes, and effective dates.                     |
| FR-PAY-010                         | Statutory Deduction Recalculation | System shall recalculate Tax and Pension based on Adjusted Total Gross Earnings.                                                   |
| FR-PAY-011                         | Tax Exemption Validation          | System shall automatically revalidate eligibility upon transfer to new location.                                                   |
| <b>Mid-Month Joiner Processing</b> |                                   |                                                                                                                                    |
| FR-PAY-012                         | Proration Rules                   | System shall calculate Base Salary and Allowances for Actual Number of Days Worked.                                                |
| FR-PAY-013                         | Deduction Calculation             | System shall calculate Income Tax based on Prorated Gross Earnings.                                                                |
| FR-PAY-014                         | Pension Contribution              | System shall calculate Pension Contributions proportionally based on prorated earnings.                                            |
| <b>Promotion Management</b>        |                                   |                                                                                                                                    |
| FR-PAY-015                         | Salary and Benefit Update         | Upon promotion approval, system shall automatically update Salary, Grade, and Related Benefits.                                    |
| FR-PAY-016                         | Comparison View                   | System shall display comparison of Previous and New Salary and Benefits.                                                           |
| FR-PAY-017                         | Mid-Month Proration               | System shall calculate earnings using Old Salary Structure for days before effective date and New Salary Structure for days after. |
| FR-PAY-018                         | Promotion History                 | System shall maintain complete Promotion History Record.                                                                           |
| <b>Demotion Management</b>         |                                   |                                                                                                                                    |
| FR-PAY-019                         | Benefit Reduction                 | System shall automatically reduce Benefits and Related Allowances based on new grade.                                              |
| FR-PAY-020                         | Mid-Period Proration              | System shall apply mid-period proration logic for demotions during active payroll cycle.                                           |
| FR-PAY-021                         | Deduction Recalculation           | System shall recalculate Tax and Pension based on reduced earnings schedule.                                                       |

|                                         |                               |                                                                                                                                                            |
|-----------------------------------------|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-PAY-022                              | Demotion Record               | System shall maintain immutable Demotion Record for audit purposes.                                                                                        |
| <b>Discipline and Penalty Deduction</b> |                               |                                                                                                                                                            |
| FR-PAY-023                              | Automated Penalty Application | System shall support Automated Deduction of Penalties from payroll.                                                                                        |
| FR-PAY-024                              | Penalty Configuration         | System shall support configurable parameters: Violation Type, Calculation Method, Effective Date, Approval Status.                                         |
| FR-PAY-025                              | Tax Treatment                 | System shall apply correct Tax Treatment Logic based on bank policy.                                                                                       |
| <b>Acting Allowance Management</b>      |                               |                                                                                                                                                            |
| FR-PAY-026                              | Eligibility Restriction       | System shall restrict Acting Allowance to employees formally assigned to Managerial Role in Acting Capacity.                                               |
| FR-PAY-027                              | Duration Tracking             | System shall automatically track Duration of acting assignment.                                                                                            |
| FR-PAY-028                              | Payment Schedule              | System shall enforce: Month 1 (No payment), Month 2-6 (Pay allowance), Month 7+ (Stop payment).                                                            |
| <b>Cross-Cutting Controls</b>           |                               |                                                                                                                                                            |
| FR-PAY-029                              | Retroactive Adjustments       | System shall support Backdated Changes and automatically calculate Arrears and Recoveries.                                                                 |
| FR-PAY-030                              | Cut-Off Enforcement           | System shall prevent modification of payroll data after Payroll Cut-Off Date.                                                                              |
| FR-PAY-031                              | Exception Handling            | Post-cut-off changes shall require formal audited Override Workflow.                                                                                       |
| FR-PAY-032                              | Multi-Tier Approval           | System shall enforce: Initiation (HR Accountant) → Verification (Senior Payroll Controller) → Final Approval (People Service and Reward Division Manager). |
| FR-PAY-033                              | Conflict Resolution           | System shall include predefined Priority Matrix for concurrent events.                                                                                     |
| FR-PAY-034                              | Payroll Simulation            | System shall provide Payroll Simulation feature to preview financial impact.                                                                               |

|            |                               |                                                                                                                                                                                                          |
|------------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-PAY-035 | Payroll Change Log            | System shall generate a detailed change log for all payroll-affecting transactions including transfers, promotions, demotions, acting assignments, disciplinary deductions, and retroactive adjustments. |
| FR-PAY-036 | Payroll Exception Report      | System shall generate an exception report identifying employees with unusual payroll variances, missing master data, unresolved deductions, or pending approval actions before payroll finalization.     |
| FR-PAY-037 | Bonus and Increment Proration | System shall calculate prorated bonus and salary increment amounts when the effective date occurs during an active payroll period                                                                        |

## **16. Module 9: Discipline Management System**

### **16.1 Introduction**

The Discipline Management Module shall provide a controlled, transparent, and auditable system to manage employee misconduct. The system shall enforce disciplinary actions in compliance with the bank's HR policies, regulatory requirements, and collective agreements. The module shall ensure consistency, accountability, and traceability across all disciplinary processes.

### **16.2 Purpose**

The purpose of the Discipline Management Module shall be to ensure consistent and fair enforcement of disciplinary actions, maintain complete auditable records of all disciplinary cases, automate payroll deductions for penalties, and provide reporting on discipline trends and financial impact.

### **16.3 Business Rules**

The Discipline Management Module shall operate under the following business rules:

- **Offense Levels:** Level 1 (Critical - Dismissal), Level 2 (Very High - Final written warning + 20% penalty), Level 3 (High - Second written warning + 10% penalty), Level 4 (Moderate - First written warning + 5% penalty), Level 5 (Minor - Recorded verbal warning).
- **Suspension:** Maximum 30 Working Days; With Pay or Without Pay.
- **Appeal Window:** 10 Calendar Days from receiving decision notice.
- **Segregation of Duties:** Initiator ≠ Approver ≠ Reviewer.
- **Policy Compliance:** System shall validate that proposed actions align with policy before execution.

#### 16.4 Functional Requirements

| FR ID                            | Requirement             | Description                                                                                                                                                                                                                                                                                                            |
|----------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Offense Classification</b>    |                         |                                                                                                                                                                                                                                                                                                                        |
| FR-DIS-001                       | Offense Configuration   | System shall allow authorized HR to define, configure, and maintain offense categories and levels. <ul style="list-style-type: none"> <li>• Once the authorized HR Officer notifies the committee, the record locks. If the committee provides feedback, the HR Officer is notified, and access is unlocked</li> </ul> |
| FR-DIS-002                       | Offense Attributes      | System shall map each offense type to Severity Level, Description, Applicable Punishment, Required Approval Authority.                                                                                                                                                                                                 |
| FR-DIS-003                       | Standard Offense Levels | System shall enforce: Level 1 (Dismissal), Level 2 (Final written warning + 20%), Level 3 (Second written warning + 10%), Level 4 (First written warning + 5%), Level 5 (Recorded verbal warning).                                                                                                                     |

| FR-DIS-039                       | Revocation Authority                | System shall allow revocation only by authorized HR or senior management.                                                                                                                                                                                                                                                                                                                                                                                             |
| FR-DIS-040                       | Justification Requirement           | System shall require mandatory justification and formal approval workflow for revocation.                                                                                                                                                                                                                                                                                                                                                                             |
| FR-DIS-041                       | Original Record Preservation        | System shall preserve original disciplinary record as non-deletable.                                                                                                                                                                                                                                                                                                                                                                                                  |

## 17. Module 10: Employee Self-Service (ESS) - Request Management

### 17.1 Introduction

The Employee Self-Service Module shall provide a user-friendly, self-service interface for employees to submit, track, and manage various requests. The module shall address current gaps including lack of submission confirmation, absence of request tracking, and incomplete form submissions.

### 17.2 Purpose

The purpose of the ESS Module shall be to improve employee experience through transparent request management, provide real-time confirmation and status tracking, enforce data completeness through validation controls, and reduce HR follow-up inquiries.

### 17.3 Business Rules

The ESS Module shall operate under the following business rules:

- **Real-Time Confirmation:** Employees shall receive immediate confirmation upon request submission.
- **Request Tracking:** All submitted requests shall be visible in "My Requests" dashboard.
- **Mandatory Field Enforcement:** Guarantee Letter requests shall require all critical fields before submission.
- **Save as Draft:** Incomplete requests may be saved as draft and completed later.
- **Status Visibility:** Employees shall see Current Status, Last Updated Date, and Approver Comments.
- **Notification Channels:** Email, SMS, and In-System notifications shall be supported.

### 17.4 Functional Requirements - ESS

| FR ID                           | Requirement | Description |
|---------------------------------|-------------|-------------|
| Request Submission Notification |             |             |

|                                            |                            |                                                                                                                                        |
|--------------------------------------------|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| FR-ESS-001                                 | Submission Confirmation    | System shall generate and deliver real-time confirmation notification immediately after successful submission.                         |
| FR-ESS-002                                 | On-Screen Message          | System shall display confirmation message: "Your request has been successfully submitted and is under review."                         |
| FR-ESS-003                                 | Notification Channels      | System shall send notification through System notification, Email, or SMS.                                                             |
| FR-ESS-004                                 | Notification Content       | Notification shall include Request Type, Submission Date, Reference Number, and direct link to view details.                           |
| FR-ESS-005                                 | Request Tracking Dashboard | System shall provide "My Requests" dashboard accessible from ESS homepage.                                                             |
| FR-ESS-006                                 | Dashboard Columns          | Dashboard shall display Request Type, Submission Date, Last Updated Date, Current Status, Approver Comments.                           |
| FR-ESS-007                                 | Filtering and Sorting      | System shall allow filtering and sorting by status, date, or request type.                                                             |
| FR-ESS-008                                 | Detail View                | System shall allow clicking on any request to view full details and approval workflow position.                                        |
| FR-ESS-009                                 | Failure Handling           | If submission fails, system shall provide clear error message with Reason for Failure and Required Corrective Action.                  |
| FR-ESS-010                                 | Data Preservation          | System shall preserve all entered data when submission failure occurs.                                                                 |
| <b>Guarantee Letter Request Validation</b> |                            |                                                                                                                                        |
| FR-ESS-011                                 | Mandatory Field Definition | System shall designate: Name of External Person, Name of Organization, Organization Address, Organization Email/P.O. Box as mandatory. |
| FR-ESS-012                                 | Configuration Ability      | System shall allow HR to add or modify mandatory fields through configuration settings.                                                |
| FR-ESS-013                                 | Pre-Submission Validation  | System shall perform client-side validation when employee clicks Submit.                                                               |

|                                |                              |                                                                                                                                  |
|--------------------------------|------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| FR-ESS-014                     | Form Prevention              | If mandatory field is missing, system shall prevent form submission.                                                             |
| FR-ESS-015                     | Validation Message           | System shall display: "Please complete all required fields in the Guarantee Information section before submitting your request." |
| FR-ESS-016                     | Email Validation             | System shall validate that entered email follows proper email format.                                                            |
| FR-ESS-017                     | Address Validation           | System shall enforce configurable minimum character length for address field.                                                    |
| FR-ESS-018                     | Special Character Prevention | System shall prevent submission of entries containing only spaces or special characters.                                         |
| FR-ESS-019                     | Visual Indicators            | All mandatory fields shall be marked with visible Asterisk (*).                                                                  |
| FR-ESS-020                     | Field Highlighting           | System shall provide red border around missing or invalid fields after validation attempt.                                       |
| FR-ESS-021                     | Save as Draft                | System shall allow employees to save incomplete request as Draft.                                                                |
| FR-ESS-022                     | Draft Access                 | Draft requests shall be accessible from "My Requests" dashboard with Draft status indicator.                                     |
| <b>Additional Enhancements</b> |                              |                                                                                                                                  |
| FR-ESS-023                     | Audit Trail                  | System shall track all actions with Timestamp, User ID, Action Type, Before and After Values.                                    |
| FR-ESS-024                     | Reminder Notifications       | System shall send automated reminders to approvers for requests pending beyond configurable threshold.                           |
| FR-ESS-025                     | Progress Notifications       | Employees shall receive notification when request progresses to next approval stage.                                             |
| FR-ESS-026                     | Attachment Requirement       | System shall allow and require upload of supporting documents for specific request types.                                        |

### 17.5 Functional Requirements - Career Pathing Navigation

The Career Planning and Development Module shall provide employees with a transparent, self-service tool to explore potential career paths within the organization. The tool shall enable

employees to visualize job progressions, understand the competencies and skills required for future roles, and align their personal development goals with organizational needs.

### Objectives:

- Empower employees to own their career development through self-directed exploration.
- Visualize potential career paths and job progressions.
- Identify skill and competency gaps for target roles.
- Support succession planning by creating a visible talent pipeline.
- Integrate with the Learning Management System (LMS) to create a cohesive development ecosystem.

### Business Rules:

- **Career Paths:** HR Administrators shall be responsible for defining and maintaining default career paths and job progression ladders for all job codes.
- **Visibility:** Employees shall have view-only access to career paths and the required competencies for roles they are not currently in.
- **Gap Analysis:** The system shall automatically compare an employee's current skills and performance data against the requirements for a selected target role.
- **Integration:** The module shall integrate seamlessly with Employee Master Data, Employee Self-Service (ESS), and Learning Management Systems.

| FR ID      | Requirement               | Description                                                                                                                                                                                                                                                                    |
|------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-CAR-001 | Career Path Visualization | The system shall provide a visual and hierarchical career path interface that enables employees to view their current position, career progression paths, feeder roles, successor roles, lateral career opportunities, and potential future positions within the organization. |
| FR-CAR-002 | Career Path Navigation    | The system shall support multiple career exploration modes, including Guided Mode for system-recommended career                                                                                                                                                                |

|            |                                    |                                                                                                                                                                                                                                                                                                                                                |
|------------|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                    | progression, Explorer Mode for browsing the organizational career framework by Job Category, Job Family, and Job Role, and Focused Mode for direct role search and career planning.                                                                                                                                                            |
| FR-CAR-003 | Role Profile Display               | The system shall display comprehensive information for each job role, including job description, required competencies, technical and behavioral skills, qualifications, certifications, experience requirements, grade, and organizational placement.                                                                                         |
| FR-CAR-004 | Competency Gap Analysis            | The system shall automatically compare an employee's current competency profile with the competency requirements of a selected target role and identify competency, skill, qualification, certification, and experience gaps requiring development.                                                                                            |
| FR-CAR-005 | Career Development Recommendations | The system shall provide intelligent career development recommendations based on the employee's competency profile, performance history, career aspirations, organizational career framework, and identified competency gaps, including recommended learning programs, certifications, development activities, mentoring, and job experiences. |
| FR-CAR-006 | Employee Self-Service Integration  | The system shall integrate Career Planning with the Employee Self-Service (ESS) Module, enabling employees to access career paths, perform career assessments, explore target roles, review competency gaps, and monitor career development plans through the ESS portal.                                                                      |
| FR-CAR-007 | Individual Career Development Plan | The system shall enable employees and supervisors to create, review, approve, and maintain Individual Career Development Plans (ICDPs) aligned with organizational career pathways and employee career goals.                                                                                                                                  |
| FR-CAR-008 | Development Progress Tracking      | The system shall track employee progress against approved Career Development Plans, including completed learning activities, competency improvements, certifications, mentoring activities, and remaining development actions.                                                                                                                 |
| FR-CAR-009 | Learning Management Integration    | The system shall integrate with the Learning and Development Module to automatically recommend and enroll employees in learning programs that address identified competency gaps.                                                                                                                                                              |

|            |                                      |                                                                                                                                                                                                              |
|------------|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-CAR-010 | Successor<br>Readiness<br>Assessment | The system shall assess employee readiness for target positions based on competency attainment, required qualifications, experience, performance results, and completion of required development activities. |
|------------|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 17.6 Functional Requirements - Insurance Notification

### Business Objective

To provide employees with a standardized and paperless process for reporting insurance incidents through the Employee Self-Service (ESS) portal, ensuring timely notification, accurate data capture, efficient review by the People Operation Management Directorate (POMD), and compliance with the Bank's insurance policy.

### Business Rule

Employees shall notify the Bank of an insurance incident by submitting an insurance request through the Employee Self-Service (ESS) portal **within 30 working days from the date of the accident**. Requests submitted after the 30-working-day notification period shall require a mandatory justification and shall be subject to review and approval by the People Operation Management Directorate (POMD) in accordance with the Bank's insurance policy.

| FR ID      | Business Requirement              | Description                                                                                                                                                                                                                                                                                              |
|------------|-----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-INS-001 | Insurance Notification Submission | The system shall allow employees to submit an insurance notification through the Employee Self-Service (ESS) portal.                                                                                                                                                                                     |
| FR-INS-002 | Notification Period Validation    | The system shall validate that the insurance notification is submitted within <b>30 working days</b> from the accident date in accordance with the Bank's insurance policy.                                                                                                                              |
| FR-INS-003 | Mandatory Information             | The system shall require employees to complete all mandatory fields before submitting the notification, including Accident Date, Accident Time, Accident Place, Incident Description, Hospital/Health Facility Name, Type of Injury/Illness, Contact Number, and supporting documents, where applicable. |
| FR-INS-004 |                                   |                                                                                                                                                                                                                                                                                                          |

|            |                         |                                                                                                                                                                                                                                                          |
|------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            | Supporting Documents    | The system shall require employees to upload the necessary supporting documents based on the insurance notification type, such as a medical certificate, police report (if applicable), medical invoices, referral letter, or other supporting evidence. |
| FR-INS-005 | Request Validation      | The system shall validate that all mandatory information and required supporting documents have been provided before allowing the notification to be submitted.                                                                                          |
| FR-INS-006 | Workflow Routing        | Upon successful submission, the system shall automatically route the insurance notification to the People Operation Management Directorate (POMD) for review and processing.                                                                             |
| FR-INS-007 | Review and Decision     | The authorized POMD officer shall review the submitted insurance notification and approve, reject, or return it to the employee for correction. Comments shall be mandatory when rejecting or returning a notification.                                  |
| FR-INS-008 | Employee Notification   | The system shall notify the employee when the insurance notification is submitted and again when it is approved, rejected, returned for correction, or completed.                                                                                        |
| FR-INS-009 | Insurance Record Update | Upon approval by POMD, the system shall record the approved insurance notification and update the employee's insurance records, where applicable.                                                                                                        |
| FR-INS-010 | Audit Trail             | The system shall maintain a complete audit trail of all insurance notifications, including submission, review, approval, rejection, comments, user information, and timestamps.                                                                          |

## 18. Module 11: RESL Module – Revolving Staff Salary Advance (RSSA)

### 18.1 Purpose

The purpose of the ERP Revolving Staff Salary Advance (RSSA) Module is to automate the end-to-end management of Revolving Staff Salary Advance requests, approvals, guarantor management, monitoring, reporting, and compliance in accordance with the Bank's policies and procedures. The module shall eliminate manual request processing, improve operational efficiency, strengthen

internal controls, ensure compliance with Bank policies, and maintain a complete audit trail of all RSSA transactions.

## 18.2 Business Rules

| Validation                   | System Action                                                                                                                                                                                                                                                                                                                               |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Employment Status            | Must be Permanent                                                                                                                                                                                                                                                                                                                           |
| Employment Contract          | Must be Active                                                                                                                                                                                                                                                                                                                              |
| Minimum Service              | At least 3 months                                                                                                                                                                                                                                                                                                                           |
| Retirement Eligibility       | Employees who are 58 years of age or older (within two years of the mandatory retirement age) shall not be eligible to apply for a new RSSA loan or serve as a guarantor. In addition, employees aged 58 years or older who have an outstanding RSSA balance shall not be granted a new RSSA loan until the existing loan is fully settled. |
| Basic Salary                 | Used to calculate maximum loan amount                                                                                                                                                                                                                                                                                                       |
| Loan Ceiling                 | Maximum six months' basic salary                                                                                                                                                                                                                                                                                                            |
| Existing RSSA                | Validate outstanding balance                                                                                                                                                                                                                                                                                                                |
| Guarantor Salary             | Equal to or greater than borrower salary                                                                                                                                                                                                                                                                                                    |
| Guarantor Commitment         | Maximum two active guarantees                                                                                                                                                                                                                                                                                                               |
| Guarantor Contract           | Must be Active                                                                                                                                                                                                                                                                                                                              |
| Employee Disciplinary Status | Must be Eligible                                                                                                                                                                                                                                                                                                                            |

### 18.3 Functional Requirements

| FR ID       | Requirement                                                                                      | Functional Requirement                                                                                                                                     |
|-------------|--------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-RESL-001 | The ERP system shall provide an online RSSA application process.                                 | Employees shall submit RSSA requests electronically through the ERP RESL Module. Manual requests shall not be accepted.                                    |
| FR-RESL-002 | Only eligible employees shall be allowed to apply.                                               | The system shall automatically validate permanent employment status and minimum three months of continuous service before allowing submission.             |
| FR-RESL-003 | Employees under probation, contract employment, suspension, investigation shall not be eligible. | The system shall validate employee status from the Employee Module and automatically reject ineligible applicants.                                         |
| FR-RESL-004 | Employees nearing retirement shall not receive new RSSA loans if they have outstanding balances. | The system shall calculate the employee's remaining years before retirement using Date of Birth and block new applications when policy conditions are met. |
| FR-RESL-005 | Loan eligibility shall be based on the employee's current basic salary.                          | The system shall automatically calculate the maximum eligible loan amount as six months of the employee's current basic salary.                            |
| FR-RESL-006 | Every RSSA request shall have an eligible guarantor.                                             | The system shall require guarantor selection before request submission.                                                                                    |
| FR-RESL-007 | Guarantors shall meet Bank eligibility requirements.                                             | The system shall validate permanent employment status, active employment contract, and salary eligibility of the guarantor.                                |
| FR-RESL-008 | A guarantor shall support a maximum of two active RSSA borrowers.                                | The system shall count active guarantees and prevent additional guarantees exceeding the policy limit.                                                     |
| FR-RESL-009 | Borrower and guarantor contract status shall be verified automatically.                          | The ERP shall retrieve employment contract information from Employee Module and validate active status before approval.                                    |
| FR-RESL-010 | Ineligible requests shall not proceed.                                                           | The system shall automatically block submission and display the reason for rejection.                                                                      |

|             |                                                                              |                                                                                                                                                                                            |
|-------------|------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-RESL-011 | Guarantors shall approve or reject requests electronically.                  | The ERP shall notify guarantors through workflow and record their approval or rejection.                                                                                                   |
| FR-RESL-012 | Approval authority shall follow the Bank's organizational structure.         | The workflow shall automatically assign approvals to Branch Managers, District Directors, or the Compensation and Benefit Administration Division Manager based on employee work location. |
| FR-RESL-013 | Outstanding balances shall be recovered during employee separation.          | The ERP shall notify responsible HR staff and update loan status for settlement during employee clearance.                                                                                 |
| FR-RESL-014 | Guarantor replacement shall be mandatory when the guarantor leaves the Bank. | The system shall suspend further processing until a qualified replacement guarantor is approved.                                                                                           |
| FR-RESL-015 | All RSSA activities shall be traceable.                                      | The ERP shall maintain complete audit logs of requests, approvals, modifications, guarantor actions, and settlements.                                                                      |
| FR-RESL-016 | POMD shall monitor all RSSA activities.                                      | Authorized POMD users shall have organization-wide access to monitor requests, approvals, repayments, and guarantor status.                                                                |
| FR-RESL-017 | Management reports shall be available.                                       | The system shall generate reports on active loans, repayments, overdue cases, guarantor commitments, rejected requests, and monthly RSSA statistics.                                       |
| FR-RESL-018 | Excel export shall be supported.                                             | Users with appropriate authorization shall export reports into Microsoft Excel for reconciliation, audit, and management reporting.                                                        |
| FR-RESL-019 | The ERP shall integrate with other HR modules.                               | <p>The module shall retrieve employee information automatically from Employee Module.</p> <p>Disbursement on Core Banking shall follow the approval of process on ERP.</p>                 |

## 19. Module 12: Competency Management System

### 19.1 Introduction

The Competency Management System shall provide a comprehensive, integrated platform for defining, assessing, managing, and developing employee competencies across the organization. The module shall operationalize the Bank's Integrated Competency Framework, which comprises 469 competencies organized across three pillars: Core Competencies (5), Leadership Competencies (6), and Technical Competencies (458). The system shall support the full competency lifecycle including framework administration, baseline assessment, gap analysis, individual development planning, and integration with recruitment, performance management, career planning, and succession management.

### 19.2 Purpose

The purpose of the Competency Management Module shall be to provide a unified, automated platform that operationalizes the Bank's competency framework across all people processes. It shall enable consistent competency-based assessments, identify capability gaps, support targeted development through Individual Development Plans (IDPs), inform recruitment and promotion decisions, strengthen succession planning, and provide workforce capability insights for strategic decision-making.

### 19.3 Business Rules

The Competency Management Module shall operate under the following business rules:

- **Framework Governance:** The People Solutions Directorate shall be responsible for governing and periodically reviewing the competency framework to ensure alignment with the Bank's strategic objectives.
- **Universal Application:** The Competency Framework shall apply to all employees of Bunna Bank across all job grades, functions, and locations, including Head Office directorates, district offices, and all branch operations.
- **Competency Classification:** All competencies shall be classified into three pillars:

- **Core Competencies (5):** Applied universally across all roles and levels (Execution Mastery, Professional Authenticity, Ethical Influence, Collaboration, Creativity).
- **Leadership Competencies (6):** Applied to all managerial and leadership positions (Strategy Management, Continuous Improvement, Prudential Decision Making, Self-Leadership, People Leadership, Ambidextrous Leadership).
- **Technical Competencies (458):** Organized by functional domain and mapped to specific job families and positions.
- **Proficiency Level Progression:** Every competency shall be defined at four proficiency levels, representing progression from foundational capability to mastery:
  - Level 1 - Basic: Foundational understanding, applies with guidance.
  - Level 2 - Intermediate: Solid working knowledge, applies independently.
  - Level 3 - Advanced: Deep expertise, serves as go-to resource.
  - Level 4 - Expert: Mastery and thought leadership, shapes organizational direction.
- **Role-Required Proficiency:** Each position shall have defined required proficiency levels for all applicable competencies, established through job profiling and approved by POMD.
- **Baseline Assessment Requirement:** All employees are required to undergo competency baseline assessment as per the scheduled timeline to be eligible for promotions or new assignments.
- **New Role Assignment Rules:**
  - Employees assigned to a new role after baseline assessment without undergoing assessment shall:
    - Own and understand the competencies associated with the new role.
    - Conduct a discussion session with their immediate supervisor.
    - Perform a baseline self-assessment based on the competencies of the assigned position.
    - Develop an Individual Development Plan (IDP) to address identified gaps.
    - Undergo a supervisor-led baseline assessment within three (3) months of assignment.
- **Competitive Assessment Requirement:** Employees assigned through a competitive process or formal assessment shall:

- Achieve a score of at least 50% and demonstrate the required level of competency through observable behaviors.
- Employees scoring below 50% shall be considered as not meeting the competency requirements.
- **Individual Development Plan (IDP) Mandate:** IDPs shall be mandatory for employees who do not meet required competency levels and shall be regularly monitored for progress.
- **Assessment Schedule:** Competency assessments shall be conducted at defined intervals as determined by the Bank.
- **Appeal Process:** Any appeal or dispute regarding competency assessment results shall follow a formal review process established by the Bank.
- **Confidentiality:** Confidentiality of employee assessment results shall be maintained, and access shall be restricted to authorized personnel only.
- **Integration Mandate:** The competency framework shall be integrated with other people operations and development processes, including performance management, talent management, recruitment, career planning, and succession planning.
- **Training Alignment:** Training and development programs shall be aligned with identified competency gaps and prioritized based on organizational needs.
- **Non-Compliance Consequence:** Compliance with the competency framework shall be mandatory, and failure to adhere may affect eligibility for promotion, transfer, or other career opportunities.
- **Recruitment Eligibility:** Employees must demonstrate the required level of competency through observable behaviors assessed during the evaluation process to be eligible for promotion or new assignments.

## 19.4 Functional Requirements

| FR ID                           | Requirement                     | Description                                                                                                                                                                                                                       |
|---------------------------------|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Framework Administration</b> |                                 |                                                                                                                                                                                                                                   |
| FR-COM-001                      | Competency Framework Management | The system shall allow authorized HR Administrators to define, configure, and maintain the competency framework, including competency definitions, behavioral indicators, proficiency levels, and assessment criteria.            |
| FR-COM-002                      | Competency Pillar Management    | The system shall support the classification of competencies into three pillars: Core Competencies, Leadership Competencies, and Technical Competencies.                                                                           |
| FR-COM-003                      | Competency Definition           | The system shall allow the creation and maintenance of competency records including: Competency Name, Definition, Pillar Classification, Behavioral Indicators for each proficiency level, and Applicable Job Families/Functions. |
| FR-COM-004                      | Proficiency Level Configuration | The system shall support four proficiency levels (Basic, Intermediate, Advanced, Expert) with configurable definitions and behavioral indicators for each level.                                                                  |
| FR-COM-005                      | Role-Competency Mapping         | The system shall allow authorized users to map competencies to specific job roles, positions, and job families, with defined required proficiency levels for each competency.                                                     |
| FR-COM-006                      | Competency Version Control      | The system shall maintain version control for all competency framework changes, recording the                                                                                                                                     |

|                                         |                               |                                                                                                                                                                                                      |
|-----------------------------------------|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                         |                               | effective date, change description, and user responsible for the change.                                                                                                                             |
| FR-COM-007                              | Framework Publication         | The system shall make the approved competency framework accessible to all employees through the ESS portal, including competency definitions, behavioral indicators, and role-specific requirements. |
| FR-COM-008                              | Competency Review Schedule    | The system shall allow HR Administrators to define and manage the competency framework review schedule, including periodic review cycles and approval workflows.                                     |
| <b>Competency Assessment Management</b> |                               |                                                                                                                                                                                                      |
| FR-COM-009                              | Assessment Cycle Creation     | The system shall allow HR Administrators to create and manage competency assessment cycles, including cycle name, assessment period, participating employee groups, and assessment deadlines.        |
| FR-COM-010                              | Employee Self-Assessment      | The system shall allow employees to complete a self-assessment rating for each competency applicable to their role, with the ability to provide supporting evidence and behavioral examples.         |
| FR-COM-011                              | Supervisor Assessment         | The system shall allow supervisors to assess employees against all competencies applicable to their role, using observable, documented evidence and behavioral examples.                             |
| FR-COM-012                              | Multi-Rater Assessment (360°) | The system shall support multi-rater assessments, allowing feedback from peers, subordinates, and                                                                                                    |

|            |                               |                                                                                                                                                                                   |
|------------|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                               | other stakeholders where applicable and appropriate.                                                                                                                              |
| FR-COM-013 | Rating Scale Management       | The system shall support a standardized four-point rating scale (Basic, Intermediate, Advanced, Expert) with clear behavioral anchors for each level.                             |
| FR-COM-014 | Evidence Attachment           | The system shall allow assessors to attach supporting evidence (documents, performance records, project outcomes, observation notes) to substantiate competency ratings.          |
| FR-COM-015 | Assessment Comment Management | The system shall allow assessors to add qualitative comments and specific behavioral examples for each competency rating.                                                         |
| FR-COM-016 | Gap Identification            | The system shall automatically calculate the gap between the current proficiency level and the required proficiency level for each competency.                                    |
| FR-COM-017 | Assessment Workflow Routing   | The system shall route competency assessments through defined approval workflows, including supervisor review, HR verification, and final approval.                               |
| FR-COM-018 | Assessment Locking            | The system shall automatically lock assessments upon completion, preventing unauthorized modifications while maintaining the ability for authorized overrides with justification. |
| FR-COM-019 | Assessment History            | The system shall maintain complete historical records of all competency assessments, including previous ratings, assessor comments, and supporting evidence.                      |

|                                                     |                                 |                                                                                                                                                                                                                           |
|-----------------------------------------------------|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Individual Development Plan (IDP) Management</b> |                                 |                                                                                                                                                                                                                           |
| FR-COM-020                                          | IDP Creation                    | The system shall allow employees and supervisors to create Individual Development Plans based on competency assessment results and identified gaps.                                                                       |
| FR-COM-021                                          | Development Goal Setting        | The system shall allow employees to set specific, measurable development goals linked to identified competency gaps, with target dates and success criteria.                                                              |
| FR-COM-022                                          | Development Activity Management | The system shall support the creation and tracking of development activities including: Training Programs, Coaching/Mentoring, Job Shadowing, Stretch Assignments, On-the-Job Learning, Self-Study, and Formal Education. |
| FR-COM-023                                          | Learning Resource Integration   | The system shall integrate with the Learning Management System to recommend and enroll employees in training programs aligned with their competency gaps.                                                                 |
| FR-COM-024                                          | IDP Progress Tracking           | The system shall allow employees, supervisors and People Performance & Development Directorate Administrators to track progress against IDP goals, update completion status, and document learning outcomes.              |
| FR-COM-025                                          | IDP Review Checkpoints          | The system shall allow scheduling and tracking of periodic IDP review checkpoints between employees and supervisors.                                                                                                      |

|                                           |                                    |                                                                                                                                                                                       |
|-------------------------------------------|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-COM-026                                | IDP Approval                       | The system shall route IDPs through supervisor approval workflows, ensuring alignment between development activities and organizational needs.                                        |
| FR-COM-027                                | Mandatory IDP Enforcement          | The system shall require the creation and approval of an IDP for employees who do not meet required competency levels, with escalation notifications for non-compliance.              |
| FR-COM-028                                | IDP Audit Trail                    | The system shall maintain a complete audit trail of all IDP changes, goal completions, and review activities.                                                                         |
| <b>Integration with Core HR Processes</b> |                                    |                                                                                                                                                                                       |
| FR-COM-029                                | Recruitment Integration            | The system shall provide competency requirements to the Recruitment Module for vacancy definition, candidate screening, and assessment.                                               |
| FR-COM-030                                | Performance Management Integration | The system shall provide competency assessment data to the Performance Management Module for performance evaluation calibration and development planning.                             |
| FR-COM-031                                | Career Planning Integration        | The system shall provide competency data to the Career Planning Module, enabling employees to view competency requirements for target roles and identify gaps for career progression. |
| FR-COM-032                                | Succession Planning Integration    | The system shall provide competency readiness data to the Succession Planning Module, enabling identification of successors ready for critical roles.                                 |

|                                |                                      |                                                                                                                                                                                                |
|--------------------------------|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-COM-033                     | Promotion Eligibility Integration    | The system shall automatically verify competency requirements as part of promotion eligibility validation, ensuring employees meet required proficiency levels before promotion consideration. |
| FR-COM-034                     | Workforce Planning Integration       | The system shall provide aggregated competency data to the Workforce Planning Module for capability gap analysis and workforce planning decisions.                                             |
| FR-COM-035                     | Training Needs Analysis Integration  | The system shall provide competency gap data to the Learning and Development function for training needs analysis and program prioritization.                                                  |
| <b>Reporting and Analytics</b> |                                      |                                                                                                                                                                                                |
| FR-COM-036                     | Competency Gap Analysis Report       | The system shall generate reports showing competency gaps at individual, team, department, and enterprise levels.                                                                              |
| FR-COM-037                     | Organizational Capability Dashboard  | The system shall provide a dashboard showing organizational capability heat maps, competency coverage, and critical skill availability.                                                        |
| FR-COM-038                     | Individual Competency Profile Report | The system shall generate individual competency profile reports showing current ratings, required levels, gaps, and development progress.                                                      |
| FR-COM-039                     | Team Competency Summary Report       | The system shall generate team-level competency summaries showing aggregate ratings, capability strengths, and development priorities.                                                         |
| FR-COM-040                     | Assessment Completion Report         | The system shall generate reports tracking assessment completion rates and status across departments and employee groups.                                                                      |

|                                 |                                       |                                                                                                                                                 |
|---------------------------------|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-COM-041                      | IDP Progress Report                   | The system shall generate reports on IDP progress, completion rates, and development outcomes.                                                  |
| FR-COM-042                      | Proficiency Level Distribution Report | The system shall generate reports showing the distribution of employees across proficiency levels for each competency.                          |
| FR-COM-043                      | Competency Gap Trend Report           | The system shall generate trend reports showing competency gap changes over time, indicating progress in capability development.                |
| FR-COM-044                      | Role-Specific Readiness Report        | The system shall generate reports showing employee readiness for specific roles based on competency requirements.                               |
| <b>Notifications and Alerts</b> |                                       |                                                                                                                                                 |
| FR-COM-045                      | Assessment Cycle Notification         | The system shall automatically notify employees and supervisors of upcoming competency assessment cycles, including deadlines and requirements. |
| FR-COM-046                      | Pending Assessment Reminder           | The system shall send reminders to employees and supervisors with pending assessments approaching or past deadlines.                            |
| FR-COM-047                      | Assessment Completion Confirmation    | The system shall provide immediate confirmation to employees upon completion of their self-assessment.                                          |
| FR-COM-048                      | Supervisor Assessment Notification    | The system shall notify supervisors when employee assessments are ready for their review and when assessments are overdue.                      |
| FR-COM-049                      | IDP Review Reminder                   | The system shall send reminders for scheduled IDP review checkpoints and progress updates.                                                      |

|                           |                                          |                                                                                                                                                                                           |
|---------------------------|------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-COM-050                | Mandatory IDP Escalation                 | The system shall escalate notifications to HR when employees who are required to have an IDP have not created one within the defined timeframe.                                           |
| FR-COM-051                | Competency Framework Update Notification | The system shall notify all employees when the competency framework is updated or revised.                                                                                                |
| FR-COM-052                | Assessment Results Notification          | The system shall notify employees when their assessment has been finalized and results are available for review.                                                                          |
| <b>Security and Audit</b> |                                          |                                                                                                                                                                                           |
| FR-COM-053                | Role-Based Access Control                | The system shall enforce role-based access control for competency data, with defined permissions for employees, supervisors, HR Administrators, and senior management.                    |
| FR-COM-054                | Data Confidentiality                     | The system shall restrict access to individual competency assessment results to the employee, their supervisor, and authorized HR personnel only.                                         |
| FR-COM-055                | Segregation of Duties                    | The system shall enforce segregation of duties, ensuring no user can initiate, approve, and review the same competency transaction.                                                       |
| FR-COM-056                | Audit Trail                              | The system shall maintain an immutable audit trail of all competency-related transactions including: Timestamp, User ID, Action Type, Previous Values, New Values, and Reason for Change. |
| FR-COM-057                | Data Encryption                          | The system shall protect sensitive competency data through encryption during storage and transmission.                                                                                    |

|            |                                       |                                                                                                                                       |
|------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| FR-COM-058 | Assessment Results<br>Confidentiality | The system shall ensure that competency assessment results are stored securely and access is restricted to authorized personnel only. |
|------------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|

## 19.5 Cross-Module Integration Requirements

### Employee Master Data Integration

- **FR-COM-INT-001 | Employee Master Data to Competency Management:** The system shall automatically retrieve employee job position, grade, department, and organizational structure from the Employee Master Data Module to determine the applicable competency framework and required proficiency levels.
- **FR-COM-INT-002 | Competency Management to Employee Master Data:** Upon successful completion of competency assessment and IDP requirements, the system shall update the Employee Master Data record to reflect competency certification status and readiness for promotion.

### Recruitment and Selection Module Integration

- **FR-COM-INT-003 | Competency Management to Recruitment:** The system shall provide competency requirements (competencies and required proficiency levels) to the Recruitment Module for vacancy definition, job posting, and candidate screening.
- **FR-COM-INT-004 | Recruitment to Competency Management:** Upon successful recruitment and onboarding, the system shall automatically populate the employee's competency profile with initial assessment results from the selection process.
- **FR-COM-INT-005 | Competency Management to Recruitment Eligibility:** The system shall automatically verify competency requirements as part of internal candidate eligibility validation for promotions and transfers.

## Employee Self-Service (ESS) Module Integration

- **FR-COM-INT-006 | Competency Management to ESS:** The system shall provide employees access to view their competency profile, assessment results, gap analysis, and IDP status through their ESS dashboard.
- **FR-COM-INT-007 | ESS to Competency Management:** The system shall allow employees to complete self-assessments, update IDP progress, and view career path competency requirements through the ESS interface.
- **FR-COM-INT-008 | Career Planning Integration:** The system shall integrate with the Career Planning Module to provide employees with visibility of competency requirements for target roles and automated gap analysis for career progression.

## Workforce Planning Module Integration

- **FR-COM-INT-013 | Competency Management to Workforce Planning:** The system shall provide aggregated competency capability data to the Workforce Planning Module for strategic workforce planning, including identification of skill gaps and capability requirements.
- **FR-COM-INT-014 | Workforce Planning to Competency Management:** Upon creation of new positions or workforce plans, the system shall automatically generate the required competency profiles and proficiency levels for the new roles.

## Separation and Off-boarding Module Integration

- **FR-COM-INT-015 | Competency Management to Separation:** Upon employee separation, the system shall archive the employee's complete competency assessment history, including final assessment results and IDP status, as part of the separation record.
- **FR-COM-INT-016 | Separation to Competency Management:** Upon final separation approval, the system shall automatically deactivate the employee's competency profile and remove access to competency management data.

## **20. Module 13: Survey & Anonymous Feedback**

### **20.1 Introduction**

The Survey & Anonymous Feedback Module shall provide a centralized digital platform for collecting, managing, and analyzing employee feedback, opinions, and assessments across the organization. The module shall support the Chief People and Culture function in conducting various types of surveys to understand employee needs, measure satisfaction, evaluate HR services, assess organizational culture, and support continuous improvement initiatives.

The module shall also provide employees with a secure and confidential digital channel to share feedback, suggestions, concerns, complaints, compliments, and improvement ideas related to Human Resources (HR) processes and services without revealing their identity, replacing the traditional manual suggestion box methods with a modern, accessible, and auditable digital solution.

### **20.2 Purpose**

The purpose of the Survey & Anonymous Feedback Module shall be to:

- Provide a centralized, integrated platform for designing, distributing, and analyzing employee surveys across the organization.
- Enable the People and Culture function to conduct Employee Satisfaction Surveys, Employee Engagement Surveys, Employee Experience Surveys, ERP System Satisfaction Surveys, and other organizational assessments.
- Provide employees with a safe and confidential channel to share suggestions, concerns, complaints, compliments, and ideas without revealing their identity.
- Support continuous improvement of HR processes and services by identifying trends, issues, and opportunities based on employee feedback.
- Enable evidence-based decision-making through structured feedback collection and analytics.
- Strengthen employee voice and participation in organizational improvement initiatives.
- Replace manual suggestion box methods with a modern, accessible, and auditable digital solution.

## 20.3 Business Rules

The Survey & Anonymous Feedback Module shall operate under the following business rules:

### Survey Management

- Surveys shall be created, configured, and administered exclusively by authorized HR administrators or designated survey owners.
- Survey administrators shall have the ability to configure surveys as either **Anonymous** (employee identity not captured) or **Identified** (employee information associated with responses).
- Employees shall only be able to access and respond to surveys assigned to them based on their role, department, branch, or other configured criteria.
- The system shall prevent employees from submitting multiple responses for the same survey when the survey configuration allows only one response per employee.
- Survey responses shall be stored securely and access shall be restricted based on configured permissions and roles.
- Survey reports shall support filtering by survey, department, branch, status, and other configurable parameters.
- All survey activities shall maintain a complete audit trail for compliance and transparency.

### Anonymous Feedback

- Employees shall have the ability to submit anonymous feedback without logging into the system, ensuring accessibility and confidentiality.
- Anonymous feedback submissions shall not capture or display employee identity with the submitted response.
- Anonymous feedback shall be categorized by Configurable subject area (HR Process/HR Service, Complaint, Suggestion) for efficient triage and analysis.
- Employees shall not be able to edit, modify, view, or delete anonymous feedback after it has been submitted.

- Anonymous feedback shall be accessible only to authorized HR personnel with appropriate access rights and permissions.
- Anonymous feedback shall be integrated with the Survey Module for centralized viewing, categorization, and analysis.
- All anonymous feedback submissions shall be time-stamped and logged for audit purposes while maintaining confidentiality.

### Confidentiality and Data Privacy

- Confidentiality of survey responses and anonymous feedback shall be maintained, and access shall be restricted to authorized personnel only.
- For anonymous surveys, the system shall display survey responses to HR administrators without revealing employee identity.
- Personally identifiable information collected through identified surveys shall be protected in accordance with applicable data privacy regulations and organizational policies.
- Survey results shall be reported in aggregated and anonymized formats where individual identification is not required.
- All survey and feedback data shall be stored securely with appropriate encryption and access controls.

## 20.4 Functional Requirements

### Survey Configuration and Administration

| FR ID      | Requirement          | Description                                                                                                                                                                                                |
|------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-001 | Survey Module Access | The system shall provide authorized HR administrators and designated survey owners with access to the Survey Module through the ERP dashboard.                                                             |
| FR-SUR-002 | Survey Creation      | The system shall allow authorized administrators to create new surveys with configurable parameters including survey name, description, purpose, target audience, survey period, and response limitations. |

|            |                               |                                                                                                                                                                                                                                                |
|------------|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-003 | Survey Type Configuration     | The system shall provide administrators with the option to configure surveys as <b>Anonymous</b> (employee identity not captured) or <b>Identified</b> (employee information associated with responses) during survey creation.                |
| FR-SUR-004 | Anonymous Survey Setting      | The system shall allow administrators to configure a survey as anonymous, where employee identity shall not be captured or displayed with submitted responses.                                                                                 |
| FR-SUR-005 | Identified Survey Setting     | The system shall allow administrators to configure a survey as identified, where employee information shall be captured and associated with submitted responses.                                                                               |
| FR-SUR-006 | Target Audience Configuration | The system shall allow administrators to define the target audience for surveys based on configurable criteria including department, branch, employee category, job grade, location, and other organizational attributes.                      |
| FR-SUR-007 | Survey Period Configuration   | The system shall allow administrators to define survey start date, end date, and response window, with automatic survey closure upon reaching the configured end date.                                                                         |
| FR-SUR-008 | Response Limitation           | The system shall allow administrators to configure whether employees may submit only one response or multiple responses per survey.                                                                                                            |
| FR-SUR-009 | Question Bank Management      | The system shall provide a centralized question bank allowing administrators to create, store, categorize, and reuse survey questions across multiple surveys.                                                                                 |
| FR-SUR-010 | Question Types                | The system shall support multiple question types including: Multiple Choice (Single Answer), Multiple Choice (Multiple Answers), Dropdown, Rating Scale (Likert), Yes/No, Short Answer, Paragraph, and Matrix/Grid.                            |
| FR-SUR-011 | Questionnaire Creation        | The system shall allow administrators to create and configure questionnaires by adding questions from the question bank or creating new questions, with the ability to define question order, required/optional status, and conditional logic. |
| FR-SUR-012 | Conditional Logic             | The system shall support conditional logic (skip logic and branching) to display questions based on previous                                                                                                                                   |

|            |                          |                                                                                                                                                              |
|------------|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                          | responses, ensuring relevant and personalized survey experiences.                                                                                            |
| FR-SUR-013 | Questionnaire Preview    | The system shall allow administrators to preview the complete questionnaire before publishing the survey.                                                    |
| FR-SUR-014 | Survey Publication       | The system shall allow administrators to publish surveys, making them available to the configured target audience on the scheduled start date.               |
| FR-SUR-015 | Survey Closure           | The system shall automatically close surveys upon reaching the configured end date or when the administrator manually closes the survey.                     |
| FR-SUR-016 | Survey Status Management | The system shall support survey statuses including Draft, Published, Active, Closed, and Archived, with appropriate actions and permissions for each status. |

### Survey Distribution and Participation

| FR ID      | Requirement                | Description                                                                                                                                                                       |
|------------|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-017 | Survey Assignment          | The system shall automatically assign surveys to employees based on the configured target audience criteria.                                                                      |
| FR-SUR-018 | Survey Notification        | The system shall automatically send notifications to employees when a new survey is assigned, including survey details, purpose, participation deadline, and access instructions. |
| FR-SUR-019 | Survey Reminder            | The system shall send automated reminders to employees who have not completed assigned surveys before the configured deadline.                                                    |
| FR-SUR-020 | Survey Access              | The system shall allow employees to access and complete assigned surveys through the ERP dashboard and Employee Self-Service (ESS) portal.                                        |
| FR-SUR-021 | Survey Completion Tracking | The system shall track and display survey completion status, including Not Started, In Progress, and Completed.                                                                   |

|            |                               |                                                                                                                                                                |
|------------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-022 | Partial Response Saving       | The system shall allow employees to save partial survey responses and return to complete them later.                                                           |
| FR-SUR-023 | Survey Submission             | The system shall allow employees to complete and submit assigned surveys through the Survey Module.                                                            |
| FR-SUR-024 | Submission Confirmation       | The system shall provide on-screen confirmation and notification upon successful survey submission.                                                            |
| FR-SUR-025 | Duplicate Response Prevention | The system shall prevent employees from submitting multiple responses for the same survey when the survey configuration allows only one response per employee. |
| FR-SUR-026 | Late Response Handling        | The system shall allow administrators to configure whether late responses are accepted after the survey end date and provide appropriate notifications.        |

### Response Management and Analysis

| FR ID      | Requirement                   | Description                                                                                                                                                                |
|------------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-027 | Response Collection           | The system shall securely collect and store all survey responses with associated metadata including timestamp and completion status.                                       |
| FR-SUR-028 | Anonymous Response Protection | For anonymous surveys, the system shall display survey responses to HR administrators without revealing employee identity.                                                 |
| FR-SUR-029 | Response Viewing Access       | The system shall restrict survey response viewing to the survey creator and authorized users within the assigned team or division, based on configured access permissions. |
| FR-SUR-030 | Response Filtering            | The system shall allow authorized users to filter survey responses by department, branch, employee category, job grade, and other configurable parameters.                 |
| FR-SUR-031 | Response Export               | The system shall allow authorized users to export survey responses in standard formats including Excel and CSV for further analysis.                                       |

|            |                              |                                                                                                                                                            |
|------------|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-032 | Real-Time Results Dashboard  | The system shall provide a real-time dashboard displaying survey participation rates, completion status, and aggregate response summaries.                 |
| FR-SUR-033 | Question Analysis            | The system shall generate reports showing the response distribution for each survey question, including counts, percentages, and statistical summaries.    |
| FR-SUR-034 | Cross-Tabulation Analysis    | The system shall support cross-tabulation analysis to compare responses across different employee segments (department, branch, grade, etc.).              |
| FR-SUR-035 | Trend Analysis               | The system shall support trend analysis by comparing survey results over time and across multiple survey cycles.                                           |
| FR-SUR-036 | Open-Ended Response Analysis | The system shall provide functionality for reviewing, categorizing, and analyzing open-ended text responses.                                               |
| FR-SUR-037 | Sentiment Analysis           | The system shall support sentiment analysis of open-ended responses to identify positive, negative, and neutral sentiments.                                |
| FR-SUR-038 | Report Generation            | The system shall allow authorized users to generate comprehensive survey reports including response summaries, graphical visualizations, and key insights. |
| FR-SUR-039 | Report Export                | The system shall allow authorized users to export survey reports in PDF, Excel, and CSV formats.                                                           |
| FR-SUR-040 | Executive Summary            | The system shall generate executive summaries highlighting key findings, trends, and actionable insights from survey results.                              |

### Anonymous Feedback Management

| FR ID      | Requirement               | Description                                                                                                                                 |
|------------|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| FR-AFB-001 | Anonymous Feedback Access | The system shall allow employees to access and submit anonymous feedback through a dedicated interface without requiring login credentials. |

|            |                                   |                                                                                                                                                                                                                              |
|------------|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-AFB-002 | Anonymous Feedback Interface      | The system shall provide a user-friendly interface for anonymous feedback submission with a free-text area for entering detailed feedback.                                                                                   |
| FR-AFB-003 | Feedback Categories               | The system shall provide a mandatory drop-down field allowing employees to select one of the following Configurable categories before submitting anonymous feedback: <b>HR Process/HR Service, Complaint, or Suggestion.</b> |
| FR-AFB-004 | Additional Category Configuration | The system shall allow authorized administrators to add, modify, or deactivate feedback categories as organizational needs evolve.                                                                                           |
| FR-AFB-005 | Feedback Details                  | The system shall allow employees to enter sufficient details about their feedback through a free-text area before submission.                                                                                                |
| FR-AFB-006 | Supporting Document Attachment    | The system shall allow employees to attach supporting documents to their anonymous feedback submissions where applicable.                                                                                                    |
| FR-AFB-007 | Feedback Submission               | The system shall provide a Submit button allowing employees to submit their anonymous feedback after entering the required information.                                                                                      |
| FR-AFB-008 | Submission Confirmation           | The system shall display a confirmation message after successful submission of anonymous feedback.                                                                                                                           |
| FR-AFB-009 | Submission Restriction            | The system shall prevent employees from editing, modifying, viewing, or deleting anonymous feedback after it has been submitted.                                                                                             |
| FR-AFB-010 | Feedback Integration              | The system shall integrate the Anonymous Feedback feature with the Survey Module to enable centralized viewing, categorization, and analysis of employee feedback.                                                           |
| FR-AFB-011 | Feedback Display                  | The system shall display submitted anonymous feedback within the Survey Module only to HR users assigned appropriate access rights and permissions.                                                                          |

|            |                            |                                                                                                                                                                                                              |
|------------|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-AFB-012 | Feedback View Access       | The system shall allow authorized HR users to view submitted anonymous feedback without modifying the original feedback content.                                                                             |
| FR-AFB-013 | Feedback Filtering         | The system shall allow authorized HR users to filter submitted anonymous feedback by category, date range, and feedback status.                                                                              |
| FR-AFB-014 | Feedback Status Management | The system shall support feedback statuses including Submitted, Under Review, Reviewed, Actioned, and Closed, with appropriate tracking for each status.                                                     |
| FR-AFB-015 | Feedback Response          | The system shall allow authorized HR users to record responses, actions taken, and resolution notes against anonymous feedback submissions.                                                                  |
| FR-AFB-016 | Feedback Analytics         | The system shall provide analytics and reporting on anonymous feedback, including volume trends, category distribution, and action status summaries.                                                         |
| FR-AFB-017 | Feedback Export            | The system shall allow authorized users to export anonymous feedback data in standard formats including Excel and CSV for further analysis.                                                                  |
| FR-AFB-018 | Feedback Anonymity         | The system shall ensure that all submitted anonymous feedback is stored without any employee identity information, and ensure that employee identity cannot be traced or inferred from the feedback content. |

### Notifications and Alerts

| FR ID         | Requirement                    | Description                                                                                                                    |
|---------------|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-NOT-01 | Survey Assignment Notification | The system shall automatically notify employees when a new survey is assigned to them.                                         |
| FR-SUR-NOT-02 | Survey Reminder Notification   | The system shall send automated reminders to employees who have not completed assigned surveys before the configured deadline. |
| FR-SUR-NOT-03 | Survey Completion Confirmation | The system shall provide immediate confirmation to employees upon successful survey submission.                                |

|               |                             |                                                                                                                              |
|---------------|-----------------------------|------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-NOT-04 | New Feedback Notification   | The system shall notify authorized HR users when new anonymous feedback is submitted.                                        |
| FR-SUR-NOT-05 | Survey Admin Alerts         | The system shall send notifications to survey administrators regarding survey participation rates and approaching deadlines. |
| FR-SUR-NOT-06 | Multi-Channel Notifications | The system shall support notifications through ERP dashboard alerts and email.                                               |

### Security and Audit

| FR ID         | Requirement               | Description                                                                                                                                                                               |
|---------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-SUR-SEC-01 | Role-Based Access Control | The system shall enforce role-based access control for survey and feedback data, with defined permissions for employees, survey administrators, HR administrators, and senior management. |
| FR-SUR-SEC-02 | Data Confidentiality      | The system shall restrict access to survey responses and anonymous feedback to authorized personnel only.                                                                                 |
| FR-SUR-SEC-03 | Segregation of Duties     | The system shall enforce segregation of duties, ensuring no user can initiate, approve, and review the same survey or feedback transaction.                                               |
| FR-SUR-SEC-04 | Audit Trail               | The system shall maintain an immutable audit trail of all survey and feedback activities including: Timestamp, User ID, Action Type, Previous Values, New Values, and Reason for Change.  |
| FR-SUR-SEC-05 | Data Encryption           | The system shall protect sensitive survey and feedback data through encryption during storage and transmission.                                                                           |
| FR-SUR-SEC-06 | Data Retention            | The system shall support configurable data retention policies for surveys and feedback in accordance with organizational policies and regulatory requirements.                            |
| FR-SUR-SEC-07 | Data Anonymization        | For anonymous surveys, the system shall ensure complete anonymization of responses and prevent any attempt to identify respondents.                                                       |

|               |                |                                                                                                                       |
|---------------|----------------|-----------------------------------------------------------------------------------------------------------------------|
| FR-SUR-SEC-08 | Access Logging | The system shall maintain logs of all access to survey responses and feedback data for audit and compliance purposes. |
|---------------|----------------|-----------------------------------------------------------------------------------------------------------------------|

## **21. Module 14: Onboarding and Induction Management System**

### **21.1 Introduction**

The Onboarding and Induction Management System shall provide a centralized, automated, and auditable framework for integrating newly hired employees into Bunna Bank. The system shall bridge candidate transition from talent acquisition to full operational deployment. It orchestrates workflows between the People Operations Management Directorate (POMD), People Performance & Development Directorate (PPDD), Work Unit Supervisors, assigned Onboarding Buddies, and the employee to ensure compliance, rapid job readiness, and seamless integration across all head office and district locations.

### **21.2 Purpose**

The purpose of this module is to automate and monitor the end-to-end onboarding lifecycle, accelerating time-to-productivity while ensuring strict compliance with regulatory mandates and internal bank policies. Specifically, the module aims to:

- Automate pre-boarding administrative checks, asset requisitions, and employment document tracking.
- Enforce clear governance and role handoffs between POMD, PPDD, and Work Unit Supervisors.
- Track onboarding milestones alongside official probation periods (60 days for Non-Managerial, 75 days for Managerial).

### **21.3 Business Rules**

- Pre-Boarding Gate: Formal onboarding cannot initiate by the assigned work unit until POMD verifies and checks off mandatory pre-employment documentation (Medical Certificate, Police Clearance, Guarantor Contract, signed Code of Conduct, JD, and Asset Registration).

- **Induction Completion Gate:** Work unit-specific onboarding tasks shall remain locked until HR/POMD updates the employee status to "Induction Completed".
- **Assignment:** Upon receiving automated notification of induction completion, the work unit director or Supervisor must assign a buddy within a configurable time.
- **Probationary Alignment:** Onboarding progress reviews with in the probation period and directly feed into the official probation appraisal process before permanent confirmation by POMD.
- **Audit Trail & Data Security:** All task updates, mentor assignments, and progress logs are permanently recorded with full time-stamps for compliance and performance reviews.

## 21.4 Functional Requirements

### Pre-Boarding & Employment Formalities

| FR ID     | Requirement                                   | Description                                                                                                                                                                                                                                                       |
|-----------|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-OB-001 | Employment Formalities Checklist Tracking     | The system shall enable POMD to upload, track, and verify required employment documents (Offer Letter, Medical Certificate, Police Clearance, Guarantor Contract, signed Code of Conduct, JD, TIN, Pension No.) prior to Day 1.                                   |
| FR-OB-002 | Automated Workstation & IT Provisioning Alert | The system shall automatically trigger pre arrival notification alert as someone is on the process of assignment to the specific work unit immediate supervisor and IT/Facilities 7 days prior to start date to ensure workstation, PC, and tools are configured. |

### Induction & Directorate Handoffs

| FR ID | Requirement Name | Description |
|-------|------------------|-------------|
|       |                  |             |

|           |                              |                                                                                                                                                                                                                                            |
|-----------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-OB-003 | POD Status Update & Alert    | The system shall allow POMD to mark an employee's general induction as "Completed," automatically triggering instant system notifications and email alerts to the respective work unit.                                                    |
| FR-OB-004 | Onboarding Initiation        | After the pre-employment formalities finalized, the system shall allow the HR Officer to initiate the onboarding by sending notification to the work unit in order to assign a Buddy and evaluate his performance on the specified period. |
| FR-OB-005 | PPDD Induction & LMS Mapping | The system shall enable PPDD to configure and assign mandatory general orientation videos and system trainings (Finacle, ERP) based on candidate role and grade.                                                                           |

### Onboarding Buddy / Peer Support Management

| FR ID     | Requirement Name         | Description                                                                                                                                                                               |
|-----------|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-OB-006 | Buddy Assignment         | The system shall provide an interface for the immediate Supervisor to select and assign a buddy upon receiving the induction completion alert.                                            |
| FR-OB-007 | Checklist Access Control | The system shall automatically grant the buddy role based permissions to view the new hire's schedule, access the employee Guide Checklist log weekly check-ins and record guidance notes |

## Evaluation, Performance Alignment & Program Closure

| FR ID     | Requirement Name                              | Description                                                                                                                                                                                                             |
|-----------|-----------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-OB-011 | Daily/Weekly Task Progress Tracker            | The system shall provide interactive daily and weekly activity checklists where the new hire, person, and Supervisor can mark tasks complete and comments in real time.                                                 |
| FR-OB-012 | Mid-Term Evaluation Form Dispatch (4 Weeks)   | The system shall automatically send the 4-Week Mid-Term Onboarding Evaluation Form to the new hire for completion and route responses to POMD and Supervisor.                                                           |
| FR-OB-013 | Program Closure & Final Evaluation (2 Months) | At the end of 2 months, the system shall deploy the End-of-Onboarding Evaluation Forms to both Supervisor and Employee, requiring digital sign-off to formally close the onboarding file.                               |
| FR-OB-014 | Probation Period Linkage & Escalation Alerts  | The system shall map onboarding completion metrics to the employee's official probation counter (60 days non-managerial / 75 days managerial) and trigger escalation alerts to the work unit if milestones are delayed. |

## 22. Module 15: HR Data Analytics and Business Intelligence Module

### 22.1 Introduction

The HR Data Analytics and Business Intelligence Module shall provide a comprehensive, integrated platform for collecting, consolidating, analyzing, and reporting HR data across the entire employee lifecycle. The module shall transform raw HR transactional data from all ERP HR modules into meaningful insights, actionable intelligence, and decision-support information to enable evidence-based workforce management and strategic HR decision-making.

The module shall serve as the central analytics hub for the HR function, consolidating data from all HR modules including Workforce Planning, Recruitment and Selection, Employee Master Data, Attendance Management, Leave Management, Separation and Off-boarding, Payroll Processing, Discipline Management, Competency Management, and Employee Self-Service. It shall provide HR users and authorized stakeholders with the ability to retrieve the right data at the right time, support evidence-based decision-making, improve HR service delivery, enhance workforce planning, and drive organizational performance.

## **22.2 Purpose**

The purpose of the HR Data Analytics and Business Intelligence Module shall be to:

- Provide a centralized platform for consolidating, analyzing, and reporting HR data from all ERP HR modules.
- Enable evidence-based decision-making through comprehensive workforce analytics and insights.
- Support strategic workforce planning by providing visibility into workforce trends, patterns, and forecasts.
- Improve HR service delivery through data-driven identification of improvement opportunities.
- Provide HR users and authorized stakeholders with self-service access to HR data and analytics.
- Enable proactive identification of workforce risks and opportunities.
- Support organizational performance by aligning workforce insights with business objectives.
- Provide comprehensive reports and dashboards that consolidate data from all HR modules into a single, unified platform.
- Maintain historical data for trend analysis, benchmarking, and predictive analytics.

## **22.3 Business Rules**

The HR Data Analytics and Business Intelligence Module shall operate under the following business rules:

## **Data Consolidation and Integration**

- The module shall consolidate data from all HR modules, including Workforce Planning, Recruitment and Selection, Employee Master Data, Attendance Management, Leave Management, Separation and Off-boarding, Payroll Processing, Discipline Management, Competency Management, Employee Self-Service, and RSSA Management.
- All HR master data shall serve as input for the Data Analytics Module, ensuring a single source of truth.
- Data shall be automatically updated whenever new HR records are submitted, approved, or updated in the source modules.
- Historical data shall be maintained for trend analysis and longitudinal studies.

## **Data Access and Security**

- Access to HR analytics and reports shall be restricted based on user roles and permissions, ensuring data confidentiality and security.
- Sensitive data fields shall be masked or restricted from unauthorized users.
- Data shall be accessible only to authorized HR personnel, managers, and senior leadership based on their defined roles and responsibilities.
- All data access and report generation activities shall be logged for audit purposes.

## **Reporting and Analysis**

- Users shall have the ability to filter HR data based on all HR modules and their respective data fields.
- The system shall support period-based filtering and analysis on a monthly, quarterly, annual, and budget year basis.
- Reports shall be generated in real-time based on the latest available data.
- Historical data from previous budget years shall be maintained and analyzed to identify trends.
- All reports shall be exportable in standard formats including Word, Excel, and PDF.

## Data Quality and Governance

- Data shall be validated at the source modules before being included in analytics.
- Data quality rules shall be applied to ensure accuracy, completeness, and consistency.
- Data governance shall be established to define data ownership, quality standards, and retention policies.
- Data lineage shall be maintained to trace data back to its source module and transaction.

## 22.4 Functional Requirements

### Data Consolidation and Integration

| FR ID     | Requirement                    | Description                                                                                                                                                                                                                                                                                                                             |
|-----------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-001 | Data Consolidation             | The system shall consolidate data from all HR modules into a centralized data repository for analysis.                                                                                                                                                                                                                                  |
| FR-DA-002 | HR Data Integration            | The system shall consolidate comprehensive data from all HR modules, including Workforce Planning, Recruitment and Selection, Employee Master Data, Attendance Management, Leave Management, Separation and Off-boarding, Payroll Processing, Discipline Management, Competency Management, Employee Self-Service, and RSSA Management. |
| FR-DA-003 | Master Data Integration        | The system shall use data from all HR master data modules as input for the Data Analytics Module.                                                                                                                                                                                                                                       |
| FR-DA-004 | Automatic Data Update          | The system shall automatically update analysis data whenever new HR records are submitted, approved, or updated in the source HR modules.                                                                                                                                                                                               |
| FR-DA-005 | Real-Time Data Synchronization | The system shall provide real-time data synchronization from source modules to the analytics repository.                                                                                                                                                                                                                                |

|           |                       |                                                                                                                    |
|-----------|-----------------------|--------------------------------------------------------------------------------------------------------------------|
| FR-DA-006 | Data Validation       | The system shall validate data quality and completeness before including it in analytics and reports.              |
| FR-DA-007 | Data Lineage Tracking | The system shall maintain data lineage to trace analytics data back to its source module and transaction.          |
| FR-DA-008 | Error Handling        | The system shall log and report data integration errors, providing notifications to administrators for resolution. |

### Workforce Analytics

| FR ID     | Requirement                       | Description                                                                                                                                               |
|-----------|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-009 | Workforce Demographics            | The system shall provide analytics on workforce demographics including age distribution, gender diversity, education levels, and nationality.             |
| FR-DA-010 | Employee Headcount Analysis       | The system shall provide headcount analysis by department, branch, district, job grade, position, and employment type.                                    |
| FR-DA-011 | Turnover Analysis                 | The system shall provide comprehensive turnover analysis including turnover rates, trends, reasons for separation, and departmental turnover comparisons. |
| FR-DA-012 | Attrition Forecasting             | The system shall provide attrition forecasting based on historical trends and predictive analytics.                                                       |
| FR-DA-013 | Workforce Distribution            | The system shall provide analytics on workforce distribution across locations, departments, and job categories.                                           |
| FR-DA-014 | Workforce Growth Analysis         | The system shall provide analysis of workforce growth trends and projections.                                                                             |
| FR-DA-015 | Diversity and Inclusion Analytics | The system shall provide analytics on workforce diversity and inclusion metrics.                                                                          |
| FR-DA-016 | Employee Tenure Analysis          | The system shall provide analysis of employee tenure by department, grade, and location.                                                                  |

### Recruitment and Talent Acquisition Analytics

| FR ID     | Requirement                           | Description                                                                                                                   |
|-----------|---------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-017 | Recruitment Analytics                 | The system shall provide comprehensive recruitment analytics including time-to-fill, cost-per-hire, and source effectiveness. |
| FR-DA-018 | Vacancy Analysis                      | The system shall provide analytics on vacancy trends, open positions, and vacancy fill rates.                                 |
| FR-DA-019 | Candidate Pipeline Analysis           | The system shall provide analysis of candidate pipelines, conversion rates, and talent pool composition.                      |
| FR-DA-020 | Recruitment Funnel Analysis           | The system shall provide funnel analysis showing candidate progression from application to hire.                              |
| FR-DA-021 | Hiring Source Effectiveness           | The system shall provide analytics on the effectiveness of different hiring sources and channels.                             |
| FR-DA-022 | Internal vs. External Hiring Analysis | The system shall provide analysis comparing internal promotions/transfers versus external hires.                              |
| FR-DA-023 | Offer Acceptance Rate Analysis        | The system shall provide analysis of offer acceptance rates by position, grade, and location.                                 |
| FR-DA-024 | Recruitment Efficiency Metrics        | The system shall provide key recruitment efficiency metrics and benchmarks.                                                   |

### Employee Performance and Development Analytics

| FR ID     | Requirement                     | Description                                                                                                   |
|-----------|---------------------------------|---------------------------------------------------------------------------------------------------------------|
| FR-DA-025 | Performance Rating Distribution | The system shall provide analytics on performance rating distributions across the organization.               |
| FR-DA-026 | Performance Trends              | The system shall provide trend analysis of performance ratings over time.                                     |
| FR-DA-027 | Competency Gap Analysis         | The system shall provide aggregated competency gap analysis at organizational, departmental, and role levels. |

|           |                                    |                                                                                                        |
|-----------|------------------------------------|--------------------------------------------------------------------------------------------------------|
| FR-DA-028 | Training Effectiveness             | The system shall provide analytics on training effectiveness and ROI.                                  |
| FR-DA-029 | Learning and Development Analytics | The system shall provide analytics on learning participation, completion rates, and skill development. |
| FR-DA-030 | Promotion Analysis                 | The system shall provide analysis of promotion patterns, rates, and trends across the organization.    |
| FR-DA-031 | Talent Mobility Analysis           | The system shall provide analysis of internal talent mobility and career progression patterns.         |
| FR-DA-032 | Succession Readiness               | The system shall provide analytics on succession pipeline readiness and critical role coverage.        |

### Attendance and Leave Analytics

| FR ID     | Requirement                 | Description                                                                                                                             |
|-----------|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-033 | Attendance Pattern Analysis | The system shall provide analysis of employee attendance patterns, including present, absent, late arrival, and early departure trends. |
| FR-DA-034 | Absenteeism Analysis        | The system shall provide comprehensive absenteeism analysis by department, branch, and employee category.                               |
| FR-DA-035 | Leave Utilization Analysis  | The system shall provide analysis of leave utilization, accrual, and balance trends by leave type and department.                       |
| FR-DA-036 | Sick Leave Trends           | The system shall provide analysis of sick leave patterns, trends, and departmental comparisons.                                         |
| FR-DA-037 | Overtime Analysis           | The system shall provide analysis of overtime patterns, costs, and departmental trends.                                                 |
| FR-DA-038 | Leave Liability Reporting   | The system shall provide leave liability reports with monetary value of accrued leave balances.                                         |

|           |                       |                                                                                         |
|-----------|-----------------------|-----------------------------------------------------------------------------------------|
| FR-DA-039 | Attendance Compliance | The system shall provide analysis of attendance policy compliance and violation trends. |
|-----------|-----------------------|-----------------------------------------------------------------------------------------|

### Payroll and Compensation Analytics

| FR ID     | Requirement                     | Description                                                                                                  |
|-----------|---------------------------------|--------------------------------------------------------------------------------------------------------------|
| FR-DA-040 | Salary Analysis                 | The system shall provide salary analysis including salary distribution, salary bands, and salary benchmarks. |
| FR-DA-041 | Compensation Structure Analysis | The system shall provide analysis of compensation structures by grade, department, and location.             |
| FR-DA-042 | Payroll Cost Analysis           | The system shall provide comprehensive payroll cost analysis by department, branch, and cost center.         |
| FR-DA-043 | Benefits Utilization            | The system shall provide analysis of benefits utilization and costs.                                         |
| FR-DA-044 | Salary Trends                   | The system shall provide trend analysis of salary movements, increments, and promotions.                     |
| FR-DA-045 | Compensation Benchmarking       | The system shall provide benchmarking capabilities comparing compensation against market data.               |
| FR-DA-046 | Payroll Variance Analysis       | The system shall provide analysis of payroll variances and exceptions.                                       |

### Discipline and Separation Analytics

| FR ID     | Requirement              | Description                                                                                      |
|-----------|--------------------------|--------------------------------------------------------------------------------------------------|
| FR-DA-047 | Discipline Case Analysis | The system shall provide analysis of disciplinary cases by type, level, department, and outcome. |
| FR-DA-048 | Disciplinary Trends      | The system shall provide trend analysis of disciplinary actions over time.                       |

|           |                           |                                                                                                                    |
|-----------|---------------------------|--------------------------------------------------------------------------------------------------------------------|
| FR-DA-049 | Separation Analysis       | The system shall provide comprehensive analysis of employee separations by type, reason, department, and location. |
| FR-DA-050 | Separation Cost Analysis  | The system shall provide analysis of separation costs and financial impact.                                        |
| FR-DA-051 | Exit Interview Analytics  | The system shall provide analysis of exit interview responses to identify themes and improvement opportunities.    |
| FR-DA-052 | Retention Risk Indicators | The system shall provide analytics on retention risk indicators and potential attrition flags.                     |

### RSSA and Financial Analytics

| FR ID     | Requirement             | Description                                                                                                                   |
|-----------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-053 | RSSA Portfolio Analysis | The system shall provide analysis of RSSA loan portfolio including outstanding balances, repayment trends, and default rates. |
| FR-DA-054 | RSSA Application Trends | The system shall provide analysis of RSSA application patterns and approval rates.                                            |
| FR-DA-055 | Guarantor Analysis      | The system shall provide analysis of guarantor commitments and associated risks.                                              |
| FR-DA-056 | RSSA Financial Impact   | The system shall provide analysis of RSSA financial impact and risk exposure.                                                 |

### Data Filtering and Customization

| FR ID     | Requirement               | Description                                                                                                         |
|-----------|---------------------------|---------------------------------------------------------------------------------------------------------------------|
| FR-DA-057 | Analysis Result Filtering | The system shall allow authorized users to filter HR data based on all HR modules and their respective data fields. |

|           |                          |                                                                                                                    |
|-----------|--------------------------|--------------------------------------------------------------------------------------------------------------------|
| FR-DA-058 | Custom Report Generation | The system shall allow users to generate customized reports based on selected HR modules and data fields.          |
| FR-DA-059 | Period-Based Filtering   | The system shall support period-based filtering and analysis on monthly, quarterly, annual, and budget year basis. |
| FR-DA-060 | Comparative Analysis     | The system shall support comparative analysis across periods, departments, and employee groups.                    |
| FR-DA-061 | User-Defined Parameters  | The system shall allow users to define custom parameters for data analysis and report generation.                  |
| FR-DA-062 | Saved Report Templates   | The system shall allow users to save custom report templates for reuse.                                            |

### Historical Data Analysis and Trend Identification

| FR ID     | Requirement                | Description                                                                                                |
|-----------|----------------------------|------------------------------------------------------------------------------------------------------------|
| FR-DA-063 | Historical Data Analysis   | The system shall maintain and analyze historical HR data from previous budget years to identify trends.    |
| FR-DA-064 | Longitudinal Studies       | The system shall support longitudinal analysis of HR metrics over multiple periods.                        |
| FR-DA-065 | Trend Identification       | The system shall automatically identify and highlight significant trends in HR data.                       |
| FR-DA-066 | Year-over-Year Comparisons | The system shall provide year-over-year comparisons of key HR metrics.                                     |
| FR-DA-067 | Predictive Analytics       | The system shall provide predictive analytics capabilities for workforce planning and risk identification. |
| FR-DA-068 | Benchmarking               | The system shall support internal and external benchmarking of HR metrics.                                 |

## Dashboards and Visualization

| FR ID     | Requirement                 | Description                                                                                            |
|-----------|-----------------------------|--------------------------------------------------------------------------------------------------------|
| FR-DA-069 | Executive Dashboard         | The system shall provide an executive dashboard showing key HR metrics for senior leadership.          |
| FR-DA-070 | HR Operational Dashboard    | The system shall provide an HR operational dashboard showing day-to-day HR performance metrics.        |
| FR-DA-071 | Department Dashboard        | The system shall provide department-level dashboards for managers.                                     |
| FR-DA-072 | Interactive Dashboards      | The system shall provide interactive dashboards with drill-down capabilities.                          |
| FR-DA-073 | Data Visualization          | The system shall provide rich data visualization including charts, graphs, heat maps, and trend lines. |
| FR-DA-074 | Real-Time Dashboard Updates | The system shall update dashboards in real-time as new data becomes available.                         |

## Report Management and Export

| FR ID     | Requirement                 | Description                                                                                                        |
|-----------|-----------------------------|--------------------------------------------------------------------------------------------------------------------|
| FR-DA-075 | Standard Report Library     | The system shall provide a library of standard HR reports covering all HR modules.                                 |
| FR-DA-076 | Custom Report Creation      | The system shall allow users to create custom reports with configurable parameters and filters.                    |
| FR-DA-077 | Report Export               | The system shall allow authorized users to export HR reports and analysis results in Word, Excel, and PDF formats. |
| FR-DA-078 | Scheduled Report Generation | The system shall allow users to schedule automatic report generation and distribution.                             |
| FR-DA-079 | Report Distribution         | The system shall support automated report distribution to designated recipients via email.                         |

|           |                  |                                                                        |
|-----------|------------------|------------------------------------------------------------------------|
| FR-DA-080 | Report Templates | The system shall support predefined and user-defined report templates. |
|-----------|------------------|------------------------------------------------------------------------|

### Notifications and Alerts

| FR ID     | Requirement                   | Description                                                                                                        |
|-----------|-------------------------------|--------------------------------------------------------------------------------------------------------------------|
| FR-DA-081 | Anomaly Alerts                | The system shall automatically generate alerts for significant anomalies in HR data.                               |
| FR-DA-082 | Trend Alerts                  | The system shall notify users of significant positive or negative trends.                                          |
| FR-DA-083 | Data Quality Alerts           | The system shall alert administrators to data quality issues requiring attention.                                  |
| FR-DA-084 | Scheduled Report Notification | The system shall notify recipients when scheduled reports are available.                                           |
| FR-DA-085 | Report Export                 | The system shall allow authorized users to export HR reports and analysis results in Word, Excel, and PDF formats. |

### Security, Audit, and Data Governance

| FR ID     | Requirement               | Description                                                                                                         |
|-----------|---------------------------|---------------------------------------------------------------------------------------------------------------------|
| FR-DA-086 | Role-Based Access Control | The system shall enforce role-based access control for all analytics, dashboards, and reports.                      |
| FR-DA-087 | Data Segmentation         | The system shall restrict access to HR data based on user roles, permissions, and organizational hierarchies.       |
| FR-DA-088 | Audit Trail               | The system shall maintain an immutable audit trail of all data access, report generation, and analytics activities. |
| FR-DA-089 | Data Encryption           | The system shall protect sensitive HR data through encryption during storage and transmission.                      |

|           |                         |                                                                                                                              |
|-----------|-------------------------|------------------------------------------------------------------------------------------------------------------------------|
| FR-DA-090 | Data Privacy Compliance | The system shall ensure compliance with data privacy regulations and organizational policies.                                |
| FR-DA-091 | Data Governance         | The system shall support data governance policies including data ownership, quality standards, and retention policies.       |
| FR-DA-092 | Data Lineage            | The system shall maintain complete data lineage to trace analytics data back to source systems.                              |
| FR-DA-093 | User Activity Logging   | The system shall log all user activities including report generation, data access, and exports.                              |
| FR-DA-094 | Data Retention          | The system shall support configurable data retention policies in accordance with organizational and regulatory requirements. |

## Cross-Module Integration Requirements

### Workforce Planning Module Integration

- **FR-DA-INT-001 | Workforce Planning to Analytics:** The system shall receive workforce planning data including approved establishments, planned hires, and workforce cost estimates for workforce analytics and planning reports.
- **FR-DA-INT-002 | Analytics to Workforce Planning:** The system shall provide historical workforce data and trend analysis to inform workforce planning decisions.

### Recruitment and Selection Module Integration

- **FR-DA-INT-003 | Recruitment to Analytics:** The system shall receive recruitment data including vacancy postings, applications, screening results, assessment scores, and hiring decisions for recruitment analytics.
- **FR-DA-INT-004 | Analytics to Recruitment:** The system shall provide recruitment effectiveness metrics and candidate pipeline analysis to the Recruitment Module.

### Employee Master Data Module Integration

- **FR-DA-INT-005 | Employee Master Data to Analytics:** The system shall receive all employee demographic, organizational, and employment data for workforce analytics.
- **FR-DA-INT-006 | Analytics to Employee Master Data:** The system shall provide workforce insights and analytics to inform employee data management decisions.

### Attendance Management Module Integration

- **FR-DA-INT-007 | Attendance to Analytics:** The system shall receive attendance data including check-in/check-out records, attendance patterns, and attendance violations for attendance analytics.
- **FR-DA-INT-008 | Analytics to Attendance:** The system shall provide attendance pattern insights to inform attendance policy and management decisions.

### Leave Management Module Integration

- **FR-DA-INT-009 | Leave to Analytics:** The system shall receive leave data including leave requests, approvals, balances, and leave utilization for leave analytics.
- **FR-DA-INT-010 | Analytics to Leave:** The system shall provide leave utilization trends and patterns to inform leave policy and management decisions.

### Separation and Off-boarding Module Integration

- **FR-DA-INT-011 | Separation to Analytics:** The system shall receive separation data including separation reasons, clearance status, and separation payments for separation analytics.
- **FR-DA-INT-012 | Analytics to Separation:** The system shall provide separation trends and exit interview insights to inform retention strategies.

### Payroll Module Integration

- **FR-DA-INT-013 | Payroll to Analytics:** The system shall receive payroll data including salary, benefits, deductions, and compensation information for compensation analytics.
- **FR-DA-INT-014 | Analytics to Payroll:** The system shall provide compensation insights and benchmarks to inform payroll and compensation decisions.

### Discipline Management Module Integration

- **FR-DA-INT-015 | Discipline to Analytics:** The system shall receive discipline data including offense types, penalty levels, and disciplinary outcomes for discipline analytics.
- **FR-DA-INT-016 | Analytics to Discipline:** The system shall provide discipline trends and pattern analysis to inform policy and management decisions.

### Competency Management Module Integration

- **FR-DA-INT-017 | Competency to Analytics:** The system shall receive competency assessment data, proficiency levels, and IDP progress for competency analytics.
- **FR-DA-INT-018 | Analytics to Competency:** The system shall provide competency gap analysis and development insights to inform competency management decisions.

### RSSA Module Integration

- **FR-DA-INT-019 | RSSA to Analytics:** The system shall receive RSSA data including loan applications, approvals, repayments, and balances for RSSA analytics.
- **FR-DA-INT-020 | Analytics to RSSA:** The system shall provide RSSA portfolio insights and risk analysis to inform RSSA management decisions.

### Employee Self-Service (ESS) Module Integration

- **FR-DA-INT-021 | ESS to Analytics:** The system shall receive ESS usage data and employee feedback for engagement analytics.
- **FR-DA-INT-022 | Analytics to ESS:** The system shall provide employee insights and engagement metrics to inform ESS improvement decisions.

### Survey and Feedback Module Integration

- **FR-DA-INT-023 | Survey to Analytics:** The system shall receive survey responses and feedback data for employee engagement and satisfaction analytics.
- **FR-DA-INT-024 | Analytics to Survey:** The system shall provide survey insights and trend analysis to inform survey design and improvement initiatives.

### Performance Management Module Integration

- **FR-DA-INT-025 | Performance to Analytics:** The system shall receive performance rating data from the Performance Management System (PMS) for performance analytics.
- **FR-DA-INT-026 | Analytics to Performance:** The system shall provide performance insights and rating distribution analysis to inform performance management decisions.

### HR Portal Module Integration

- **FR-DA-INT-027 | HR Portal to Analytics:** The system shall receive portal usage data, content engagement metrics, and user interaction data for HR communications analytics.
- **FR-DA-INT-028 | Analytics to HR Portal:** The system shall provide analytics and insights for display on the HR Portal dashboards and reports.

## **23. Application Tracking System (ATS)**

### **23.1 Introduction**

The Application Tracking System (ATS) shall serve as the external-facing gateway for all recruitment activities, providing a seamless, user-friendly platform for external candidates to discover, apply for, and track their applications for job vacancies at Bunna Bank. The ATS shall be fully integrated with the Recruitment Module, enabling automatic vacancy publication, candidate data capture, intelligent screening and shortlisting, application tracking, and comprehensive communication management.

The ATS shall provide external candidates with a modern, intuitive experience that reflects the Bank's brand and values. Candidates shall be able to create profiles, upload documents, apply for positions, track application status, and receive communications through a single platform. The system shall capture comprehensive candidate data that feeds directly into the Recruitment Module for screening, assessment, and selection processes.

The system shall also serve as a powerful talent acquisition tool for HR administrators, providing intelligent candidate matching, automated shortlisting, bulk communication capabilities, and comprehensive reporting on recruitment effectiveness.

### **23.2 Purpose**

The purpose of the Application Tracking System shall be to provide a seamless, user-friendly platform for external candidates to discover, apply for, and track their applications for job vacancies at Bunna Bank. The system shall streamline the external recruitment process by automating vacancy publication, candidate data capture, intelligent screening and shortlisting, application tracking, and comprehensive communication management. The ATS shall enhance the candidate experience, improve recruitment efficiency, and provide HR administrators with powerful tools for talent acquisition and management.

### **23.3 Business Rules**

The Application Tracking System shall operate under the following business rules:

## **Candidate Registration and Profile Management**

- All external candidates shall be required to register and create a profile before applying for any vacancy.
- Candidate profiles shall capture comprehensive information including personal details, contact information, education history, work experience, professional certifications, language skills, and other relevant qualifications.
- Candidates shall be able to log in to their profiles at any time to update information, apply for new vacancies, and track application status.
- Candidate data shall be stored securely and shall be accessible only to authorized HR personnel.
- Candidates shall have the ability to delete their profiles and data in accordance with data privacy regulations.

## **Vacancy Publication and Application**

- All approved external vacancies shall be automatically published to the ATS from the Recruitment Module.
- Vacancy postings shall display comprehensive information including position title, grade, location, job description, qualifications, requirements, and closing date.
- Candidates shall be able to apply for vacancies by submitting a cover letter along with their profile information.
- Candidates shall not be required to re-enter their personal information for subsequent applications; they shall only need to submit a cover letter specific to the position.
- The system shall automatically validate candidate eligibility against minimum qualification requirements before allowing application submission.

## **Intelligent Screening and Shortlisting**

- The system shall provide intelligent candidate screening and shortlisting based on configurable criteria.

- First-stage shortlisting shall be performed automatically by the system based on the candidate's profile data against the job requirements.
- The screening criteria shall be configurable by HR administrators and shall include qualifications, experience, skills, certifications, and other job-specific requirements.
- Shortlisted candidates shall be automatically forwarded to the Recruitment Module for further processing.

### **Application Tracking and Communication**

- Candidates shall be able to track their application status through the ATS dashboard.
- The system shall display the current status of each application and the next steps in the recruitment process.
- Candidates shall receive automatic notifications on application status changes.
- HR administrators shall be able to send bulk communications to candidates for various recruitment activities.

### **System Administration and User Interface**

- HR administrators shall have full control over ATS configuration including vacancy templates, screening criteria, communication templates, and user permissions.
- The system shall provide an intuitive and user-friendly interface for both recruiters and candidates.
- The system shall support mobile accessibility to manage recruitment on the go.
- Administrators shall be able to post news and announcements related to vacancies, recruitment, and business updates.
- The system shall maintain complete audit trails of all ATS activities.

### **Data Management**

- The system shall support import and export of candidate information, resumes, and other relevant data between the ATS, ERP, and other systems.

- The system shall provide full search functionality within the system to find resumes, candidate profiles, and job postings based on various criteria and keywords.

## 23.4 Functional Requirements

### Candidate Registration and Profile Management

| FR ID      | Requirement                  | Description                                                                                                                                                                                                                                                                                      |
|------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-001 | Candidate Registration       | The system shall allow external candidates to register and create an account by providing a valid email address and creating a password.                                                                                                                                                         |
| FR-ATS-002 | Profile Creation             | The system shall require candidates to create a comprehensive profile before applying for any vacancy. Profile fields shall include: Personal Information, Contact Details, Education History, Work Experience, Professional Certifications, Language Skills, and Other Relevant Qualifications. |
| FR-ATS-003 | Profile Edit                 | The system shall allow candidates to edit and update their profile information at any time after registration.                                                                                                                                                                                   |
| FR-ATS-004 | Profile Completion Status    | The system shall display profile completion status and indicate which sections are incomplete.                                                                                                                                                                                                   |
| FR-ATS-005 | Secure Login                 | The system shall require candidates to log in using their registered email and password to access their profile and apply for vacancies.                                                                                                                                                         |
| FR-ATS-006 | Password Management          | The system shall support password reset and recovery functionality for candidates who forget their passwords.                                                                                                                                                                                    |
| FR-ATS-007 | Profile Data Storage         | The system shall securely store all candidate profile data in the system database for future applications and reference.                                                                                                                                                                         |
| FR-ATS-008 | Duplicate Profile Prevention | The system shall prevent the creation of duplicate candidate profiles by validating email addresses and other unique identifiers.                                                                                                                                                                |
| FR-ATS-009 | Profile Deletion             | The system shall allow candidates to request deletion of their profile and associated data in compliance with data privacy regulations.                                                                                                                                                          |

## Vacancy Publication and Display

| FR ID       | Requirement                   | Description                                                                                                                                                                                                                                        |
|-------------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-010  | Automatic Vacancy Publication | Upon approval in the Recruitment Module, the system shall automatically publish external vacancies to the ATS.                                                                                                                                     |
| FR-ATS-011  | Vacancy Display               | The system shall display vacancies with comprehensive information including: Position Title, Grade, Location, Opening Date, Closing Date, Job Description, Qualifications, Experience Requirements, Skills Required, and Application Instructions. |
| FR-ATS-012  | Vacancy List                  | The system shall provide a searchable and filterable list of all open vacancies.                                                                                                                                                                   |
| FR-ATS-013  | Vacancy Filtering             | The system shall allow candidates to filter vacancies by location, position type, grade, department, and closing date.                                                                                                                             |
| FR-ATS-014  | Vacancy Search                | The system shall provide search functionality for vacancies by keyword, title, and location.                                                                                                                                                       |
| FR-ATS-015  | Vacancy Detail View           | The system shall allow candidates to click on a vacancy to view complete details.                                                                                                                                                                  |
| FR-ATS-016  | Vacancy Status Indicators     | The system shall display clear status indicators for each vacancy including Open, Closing Soon, and Closed.                                                                                                                                        |
| FR-ATS-017  | Automatic Vacancy Removal     | The system shall automatically remove vacancies from public view upon the closing date.                                                                                                                                                            |
| FR-ATS-018  | Featured Vacancies            | The system shall allow administrators to feature specific vacancies for prominent display.                                                                                                                                                         |
| FR-ATS-018A | Job Board Posting             | The system shall automatically post job listings to multiple free job boards to increase visibility and attract a larger pool of candidates.                                                                                                       |
| FR-ATS-018B | Social Media Recruiting       | The system shall support social media recruiting features, utilizing platforms like LinkedIn, Facebook, and Twitter to advertise job openings and engage with potential candidates.                                                                |

### Application Submission and Management

| FR ID      | Requirement                      | Description                                                                                                                                    |
|------------|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-019 | Application Submission           | The system shall allow registered candidates to apply for vacancies by clicking the "Apply Now" button on a vacancy posting.                   |
| FR-ATS-020 | Cover Letter Submission          | The system shall require candidates to submit a cover letter specific to the position when applying.                                           |
| FR-ATS-021 | Profile Data Integration         | The system shall automatically populate application forms with the candidate's profile data, eliminating the need for re-entering information. |
| FR-ATS-022 | Document Attachment              | The system shall allow candidates to upload supporting documents including CV/resume, certificates, and other relevant documents.              |
| FR-ATS-023 | Application Confirmation         | The system shall provide immediate confirmation upon successful application submission.                                                        |
| FR-ATS-024 | Duplicate Application Prevention | The system shall prevent candidates from submitting duplicate applications for the same vacancy.                                               |
| FR-ATS-025 | Application History              | The system shall maintain a complete history of all applications submitted by the candidate.                                                   |
| FR-ATS-026 | Application Withdrawal           | The system shall allow candidates to withdraw their application before the closing date.                                                       |

### Intelligent Candidate Screening and Shortlisting

| FR ID      | Requirement                      | Description                                                                                                                                                                                                                               |
|------------|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-027 | Automated Screening              | The system shall automatically screen candidates against job requirements based on their profile data.                                                                                                                                    |
| FR-ATS-028 | Screening Criteria Configuration | The system shall allow HR administrators to configure screening criteria for each vacancy including: Minimum Education Level, Minimum Years of Experience, Required Certifications, Required Skills, and Other Job-Specific Requirements. |

|            |                          |                                                                                                                                          |
|------------|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-029 | Candidate Matching Score | The system shall calculate and display a matching score for each candidate based on how well their profile matches the job requirements. |
| FR-ATS-030 | Automatic Shortlisting   | The system shall automatically shortlist candidates who meet the minimum screening criteria.                                             |
| FR-ATS-031 | Manual Shortlisting      | The system shall allow HR administrators to manually shortlist or reject candidates based on review.                                     |
| FR-ATS-032 | Shortlist Management     | The system shall provide a dedicated shortlist management interface for HR administrators.                                               |
| FR-ATS-033 | Shortlist Integration    | The system shall automatically forward shortlisted candidates to the Recruitment Module for further processing.                          |

### Application Tracking and Status Management

| FR ID      | Requirement            | Description                                                                                                                                                                                                                                                                    |
|------------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-034 | Application Dashboard  | The system shall provide candidates with a dashboard displaying all their applications with current status.                                                                                                                                                                    |
| FR-ATS-035 | Status Display         | The system shall display clear status indicators for each application including: Application Submitted, Under Review, Shortlisted, Invited for Exam, Exam Completed, Invited for Interview, Interview Completed, Offer Extended, Offer Accepted, Offer Declined, Not Selected. |
| FR-ATS-036 | Status Updates         | The system shall automatically update application status based on actions taken in the Recruitment Module.                                                                                                                                                                     |
| FR-ATS-037 | Next Steps Display     | The system shall display the next steps in the recruitment process for each application.                                                                                                                                                                                       |
| FR-ATS-038 | Application Timeline   | The system shall display a timeline of all activities related to each application.                                                                                                                                                                                             |
| FR-ATS-039 | Vacancy Status Display | The system shall display the current status of the vacancy (Open, Under Review, Closed, Filled) for each application.                                                                                                                                                          |

### Candidate Communication Management

| FR ID      | Requirement                 | Description                                                                                                                                |
|------------|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-040 | Application Confirmation    | The system shall automatically send confirmation emails upon successful application submission.                                            |
| FR-ATS-041 | Status Update Notifications | The system shall automatically notify candidates when their application status changes.                                                    |
| FR-ATS-042 | Bulk Communication          | The system shall allow HR administrators to send bulk communications to candidates based on application status, vacancy, or other filters. |
| FR-ATS-043 | Individual Communication    | The system shall allow HR administrators to send individual communications to candidates.                                                  |
| FR-ATS-044 | Communication Templates     | The system shall provide predefined communication templates for common recruitment communications.                                         |
| FR-ATS-045 | Template Management         | The system shall allow administrators to create, edit, and manage communication templates.                                                 |
| FR-ATS-046 | Communication History       | The system shall maintain a complete history of all communications sent to candidates.                                                     |
| FR-ATS-047 | Communication Channels      | The system shall support communication through email and SMS where applicable.                                                             |

### Admin and Content Management

| FR ID      | Requirement          | Description                                                                                                |
|------------|----------------------|------------------------------------------------------------------------------------------------------------|
| FR-ATS-048 | Admin Dashboard      | The system shall provide HR administrators with a comprehensive dashboard showing ATS performance metrics. |
| FR-ATS-049 | Vacancy Management   | The system shall allow administrators to create, edit, and manage vacancy postings.                        |
| FR-ATS-050 | Candidate Management | The system shall allow administrators to view, search, and manage candidate profiles.                      |

|            |                           |                                                                                                                                                       |
|------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-051 | News and Posts Management | The system shall allow administrators to create, publish, and manage news and posts related to vacancies, recruitment, and business updates.          |
| FR-ATS-052 | News Display              | The system shall display news and posts on the ATS homepage and dedicated news section.                                                               |
| FR-ATS-053 | Post Types                | The system shall support multiple post types including: Recruitment News, Vacancy Announcements, Business Updates, Events, and General Announcements. |
| FR-ATS-054 | Post Scheduling           | The system shall allow administrators to schedule posts for future publication.                                                                       |
| FR-ATS-055 | Post Expiry               | The system shall automatically remove posts after the configured expiry date.                                                                         |
| FR-ATS-056 | Featured Posts            | The system shall allow administrators to feature specific posts for prominent display.                                                                |

### System Configuration and Administration

| FR ID      | Requirement                      | Description                                                                                     |
|------------|----------------------------------|-------------------------------------------------------------------------------------------------|
| FR-ATS-057 | Role-Based Access Control        | The system shall enforce role-based access control for all ATS administrative functions.        |
| FR-ATS-058 | Screening Criteria Configuration | The system shall allow administrators to configure and manage screening criteria for vacancies. |
| FR-ATS-059 | Vacancy Templates                | The system shall provide predefined vacancy templates for common positions.                     |
| FR-ATS-060 | Template Management              | The system shall allow administrators to create, edit, and manage vacancy templates.            |
| FR-ATS-061 | Audit Trail                      | The system shall maintain complete audit trails of all ATS activities.                          |
| FR-ATS-062 | User Management                  | The system shall allow administrators to manage user accounts and permissions.                  |

### Reporting and Analytics

| FR ID      | Requirement             | Description                                                                                              |
|------------|-------------------------|----------------------------------------------------------------------------------------------------------|
| FR-ATS-063 | Application Analytics   | The system shall provide analytics on application volumes, trends, and conversion rates.                 |
| FR-ATS-064 | Candidate Analytics     | The system shall provide analytics on candidate demographics, qualifications, and sources.               |
| FR-ATS-065 | Vacancy Performance     | The system shall provide analytics on vacancy performance including views, applications, and fill rates. |
| FR-ATS-066 | Screening Effectiveness | The system shall provide analytics on screening effectiveness and shortlisting rates.                    |
| FR-ATS-067 | Report Export           | The system shall allow authorized users to export analytics reports in PDF, Excel, and CSV formats.      |

### Security and Audit

| FR ID      | Requirement             | Description                                                                                                                                       |
|------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-068 | Secure Data Storage     | The system shall securely store all candidate data with encryption at rest and in transit.                                                        |
| FR-ATS-069 | Access Control          | The system shall restrict access to candidate data to authorized HR personnel only.                                                               |
| FR-ATS-070 | Data Privacy Compliance | The system shall comply with applicable data privacy regulations and organizational policies.                                                     |
| FR-ATS-071 | Audit Trail             | The system shall maintain an immutable audit trail of all ATS activities including profile creation, application submissions, and status changes. |
| FR-ATS-072 | Session Management      | The system shall automatically terminate inactive user sessions after configurable periods of inactivity.                                         |

### Full Search Functionality

| FR ID      | Requirement          | Description                                                                                                                                                               |
|------------|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-073 | Comprehensive Search | The system shall enable comprehensive search capabilities within the system to find resumes, candidate profiles, and job postings based on various criteria and keywords. |

|            |                    |                                                                                                                                                   |
|------------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-074 | Candidate Search   | The system shall allow administrators to search candidate profiles by name, skills, experience, education, location, and other relevant criteria. |
| FR-ATS-075 | Resume Search      | The system shall allow administrators to search within resumes and CVs for specific keywords and qualifications.                                  |
| FR-ATS-076 | Job Posting Search | The system shall allow administrators and candidates to search job postings by title, location, department, and keywords.                         |
| FR-ATS-077 | Saved Searches     | The system shall allow administrators to save frequently used search criteria for quick access.                                                   |
| FR-ATS-078 | Search Filters     | The system shall provide advanced search filters to narrow down search results based on multiple criteria.                                        |

### Talent Pool Management

| FR ID      | Requirement                   | Description                                                                                                                                                                   |
|------------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-ATS-079 | Centralized Talent Database   | The system shall maintain a centralized database of candidates who may not be a fit for current roles but have potential for future openings.                                 |
| FR-ATS-080 | Candidate Categorization      | The system shall organize candidates into different categories or pools based on skills, experience, job preferences, or other criteria.                                      |
| FR-ATS-081 | Candidate Engagement          | The system shall support sending regular updates, newsletters, or job alerts to candidates within the talent pool to keep them engaged and informed.                          |
| FR-ATS-082 | Talent Pool Search and Filter | The system shall provide easy search and filter capabilities for the talent pool to quickly identify candidates who meet specific job requirements.                           |
| FR-ATS-083 | Integration with Recruitment  | The talent pool shall be seamlessly integrated with the overall recruitment process, enabling recruiters to quickly move candidates from the pool to active job requisitions. |
| FR-ATS-084 | Talent Pool Analytics         | The system shall provide analytics on talent pool composition, engagement metrics, and conversion rates.                                                                      |

## **24. Enterprise HR Dashboard**

### **24.1 Introduction**

The Enterprise HR Dashboard shall provide a centralized, real-time visualization platform for monitoring key HR performance indicators and metrics across the entire organization. The dashboard shall consolidate data from all HR modules to provide HR administrators, managers, and senior leadership with a comprehensive, at-a-glance view of workforce health, operational performance, and strategic HR metrics.

The dashboard shall be fully configurable, allowing users to customize views based on their roles and responsibilities, and shall support drill-down capabilities for deeper analysis. The system shall provide intuitive visualizations including charts, graphs, heat maps, and trend lines that transform complex HR data into actionable insights.

### **24.2 Purpose**

The purpose of the Enterprise HR Dashboard shall be to provide a centralized, real-time visualization platform for monitoring key HR performance indicators and metrics across the entire organization. The dashboard shall consolidate data from all HR modules to provide HR administrators, managers, and senior leadership with a comprehensive, at-a-glance view of workforce health, operational performance, and strategic HR metrics. The dashboard shall support informed decision-making, proactive issue identification, and continuous improvement of HR services.

### **24.3 Business Rules**

The Enterprise HR Dashboard shall operate under the following business rules:

## **KPI Configuration and Management**

- All KPIs displayed on the dashboard shall be configurable by authorized HR administrators.
- KPIs shall be categorized by functional area including Workforce, Recruitment, Attendance, Leave, Payroll, Discipline, Competency, and Engagement.
- Each KPI shall have defined calculation logic, data source, update frequency, and target thresholds.
- KPIs shall support both current period and historical comparison views.
- KPI targets and thresholds shall be configurable based on organizational goals and industry benchmarks.

## **Data Integration and Visualization**

- Dashboard data shall be sourced from all integrated HR modules in real-time.
- Data shall be automatically updated at configurable intervals.
- Visualizations shall support multiple chart types including bar charts, line graphs, pie charts, heat maps, and gauge charts.
- Dashboards shall support drill-down capabilities for deeper analysis.
- Visualizations shall be interactive and responsive across devices.

## **Access and Security**

- Dashboard access shall be role-based, with different views for HR administrators, managers, and senior leadership.
- Sensitive data shall be masked or restricted based on user permissions.
- All dashboard access and interactions shall be logged for audit purposes.

### **24.4 Functional Requirements**

#### **KPI Configuration and Management**

| FR ID       | Requirement           | Description                                                                                                                                 |
|-------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DASH-001 | KPI Library           | The system shall provide a comprehensive library of predefined HR KPIs organized by functional area.                                        |
| FR-DASH-002 | KPI Creation          | The system shall allow authorized administrators to create new KPIs with defined calculation logic, data source, and visualization type.    |
| FR-DASH-003 | KPI Editing           | The system shall allow authorized administrators to edit existing KPIs, including calculation logic, targets, and display settings.         |
| FR-DASH-004 | KPI Deactivation      | The system shall allow administrators to deactivate KPIs that are no longer relevant while preserving historical data.                      |
| FR-DASH-005 | KPI Categorization    | The system shall allow administrators to categorize KPIs by functional area, department, and organizational level.                          |
| FR-DASH-006 | KPI Targets           | The system shall allow administrators to define target values and thresholds for each KPI.                                                  |
| FR-DASH-007 | KPI Weighting         | The system shall allow administrators to assign weights to KPIs for composite score calculations.                                           |
| FR-DASH-008 | KPI Refresh Frequency | The system shall allow administrators to configure the refresh frequency for each KPI based on data availability and business requirements. |

### Workforce Planning and Demographics KPIs

| FR ID       | Requirement              | Description                                                                                                     |
|-------------|--------------------------|-----------------------------------------------------------------------------------------------------------------|
| FR-DASH-009 | Total Headcount          | The dashboard shall display total employee headcount with breakdown by department, branch, and employment type. |
| FR-DASH-010 | Workforce Growth Rate    | The dashboard shall display workforce growth rate compared to previous periods.                                 |
| FR-DASH-011 | Demographic Distribution | The dashboard shall display demographic distribution including age, gender, education, and nationality.         |

|             |                              |                                                                                                             |
|-------------|------------------------------|-------------------------------------------------------------------------------------------------------------|
| FR-DASH-012 | Organizational Structure     | The dashboard shall display organizational structure with headcount per department and reporting hierarchy. |
| FR-DASH-013 | Vacancy Rate                 | The dashboard shall display vacancy rates by department and position.                                       |
| FR-DASH-014 | Turnover Rate                | The dashboard shall display turnover rates by department, location, and reason for separation.              |
| FR-DASH-015 | Employee Tenure Distribution | The dashboard shall display employee tenure distribution by length of service.                              |

### Recruitment and Talent Acquisition KPIs

| FR ID       | Requirement                 | Description                                                                                              |
|-------------|-----------------------------|----------------------------------------------------------------------------------------------------------|
| FR-DASH-016 | Time-to-Fill                | The dashboard shall display average time-to-fill for vacancies by position and department.               |
| FR-DASH-017 | Cost-per-Hire               | The dashboard shall display average cost-per-hire by source and position.                                |
| FR-DASH-018 | Application Volume          | The dashboard shall display application volumes by source, position, and period.                         |
| FR-DASH-019 | Offer Acceptance Rate       | The dashboard shall display offer acceptance rates by position and location.                             |
| FR-DASH-020 | Source Effectiveness        | The dashboard shall display source effectiveness metrics including application to hire conversion rates. |
| FR-DASH-021 | Internal vs. External Hires | The dashboard shall display the ratio of internal versus external hires.                                 |
| FR-DASH-022 | Recruitment Funnel          | The dashboard shall display recruitment funnel metrics from application to hire.                         |
| FR-DASH-023 | Vacancy Fill Rate           | The dashboard shall display vacancy fill rates against targets.                                          |

### Attendance and Leave KPIs

| FR ID       | Requirement     | Description                                                                      |
|-------------|-----------------|----------------------------------------------------------------------------------|
| FR-DASH-024 | Attendance Rate | The dashboard shall display overall attendance rates by department and location. |

|             |                       |                                                                                               |
|-------------|-----------------------|-----------------------------------------------------------------------------------------------|
| FR-DASH-025 | Absenteeism Rate      | The dashboard shall display absenteeism rates by department, location, and employee category. |
| FR-DASH-026 | Late Arrival Rate     | The dashboard shall display late arrival rates and trends.                                    |
| FR-DASH-027 | Leave Utilization     | The dashboard shall display leave utilization rates by leave type and department.             |
| FR-DASH-028 | Leave Balance Summary | The dashboard shall display summary of leave balances including high-risk leave balances.     |
| FR-DASH-029 | Sick Leave Trends     | The dashboard shall display sick leave trends and patterns.                                   |
| FR-DASH-030 | Overtime Analysis     | The dashboard shall display overtime hours and costs by department.                           |
| FR-DASH-031 | Force Checkout Rate   | The dashboard shall display force checkout rates and trends.                                  |

### Payroll and Compensation KPIs

| FR ID       | Requirement             | Description                                                                    |
|-------------|-------------------------|--------------------------------------------------------------------------------|
| FR-DASH-032 | Payroll Cost Summary    | The dashboard shall display total payroll costs by department and cost center. |
| FR-DASH-033 | Salary Distribution     | The dashboard shall display salary distribution by grade and department.       |
| FR-DASH-034 | Compensation Ratio      | The dashboard shall display compensation ratios and benchmarks.                |
| FR-DASH-035 | Benefits Utilization    | The dashboard shall display benefits utilization rates and costs.              |
| FR-DASH-036 | Salary Increment Trends | The dashboard shall display salary increment trends and patterns.              |
| FR-DASH-037 | Payroll Variance        | The dashboard shall display payroll variances against budget.                  |

### Discipline and Separation KPIs

| FR ID       | Requirement      | Description                                                                         |
|-------------|------------------|-------------------------------------------------------------------------------------|
| FR-DASH-038 | Discipline Cases | The dashboard shall display discipline case volumes by type, level, and department. |

|             |                         |                                                                               |
|-------------|-------------------------|-------------------------------------------------------------------------------|
| FR-DASH-039 | Discipline Trends       | The dashboard shall display discipline case trends over time.                 |
| FR-DASH-040 | Separation Rate         | The dashboard shall display separation rates by type, reason, and department. |
| FR-DASH-041 | Separation Cost         | The dashboard shall display separation costs by type and department.          |
| FR-DASH-042 | Exit Interview Insights | The dashboard shall display key insights from exit interviews.                |

### Competency and Development KPIs

| FR ID       | Requirement             | Description                                                                    |
|-------------|-------------------------|--------------------------------------------------------------------------------|
| FR-DASH-043 | Competency Coverage     | The dashboard shall display competency coverage rates across the organization. |
| FR-DASH-044 | Competency Gap Analysis | The dashboard shall display competency gaps by department and role.            |
| FR-DASH-045 | Training Participation  | The dashboard shall display training participation and completion rates.       |
| FR-DASH-046 | IDP Completion Rate     | The dashboard shall display Individual Development Plan completion rates.      |
| FR-DASH-047 | Promotion Rate          | The dashboard shall display promotion rates by department and grade.           |
| FR-DASH-048 | Talent Pipeline Health  | The dashboard shall display talent pipeline health and succession readiness.   |

### Employee Engagement and Experience KPIs

| FR ID       | Requirement                 | Description                                                          |
|-------------|-----------------------------|----------------------------------------------------------------------|
| FR-DASH-049 | Employee Engagement Score   | The dashboard shall display employee engagement scores and trends.   |
| FR-DASH-050 | Employee Satisfaction Score | The dashboard shall display employee satisfaction scores and trends. |
| FR-DASH-051 | Survey Participation Rate   | The dashboard shall display survey participation rates and trends.   |

|             |                      |                                                                       |
|-------------|----------------------|-----------------------------------------------------------------------|
| FR-DASH-052 | Feedback Volume      | The dashboard shall display employee feedback volumes and categories. |
| FR-DASH-053 | HR Portal Engagement | The dashboard shall display HR Portal usage and engagement metrics.   |

### RSSA and Financial KPIs

| FR ID       | Requirement             | Description                                                                                         |
|-------------|-------------------------|-----------------------------------------------------------------------------------------------------|
| FR-DASH-054 | RSSA Portfolio          | The dashboard shall display RSSA portfolio summary including outstanding balances and active loans. |
| FR-DASH-055 | RSSA Default Rate       | The dashboard shall display RSSA default rates and trends.                                          |
| FR-DASH-056 | RSSA Application Trends | The dashboard shall display RSSA application trends and approval rates.                             |

### Dashboard Configuration and Personalization

| FR ID       | Requirement                    | Description                                                                                            |
|-------------|--------------------------------|--------------------------------------------------------------------------------------------------------|
| FR-DASH-057 | Dashboard Layout Configuration | The system shall allow administrators to configure dashboard layouts with drag-and-drop functionality. |
| FR-DASH-058 | Widget Management              | The system shall allow administrators to add, remove, and configure dashboard widgets.                 |
| FR-DASH-059 | Personal Dashboard             | The system shall allow users to create and save personalized dashboard configurations.                 |
| FR-DASH-060 | Multiple Dashboards            | The system shall allow users to create and manage multiple dashboards for different purposes.          |
| FR-DASH-061 | Dashboard Sharing              | The system shall allow users to share dashboards with other authorized users.                          |
| FR-DASH-062 | Dashboard Export               | The system shall allow users to export dashboards in PDF format for reporting purposes.                |

### Drill-Down and Analysis Capabilities

| FR ID | Requirement | Description |
|-------|-------------|-------------|
|-------|-------------|-------------|

|             |                         |                                                                                                   |
|-------------|-------------------------|---------------------------------------------------------------------------------------------------|
| FR-DASH-063 | Drill-Down to Source    | The system shall allow users to drill down from dashboard KPIs to underlying source data.         |
| FR-DASH-064 | Drill-Down by Dimension | The system shall allow users to drill down by department, location, period, and other dimensions. |
| FR-DASH-065 | Trend Analysis          | The system shall provide trend analysis capabilities for all KPIs.                                |
| FR-DASH-066 | Comparative Analysis    | The system shall support comparative analysis across periods, departments, and employee groups.   |
| FR-DASH-067 | What-If Analysis        | The system shall support what-if analysis capabilities where applicable.                          |

### Alert and Notification Management

| FR ID       | Requirement               | Description                                                                                              |
|-------------|---------------------------|----------------------------------------------------------------------------------------------------------|
| FR-DASH-068 | KPI Threshold Alerts      | The system shall automatically generate alerts when KPIs exceed or fall below configured thresholds.     |
| FR-DASH-069 | Alert Configuration       | The system shall allow administrators to configure alert rules, thresholds, and notification recipients. |
| FR-DASH-070 | Alert Display             | The system shall display alerts prominently on the dashboard.                                            |
| FR-DASH-071 | Alert Escalation          | The system shall support escalation of alerts based on severity and business rules.                      |
| FR-DASH-072 | Alert Resolution Tracking | The system shall track and log alert resolution activities.                                              |

### Security and Audit

| FR ID       | Requirement               | Description                                                                                     |
|-------------|---------------------------|-------------------------------------------------------------------------------------------------|
| FR-DASH-073 | Role-Based Access Control | The system shall enforce role-based access control for all dashboard views and functionalities. |
| FR-DASH-074 | Data Segmentation         | The system shall restrict data visibility based on user roles and organizational hierarchy.     |

|             |                        |                                                                                                                           |
|-------------|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| FR-DASH-075 | Sensitive Data Masking | The system shall mask sensitive data fields from unauthorized users.                                                      |
| FR-DASH-076 | Audit Trail            | The system shall maintain an audit trail of all dashboard activities including views, exports, and configuration changes. |
| FR-DASH-077 | Data Encryption        | The system shall protect dashboard data through encryption during storage and transmission.                               |

## 25. HR Portal and Communications Management

### 25.1 Introduction

The HR Portal shall serve as the centralized digital gateway and user interface for all HR-related information, services, and communications within the ERP HR ecosystem. The portal shall provide employees, managers, and external candidates with a single, unified access point to interact with the Bank's HR services, access information, view vacancies, receive communications, and navigate to various ERP HR modules.

The HR Portal shall be fully configurable and shall be administered by authorized HR personnel, enabling efficient content management, vacancy publication, news dissemination, and employee engagement. The portal shall integrate seamlessly with all ERP HR modules, providing users with a consistent and intuitive experience across the entire HR service landscape.

### 25.2 Purpose

The purpose of the HR Portal shall be to:

- Provide a centralized, user-friendly digital gateway for all HR-related information, services, and communications.
- Serve as the primary user interface for employees, managers, and external candidates to access ERP HR services.
- Streamline the publication and management of HR news, announcements, policies, and updates.
- Enable efficient and transparent vacancy posting and recruitment communication.

- Enhance employee engagement through accessible and timely HR communications.
- Provide configurable content management capabilities for HR administrators.
- Ensure consistent branding and user experience across all HR touchpoints.
- Enable tracking and analytics of content engagement and portal usage.
- Support organizational culture and employee experience initiatives.

### **25.3 Business Rules**

The HR Portal shall operate under the following business rules:

#### **Portal Administration and Content Management**

- All content published on the HR Portal shall be reviewed and approved by authorized HR administrators before publication.
- Content shall be categorized by type (News, Announcement, Policy Update, Event, etc.) for efficient organization and retrieval.
- Content shall have defined publication dates and expiry dates to ensure information remains current and relevant.
- The latest five (5) news items shall be prominently displayed on the front page, with older items accessible through a "See More" or "View All" function.
- Content shall support rich media including images, documents, videos, and hyperlinks.
- All content updates shall be logged with timestamp, user ID, and change details for audit purposes.

#### **Vacancy Posting**

- All approved vacancies shall be automatically published to the HR Portal upon approval in the Recruitment Module.
- Vacancy postings shall display standardized information including position title, grade, location, closing date, and application instructions.
- Vacancy postings shall be automatically removed from the portal upon the closing date.

- External applicants shall be able to view vacancy postings without requiring login credentials.
- Internal employees shall be able to view and apply for vacancies through the portal using their ERP credentials.

### **User Access and Permissions**

- All employees shall have access to the HR Portal through the ERP dashboard and Employee Self-Service (ESS) portal.
- External users shall have access to view vacancy postings and public HR information without login credentials.
- HR administrators shall have configurable permissions to create, edit, publish, and manage content.
- Content visibility shall be configurable based on employee role, department, branch, and other organizational attributes.
- Sensitive content shall be restricted to authorized employees only.

### **Quick Links and Navigation**

- The portal shall provide quick links to essential ERP HR modules and services including Leave Management, Attendance, Payroll, Performance Management, and Employee Self-Service.
- Quick links shall be configurable by HR administrators to reflect changing organizational priorities and service availability.
- Menus shall be organized logically and intuitively to enable efficient navigation.
- The portal shall support customizable dashboards based on employee role and preferences.

### **Design and Branding**

- The HR Portal shall maintain consistent branding with the Bank's corporate identity guidelines.
- The portal shall be responsive and accessible across desktop, tablet, and mobile devices.
- The portal shall support a clean, professional, and intuitive user interface.

## 25.4 Functional Requirements

### Portal Administration and Configuration

| FR ID      | Requirement                  | Description                                                                                                                                                          |
|------------|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-001 | Portal Administration Access | The system shall provide authorized HR administrators with access to the HR Portal administration interface through the ERP dashboard.                               |
| FR-HRP-002 | Portal Configuration         | The system shall allow HR administrators to configure portal settings including portal name, branding elements, color scheme, logo, favicon, and layout preferences. |
| FR-HRP-003 | Role-Based Access Control    | The system shall enforce role-based access control for portal administration, with defined permissions for content creation, editing, publishing, and management.    |
| FR-HRP-004 | User Permission Management   | The system shall allow HR administrators to define and manage user permissions for portal access, content visibility, and administrative functions.                  |
| FR-HRP-005 | Audit Trail                  | The system shall maintain an immutable audit trail of all portal administration activities including content creation, modification, publication, and deletion.      |

### Content Management

| FR ID      | Requirement      | Description                                                                                                                               |
|------------|------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-006 | Content Creation | The system shall allow authorized HR administrators to create content for publication on the HR Portal.                                   |
| FR-HRP-007 | Content Types    | The system shall support multiple content types including: <b>News, Announcement, Policy Update, Event, General Information, and FAQ.</b> |

|            |                           |                                                                                                                                                            |
|------------|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-008 | Content Categories        | The system shall allow administrators to define and manage content categories for efficient organization and retrieval.                                    |
| FR-HRP-009 | Content Fields            | Content creation shall support fields including: Title, Subtitle, Category, Content Body, Author, Publication Date, Expiry Date, Featured Image, and Tags. |
| FR-HRP-010 | Rich Text Editor          | The system shall provide a rich text editor for content creation, supporting formatting, images, videos, hyperlinks, tables, and embedded media.           |
| FR-HRP-011 | Content Preview           | The system shall allow administrators to preview content before publication to verify formatting and appearance.                                           |
| FR-HRP-012 | Content Approval Workflow | The system shall support configurable approval workflows for content publication, ensuring review by authorized approvers before content goes live.        |
| FR-HRP-013 | Content Publication       | The system shall allow administrators to publish content immediately or schedule publication for a future date and time.                                   |
| FR-HRP-014 | Content Expiry            | The system shall automatically remove or archive content upon reaching the configured expiry date.                                                         |
| FR-HRP-015 | Content Editing           | The system shall allow administrators to edit published content with version control and audit trail.                                                      |
| FR-HRP-016 | Content Archiving         | The system shall support archiving of content for historical reference while removing it from active display.                                              |
| FR-HRP-017 | Content Search            | The system shall provide search functionality for employees to find content by keyword, category, author, date range, and other filters.                   |
| FR-HRP-018 | Content Tagging           | The system shall allow administrators to tag content with keywords for improved searchability and categorization.                                          |

|            |                         |                                                                                                                                       |
|------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-019 | Featured Content        | The system shall allow administrators to feature specific content for prominent display on the portal homepage.                       |
| FR-HRP-020 | Content Version Control | The system shall maintain version history of all content changes, allowing administrators to revert to previous versions if required. |

### News and Announcements Display

| FR ID      | Requirement                  | Description                                                                                                                                      |
|------------|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-021 | Front Page News Display      | The system shall display the latest five (5) news items prominently on the HR Portal front page.                                                 |
| FR-HRP-022 | News Ordering                | The system shall display news items in reverse chronological order (newest first).                                                               |
| FR-HRP-023 | News Summary                 | The system shall display news item summaries on the front page including title, publication date, summary text, and featured image.              |
| FR-HRP-024 | Full Article View            | The system shall allow employees to click on a news item to view the full article with complete content and media.                               |
| FR-HRP-025 | See More / View All Function | The system shall provide a "See More" or "View All" button on the front page allowing employees to access all news items beyond the latest five. |
| FR-HRP-026 | News Archive                 | The system shall provide a news archive where employees can browse and search all published news items.                                          |
| FR-HRP-027 | News Pagination              | The system shall support pagination for news archives, with configurable items per page.                                                         |
| FR-HRP-028 | News Filtering               | The system shall allow employees to filter news by category, date range, author, and tags.                                                       |
| FR-HRP-029 | Featured News Banner         | The system shall allow administrators to feature specific news items as a banner or carousel on the homepage.                                    |

|            |                          |                                                                                           |
|------------|--------------------------|-------------------------------------------------------------------------------------------|
| FR-HRP-030 | News Expiry Notification | The system shall notify administrators when news items are approaching their expiry date. |
|------------|--------------------------|-------------------------------------------------------------------------------------------|

### Vacancy Posting and Management

| FR ID      | Requirement          | Description                                                                                                                                                                                                                  |
|------------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-031 | Vacancy Publication  | Upon approval in the Recruitment Module, the system shall automatically publish vacancy postings to the HR Portal.                                                                                                           |
| FR-HRP-032 | Vacancy Display      | The system shall display vacancy postings with standardized information including: Position Title, Grade, Location, Opening Date, Closing Date, Job Description, Qualifications, Application Instructions, and Requirements. |
| FR-HRP-033 | Vacancy List         | The system shall provide a dedicated vacancies section where employees and external users can view all open positions.                                                                                                       |
| FR-HRP-034 | Vacancy Filtering    | The system shall allow users to filter vacancies by location, position type, grade, department, and closing date.                                                                                                            |
| FR-HRP-035 | Vacancy Search       | The system shall provide search functionality for vacancies by keyword, title, location, and other criteria.                                                                                                                 |
| FR-HRP-036 | Vacancy Detail View  | The system shall allow users to click on a vacancy to view complete details including job description, qualifications, and application instructions.                                                                         |
| FR-HRP-037 | External Access      | The system shall allow external applicants to view vacancy postings without requiring login credentials.                                                                                                                     |
| FR-HRP-038 | Internal Application | The system shall allow internal employees to view and apply for vacancies through the portal using their ERP credentials.                                                                                                    |
| FR-HRP-039 | Vacancy Expiry       | The system shall automatically remove vacancy postings from the portal upon the closing date.                                                                                                                                |

|            |                           |                                                                                                |
|------------|---------------------------|------------------------------------------------------------------------------------------------|
| FR-HRP-040 | Vacancy Reminder          | The system shall display reminders for vacancies approaching their closing date.               |
| FR-HRP-041 | Vacancy Status Indicators | The system shall display vacancy status indicators including Open, Closing Soon, and Closed.   |
| FR-HRP-042 | Archived Vacancies        | The system shall maintain an archive of closed vacancies for reporting and reference purposes. |

### Quick Links and Navigation

| FR ID      | Requirement               | Description                                                                                                                                            |
|------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-043 | Quick Links Management    | The system shall allow HR administrators to create, edit, organize, and manage quick links on the HR Portal.                                           |
| FR-HRP-044 | Quick Link Types          | The system shall support multiple quick link types including: Internal Module Links, External URLs, Document Downloads, and System Functions.          |
| FR-HRP-045 | Quick Link Categorization | The system shall allow administrators to categorize quick links for organized display (e.g., Employee Services, Manager Services, HR Forms, Policies). |
| FR-HRP-046 | Quick Link Ordering       | The system shall allow administrators to define the display order of quick links.                                                                      |
| FR-HRP-047 | Quick Link Icons          | The system shall support the display of icons with quick links for improved visual navigation.                                                         |
| FR-HRP-048 | Menu Management           | The system shall allow administrators to define and manage portal menus including main navigation, footer menus, and sub-menus.                        |
| FR-HRP-049 | Menu Items                | The system shall allow administrators to create, edit, reorder, and delete menu items.                                                                 |
| FR-HRP-050 | Menu Visibility           | The system shall allow administrators to configure menu item visibility based on user role, department, or other attributes.                           |

|            |                        |                                                                                                                                                             |
|------------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-051 | Mega Menu Support      | The system shall support mega menu functionality for comprehensive navigation with multiple columns and categorized links.                                  |
| FR-HRP-052 | Personalized Dashboard | The system shall provide employees with a personalized dashboard showing relevant quick links, news, and notifications based on their role and preferences. |

### Employee Engagement and Interaction

| FR ID      | Requirement        | Description                                                                                                                        |
|------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-053 | Content Sharing    | The system shall allow employees to share HR Portal content via email or social media where applicable.                            |
| FR-HRP-054 | Content Comments   | The system shall allow administrators to enable comments on specific content types to facilitate employee engagement and feedback. |
| FR-HRP-055 | Content Rating     | The system shall allow employees to rate content usefulness to help improve content quality and relevance.                         |
| FR-HRP-056 | Employee Feedback  | The system shall provide a feedback mechanism for employees to submit suggestions or report issues with portal content.            |
| FR-HRP-057 | Event Calendar     | The system shall provide an event calendar displaying HR events, training sessions, and important dates.                           |
| FR-HRP-058 | Event Registration | The system shall allow employees to register for HR events through the portal with automated confirmation.                         |
| FR-HRP-059 | Polls and Surveys  | The system shall allow administrators to create and display polls and surveys on the HR Portal for employee feedback.              |
| FR-HRP-060 | FAQ Management     | The system shall provide a Frequently Asked Questions (FAQ) section with searchable and categorized content.                       |

## Notifications and Alerts

| FR ID      | Requirement                  | Description                                                                                                  |
|------------|------------------------------|--------------------------------------------------------------------------------------------------------------|
| FR-HRP-061 | New Content Notification     | The system shall automatically notify employees when new content is published on the HR Portal.              |
| FR-HRP-062 | New Vacancy Notification     | The system shall automatically notify employees when new vacancies are posted.                               |
| FR-HRP-063 | Closing Vacancy Notification | The system shall send reminder notifications for vacancies approaching their closing date.                   |
| FR-HRP-064 | Urgent Announcement Alert    | The system shall support urgent announcement alerts with prominent display and optional email notifications. |
| FR-HRP-065 | Notification Preferences     | The system shall allow employees to configure their notification preferences for different content types.    |
| FR-HRP-066 | Multi-Channel Notifications  | The system shall support notifications through ERP dashboard alerts, email, and SMS where applicable.        |

## Analytics and Reporting

| FR ID      | Requirement        | Description                                                                                                |
|------------|--------------------|------------------------------------------------------------------------------------------------------------|
| FR-HRP-067 | Content Analytics  | The system shall provide analytics on content views, engagement, and effectiveness.                        |
| FR-HRP-068 | User Analytics     | The system shall provide analytics on portal usage including user visits, page views, and popular content. |
| FR-HRP-069 | Vacancy Analytics  | The system shall provide analytics on vacancy views, applications, and conversion rates.                   |
| FR-HRP-070 | Engagement Reports | The system shall generate reports on employee engagement with HR Portal content.                           |
| FR-HRP-071 | Search Analytics   | The system shall provide analytics on search queries to identify content gaps and improve findability.     |

|            |                   |                                                                                                          |
|------------|-------------------|----------------------------------------------------------------------------------------------------------|
| FR-HRP-072 | Report Export     | The system shall allow authorized users to export analytics reports in PDF, Excel, and CSV formats.      |
| FR-HRP-073 | Dashboard Reports | The system shall provide HR administrators with a dashboard showing key portal performance metrics.      |
| FR-HRP-074 | Custom Reports    | The system shall allow administrators to create custom reports with configurable parameters and filters. |

## Security and Compliance

| FR ID      | Requirement               | Description                                                                                                                                      |
|------------|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-HRP-075 | Role-Based Access Control | The system shall enforce role-based access control for portal content and administrative functions.                                              |
| FR-HRP-076 | Content Approval Workflow | The system shall support content approval workflows to ensure appropriate review before publication.                                             |
| FR-HRP-077 | Data Encryption           | The system shall protect sensitive portal data through encryption during storage and transmission.                                               |
| FR-HRP-078 | Audit Trail               | The system shall maintain an immutable audit trail of all portal activities including content creation, modification, publication, and deletion. |
| FR-HRP-079 | Session Management        | The system shall automatically terminate inactive user sessions after configurable periods of inactivity.                                        |
| FR-HRP-080 | Secure Access             | The system shall require secure authentication for access to internal HR Portal content and administrative functions.                            |
| FR-HRP-081 | Content Backup            | The system shall support regular backup of portal content to prevent data loss.                                                                  |
| FR-HRP-082 | Compliance with Policies  | The system shall ensure all content and portal activities comply with organizational policies and regulatory requirements.                       |

## 26. Data Quality Automation Integration Framework

### 26.1 Introduction

The Data Quality Automation Framework shall provide a comprehensive, integrated approach to ensuring data accuracy, completeness, consistency, and reliability across all ERP HR modules. The framework shall leverage automated data quality tools and processes to continuously monitor, validate, cleanse, and enrich HR data throughout its lifecycle, from initial capture through archival.

The integration of data quality automation tools shall enable proactive identification and resolution of data quality issues, reduce manual data cleansing efforts, improve reporting accuracy, and ensure compliance with regulatory requirements. The framework shall operate across all HR modules, providing consistent data quality controls and monitoring capabilities.

### 26.2 Purpose

The purpose of the Data Quality Automation Framework shall be to:

- Ensure data accuracy, completeness, consistency, and reliability across all ERP HR modules.
- Automate the detection and resolution of data quality issues.
- Reduce manual data cleansing efforts and associated costs.
- Improve reporting accuracy and decision-making confidence.
- Ensure compliance with regulatory requirements through consistent data quality controls.
- Provide real-time visibility into data quality metrics and trends.
- Establish a culture of data quality ownership across the organization.
- Support the Bank's strategic initiatives through reliable, high-quality data.

### 26.3 Business Rules

The Data Quality Automation Framework shall operate under the following business rules:

#### Data Quality Dimensions

- **Accuracy:** Data shall accurately reflect real-world entities and events.
- **Completeness:** All required data fields shall be populated with valid values.

- **Consistency:** Data shall be consistent across all modules and systems.
- **Timeliness:** Data shall be current and updated within defined timeframes.
- **Validity:** Data shall conform to defined formats, ranges, and business rules.
- **Uniqueness:** Data shall not contain duplicate records.
- **Integrity:** Data relationships shall be maintained and validated.

### Data Quality Controls

- Data quality shall be monitored continuously through automated validation rules.
- Data quality issues shall be automatically detected, logged, and escalated.
- Critical data quality issues shall trigger alerts and notifications.
- Data quality scores shall be calculated and displayed for each data domain.
- Data quality improvement actions shall be tracked and monitored.

### Data Governance

- Data ownership shall be clearly defined for each data domain.
- Data quality standards shall be documented and enforced.
- Data quality exceptions shall be managed through formal workflows.
- Data quality metrics shall be reported to management regularly.

## 26.4 Data Quality Integration Architecture

### Data Quality Automation Tools Integration

#### Data Quality Tool Capabilities Integration

| FR ID     | Requirement                 | Description                                                                                                                                                   |
|-----------|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-001 | Data Profiling Integration  | The system shall integrate with data profiling tools to automatically analyze data structures, identify patterns, and detect anomalies across all HR modules. |
| FR-DQ-002 | Data Validation Integration | The system shall integrate with data validation tools to automatically validate data against defined business rules, formats, and ranges.                     |
| FR-DQ-003 | Data Cleansing Integration  | The system shall integrate with data cleansing tools to automatically correct, standardize, and enrich data where possible.                                   |
| FR-DQ-004 | Data Matching Integration   | The system shall integrate with data matching tools to identify and resolve duplicate records across modules.                                                 |
| FR-DQ-005 | Data Monitoring Integration | The system shall integrate with data monitoring tools to continuously track data quality metrics and trends.                                                  |

#### Data Quality Control Points Integration

| FR ID     | Requirement               | Description                                                                                                                                           |
|-----------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-006 | Data Entry Controls       | The system shall implement data quality controls at the point of data entry, including field validation, format checks, and business rule validation. |
| FR-DQ-007 | Data Import Controls      | The system shall implement data quality controls during data import processes, including validation, deduplication, and cleansing.                    |
| FR-DQ-008 | Data Update Controls      | The system shall implement data quality controls during data update processes, ensuring changes meet quality standards.                               |
| FR-DQ-009 | Batch Processing Controls | The system shall implement data quality controls during batch processing, including validation and error handling.                                    |
|           |                           |                                                                                                                                                       |

## 26.5 Module-Specific Data Quality Integration

### Employee Master Data Quality Integration

| FR ID     | Requirement                       | Description                                                                                                                                          |
|-----------|-----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-010 | Unique Identifier Validation      | The system shall validate that each employee record has a unique Employee ID and National ID, with automated detection and resolution of duplicates. |
| FR-DQ-011 | Mandatory Field Validation        | The system shall validate that all mandatory fields (Employee ID, National ID, Name, Date of Birth, Gender, etc.) are populated and valid.           |
| FR-DQ-012 | Format Standardization            | The system shall automatically standardize data formats including name formats, date formats, phone numbers, and email addresses.                    |
| FR-DQ-013 | Cross-Reference Validation        | The system shall validate that data referenced across modules (Position, Department, Grade) exists and is consistent.                                |
| FR-DQ-014 | Employee Data Completeness Score  | The system shall calculate and display a data completeness score for each employee record.                                                           |
| FR-DQ-015 | Employee Data Accuracy Monitoring | The system shall continuously monitor employee data for accuracy and identify potential errors or inconsistencies.                                   |

### Workforce Planning Data Quality Integration

| FR ID     | Requirement                   | Description                                                                                                                   |
|-----------|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-016 | Position Data Validation      | The system shall validate that position data (Job Title, Grade, Department) conforms to defined standards and business rules. |
| FR-DQ-017 | Budget Data Validation        | The system shall validate that workforce planning budget data is accurate, complete, and consistent across planning cycles.   |
| FR-DQ-018 | Workforce Data Consistency    | The system shall validate that workforce planning data is consistent with employee master data.                               |
| FR-DQ-019 | Plan-to-Actual Reconciliation | The system shall automatically reconcile workforce planning data with actual workforce data to identify variances.            |

### Recruitment Data Quality Integration

| FR ID     | Requirement                   | Description                                                                                                     |
|-----------|-------------------------------|-----------------------------------------------------------------------------------------------------------------|
| FR-DQ-020 | Application Data Validation   | The system shall validate that candidate application data is complete and conforms to defined standards.        |
| FR-DQ-021 | Duplicate Candidate Detection | The system shall automatically detect and flag duplicate candidate profiles.                                    |
| FR-DQ-022 | Candidate Data Enrichment     | The system shall automatically enrich candidate data with additional information where available.               |
| FR-DQ-023 | Recruitment Data Consistency  | The system shall validate that recruitment data is consistent with workforce planning and employee master data. |

### Attendance Data Quality Integration

| FR ID     | Requirement                    | Description                                                                                                         |
|-----------|--------------------------------|---------------------------------------------------------------------------------------------------------------------|
| FR-DQ-024 | Attendance Record Validation   | The system shall validate that attendance records are complete, timely, and consistent with defined work schedules. |
| FR-DQ-025 | Attendance Anomaly Detection   | The system shall automatically detect anomalies in attendance data, including unusual patterns or inconsistencies.  |
| FR-DQ-026 | Attendance Data Reconciliation | The system shall automatically reconcile attendance data with leave records to ensure consistency.                  |
| FR-DQ-027 | Attendance Data Completeness   | The system shall monitor and report on the completeness of attendance records.                                      |

### Leave Data Quality Integration

| FR ID     | Requirement               | Description                                                                                                 |
|-----------|---------------------------|-------------------------------------------------------------------------------------------------------------|
| FR-DQ-028 | Leave Balance Validation  | The system shall validate that leave balances are accurate and consistent with policy rules.                |
| FR-DQ-029 | Leave Accrual Accuracy    | The system shall validate that leave accruals are calculated accurately based on service period and policy. |
| FR-DQ-030 | Leave Request Consistency | The system shall validate that leave requests are consistent with attendance records and payroll data.      |
| FR-DQ-031 | Leave Data Completeness   | The system shall monitor and report on the completeness of leave records.                                   |

**Payroll Data Quality Integration**

| FR ID     | Requirement                | Description                                                                                                  |
|-----------|----------------------------|--------------------------------------------------------------------------------------------------------------|
| FR-DQ-032 | Payroll Data Validation    | The system shall validate that payroll data is accurate, complete, and consistent with employee master data. |
| FR-DQ-033 | Compensation Consistency   | The system shall validate that compensation data is consistent with grade structures and approved changes.   |
| FR-DQ-034 | Payroll Variance Analysis  | The system shall automatically analyze payroll data for variances and anomalies.                             |
| FR-DQ-035 | Tax and Deduction Accuracy | The system shall validate that tax and deduction calculations are accurate and compliant with regulations.   |

**Competency Data Quality Integration**

| FR ID     | Requirement                      | Description                                                                                                             |
|-----------|----------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-036 | Competency Assessment Validation | The system shall validate that competency assessments are complete, consistent, and properly documented.                |
| FR-DQ-037 | IDP Data Quality                 | The system shall validate that Individual Development Plan data is complete, current, and aligned with competency gaps. |
| FR-DQ-038 | Competency Framework Consistency | The system shall validate that competency data is consistent with the defined competency framework.                     |

**RSSA Data Quality Integration**

| FR ID     | Requirement                 | Description                                                                                              |
|-----------|-----------------------------|----------------------------------------------------------------------------------------------------------|
| FR-DQ-039 | RSSA Application Validation | The system shall validate that RSSA applications are complete and meet eligibility criteria.             |
| FR-DQ-040 | Guarantor Data Validation   | The system shall validate that guarantor data is accurate, complete, and meets eligibility requirements. |
| FR-DQ-041 | RSSA Balance Accuracy       | The system shall validate that RSSA balances are accurate and consistent with repayment schedules.       |

## 26.6 Data Quality Monitoring and Reporting

| FR ID     | Requirement                       | Description                                                                                              |
|-----------|-----------------------------------|----------------------------------------------------------------------------------------------------------|
| FR-DQ-042 | Data Quality Dashboard            | The system shall provide a real-time data quality dashboard showing key metrics for all HR data domains. |
| FR-DQ-043 | Data Quality Scorecards           | The system shall generate data quality scorecards for each module and data domain.                       |
| FR-DQ-044 | Data Quality Trend Analysis       | The system shall provide trend analysis of data quality metrics over time.                               |
| FR-DQ-045 | Data Quality Alerts               | The system shall automatically generate alerts when data quality metrics fall below defined thresholds.  |
| FR-DQ-046 | Data Quality Reports              | The system shall generate comprehensive data quality reports for management review.                      |
| FR-DQ-047 | Data Quality Issue Management     | The system shall track and manage data quality issues from identification through resolution.            |
| FR-DQ-048 | Data Quality Improvement Tracking | The system shall track data quality improvement initiatives and measure their effectiveness.             |

## 26.7 Data Quality Workflow Management

| FR ID     | Requirement                 | Description                                                                                                               |
|-----------|-----------------------------|---------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-049 | Data Quality Issue Workflow | The system shall support workflow management for data quality issues, including assignment, resolution, and verification. |
| FR-DQ-050 | Data Quality Escalation     | The system shall automatically escalate unresolved data quality issues to appropriate stakeholders.                       |
| FR-DQ-051 | Data Quality Notification   | The system shall send notifications to data owners and stakeholders regarding data quality issues.                        |
| FR-DQ-052 | Data Quality Audit Trail    | The system shall maintain a complete audit trail of all data quality activities and resolutions.                          |

## 26.8 Data Quality Integration with HR Modules

### Integration with Employee Master Data

| FR ID         | Requirement                      | Description                                                                                                                            |
|---------------|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| FR-DQ-EMP-001 | Employee Data Validation         | The system shall validate all employee data at the point of entry and update, including mandatory fields, formats, and business rules. |
| FR-DQ-EMP-002 | Employee Data Profiling          | The system shall continuously profile employee data to identify patterns, anomalies, and potential quality issues.                     |
| FR-DQ-EMP-003 | Employee Data Cleansing          | The system shall automatically cleanse employee data by standardizing formats and correcting common errors.                            |
| FR-DQ-EMP-004 | Employee Data Deduplication      | The system shall identify and resolve duplicate employee records.                                                                      |
| FR-DQ-EMP-005 | Employee Data Quality Monitoring | The system shall monitor employee data quality metrics and generate alerts for quality issues.                                         |

### Integration with Workforce Planning

| FR ID        | Requirement                   | Description                                                                                     |
|--------------|-------------------------------|-------------------------------------------------------------------------------------------------|
| FR-DQ-WP-001 | Position Data Validation      | The system shall validate position data against defined standards and business rules.           |
| FR-DQ-WP-002 | Workforce Plan Consistency    | The system shall validate that workforce planning data is consistent with employee master data. |
| FR-DQ-WP-003 | Workforce Data Profiling      | The system shall profile workforce planning data to identify quality issues.                    |
| FR-DQ-WP-004 | Plan-to-Actual Reconciliation | The system shall automatically reconcile workforce planning data with actual workforce data.    |

### Integration with Recruitment

| FR ID         | Requirement                  | Description                                                                                                  |
|---------------|------------------------------|--------------------------------------------------------------------------------------------------------------|
| FR-DQ-REC-001 | Candidate Data Validation    | The system shall validate candidate data at the point of application and throughout the recruitment process. |
| FR-DQ-REC-002 | Candidate Data Deduplication | The system shall identify and resolve duplicate candidate records.                                           |
| FR-DQ-REC-003 | Candidate Data Enrichment    | The system shall enrich candidate data with information from the ATS and other sources.                      |
| FR-DQ-REC-004 | Recruitment Data Consistency | The system shall validate that recruitment data is consistent with workforce planning data.                  |

### Integration with Attendance Management

| FR ID         | Requirement                    | Description                                                                                      |
|---------------|--------------------------------|--------------------------------------------------------------------------------------------------|
| FR-DQ-ATT-001 | Attendance Record Validation   | The system shall validate attendance records against defined rules and schedules.                |
| FR-DQ-ATT-002 | Attendance Anomaly Detection   | The system shall detect anomalies in attendance data and flag for review.                        |
| FR-DQ-ATT-003 | Attendance Data Reconciliation | The system shall reconcile attendance data with leave records.                                   |
| FR-DQ-ATT-004 | Attendance Data Completeness   | The system shall monitor attendance record completeness and generate alerts for missing records. |

### Integration with Leave Management

| FR ID         | Requirement               | Description                                                                                    |
|---------------|---------------------------|------------------------------------------------------------------------------------------------|
| FR-DQ-LVE-001 | Leave Balance Validation  | The system shall validate leave balances against policy rules and accrual calculations.        |
| FR-DQ-LVE-002 | Leave Request Consistency | The system shall validate that leave requests are consistent with attendance and payroll data. |
| FR-DQ-LVE-003 | Leave Data Completeness   | The system shall monitor leave record completeness.                                            |

|               |                            |                                                                        |
|---------------|----------------------------|------------------------------------------------------------------------|
| FR-DQ-LVE-004 | Leave Accrual Verification | The system shall verify that leave accruals are calculated accurately. |
|---------------|----------------------------|------------------------------------------------------------------------|

### Integration with Payroll

| FR ID         | Requirement                | Description                                                                                                |
|---------------|----------------------------|------------------------------------------------------------------------------------------------------------|
| FR-DQ-PAY-001 | Payroll Data Validation    | The system shall validate payroll data against employee master data and compensation rules.                |
| FR-DQ-PAY-002 | Compensation Consistency   | The system shall validate that compensation data is consistent with grade structures and approved changes. |
| FR-DQ-PAY-003 | Payroll Variance Analysis  | The system shall analyze payroll data for variances and anomalies.                                         |
| FR-DQ-PAY-004 | Tax and Deduction Accuracy | The system shall validate tax and deduction calculations for accuracy.                                     |

### Integration with Competency Management

| FR ID         | Requirement                 | Description                                                                                           |
|---------------|-----------------------------|-------------------------------------------------------------------------------------------------------|
| FR-DQ-COM-001 | Assessment Data Validation  | The system shall validate competency assessment data for completeness and consistency.                |
| FR-DQ-COM-002 | IDP Data Validation         | The system shall validate Individual Development Plan data against competency framework requirements. |
| FR-DQ-COM-003 | Competency Data Consistency | The system shall validate that competency data is consistent across modules.                          |

### Integration with RSSA

| FR ID          | Requirement                 | Description                                                                                    |
|----------------|-----------------------------|------------------------------------------------------------------------------------------------|
| FR-DQ-RSSA-001 | RSSA Application Validation | The system shall validate RSSA applications for completeness and eligibility.                  |
| FR-DQ-RSSA-002 | Guarantor Data Validation   | The system shall validate guarantor data for accuracy and eligibility.                         |
| FR-DQ-RSSA-003 | RSSA Balance Accuracy       | The system shall validate RSSA balances for accuracy and consistency with repayment schedules. |

## 27. Cross-Module Integration Requirements

The ERP HR Modules shall operate as a unified system with the **Employee Master Data Module** serving as the central repository (Single Source of Truth). All modules shall be integrated to enable seamless data flow, ensure data consistency, and automate end-to-end business processes. The integration specifications below define the dependencies, data exchange, and synchronization logic between modules.

### 27.1 Functional Requirements

| FR No      | Requirement                                            | Description                                                                                                                                                                                                                                                   |
|------------|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-INT-001 | Workforce Planning to Employee Master Data Integration | Upon final approval of a workforce plan, the system shall automatically create Position IDs in the Employee Master Data Module using the approved organizational structure, job title, grade, and position details, with the position status set to Budgeted. |
| FR-INT-002 | Workforce Planning to Recruitment Integration          | The system shall automatically generate recruitment requests in the Recruitment Module based on approved workforce planning requests, including vacancy details, job position, required headcount, and organizational assignment.                             |
| FR-INT-003 | Recruitment to Employee Master Data Integration        | Upon successful recruitment and onboarding approval, the system shall automatically create a new Employee Master Record containing all approved personal, employment, organizational, and compensation information.                                           |
| FR-INT-004 | Recruitment to Discipline Integration                  | The system shall validate candidate disciplinary eligibility by retrieving applicable disciplinary records from the Discipline Management Module during recruitment screening and selection processes.                                                        |
| FR-INT-005 | Recruitment to Performance Management Integration      | The system shall retrieve employee performance ratings from the Performance Management System (PMS) for internal recruitment processes where performance evaluation forms part of candidate selection.                                                        |

|            |                                                |                                                                                                                                                                                                                                                                                              |
|------------|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-INT-006 | Recruitment to Assessment Platform Integration | The system shall integrate with external assessment and examination platforms to schedule assessments, distribute invitations, retrieve candidate results automatically, and support manual result entry where integration is unavailable.                                                   |
| FR-INT-007 | Employee Master Data Synchronization           | The Employee Master Data Module shall serve as the Single Source of Truth and automatically synchronize approved employee information, including organizational assignment, position, grade, employment status, compensation, and reporting relationships, across all integrated HR modules. |
| FR-INT-008 | Attendance to Leave Integration                | The system shall validate attendance records against approved leave transactions to ensure employees on authorized leave are not recorded as absent.                                                                                                                                         |
| FR-INT-009 | Attendance to Payroll Integration              | The system shall automatically transmit attendance transactions, including overtime, lateness, absences, and attendance-related deductions, to the Payroll Module for payroll calculation.                                                                                                   |
| FR-INT-010 | Attendance to Discipline Integration           | The system shall automatically initiate or update disciplinary cases when configurable attendance violations exceed defined policy thresholds.                                                                                                                                               |
| FR-INT-011 | Leave to Attendance Integration                | The system shall synchronize approved leave transactions with the Attendance Management Module to prevent false attendance exceptions and ensure accurate attendance records.                                                                                                                |
| FR-INT-012 | Leave to Payroll Integration                   | The system shall automatically transmit payroll-impacting leave transactions, including Leave Without Pay, leave encashment, compensatory leave, and other applicable leave transactions, to the Payroll Module.                                                                             |
| FR-INT-013 | Leave to Employee Master Data Integration      | The system shall automatically update employee employment status or trigger relevant review workflows where approved leave transactions affect employment status in accordance with organizational policies.                                                                                 |

|            |                                                |                                                                                                                                                                                                                               |
|------------|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-INT-014 | Discipline to Payroll Integration              | The system shall automatically transmit approved disciplinary financial penalties and salary deductions to the Payroll Module for payroll processing.                                                                         |
| FR-INT-015 | Discipline to Separation Integration           | The system shall automatically initiate the Separation Management process following approval of disciplinary actions resulting in employee dismissal or termination.                                                          |
| FR-INT-016 | Discipline to Recruitment Integration          | The system shall make employee disciplinary history available to the Recruitment Module where disciplinary records form part of recruitment, transfer, promotion, or internal mobility eligibility criteria.                  |
| FR-INT-017 | Separation to Employee Master Data Integration | Upon completion of the employee separation process, the system shall automatically update the employee status in the Employee Master Data Module to Separated and prevent further HR transactions for the employee.           |
| FR-INT-018 | Separation to Payroll Integration              | The system shall automatically notify the Payroll Module to process final salary, terminal benefits, recoveries, deductions, and cease future payroll processing for separated employees.                                     |
| FR-INT-019 | Separation to System Access Integration        | The system shall automatically initiate user access revocation for ERP, Email, Core Banking System (CBS), and other integrated systems upon completion of the separation process.                                             |
| FR-INT-020 | Separation to Finance Integration              | The system shall automatically generate and transmit final settlement instructions, recoveries, and payment information to the Finance Module and other applicable financial systems.                                         |
| FR-INT-021 | Separation to Asset Clearance Integration      | The system shall automatically initiate digital clearance workflows and distribute clearance requests to designated departments, including IT, Finance, Administration, Fleet, Security, and other configured business units. |
| FR-INT-022 | Payroll to Finance Integration                 | The system shall automatically generate payroll journals, accounting entries, and payment instructions for                                                                                                                    |

|            |                                             |                                                                                                                                                                                                                                                           |
|------------|---------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|            |                                             | transmission to the Finance Module following payroll approval.                                                                                                                                                                                            |
| FR-INT-023 | Payroll to Employee Master Data Integration | The system shall synchronize approved salary, benefit, grade, and compensation changes with the Employee Master Data Module to maintain current employee compensation records.                                                                            |
| FR-INT-024 | Payroll to Core Banking System Integration  | The system shall integrate with the Core Banking System to facilitate salary disbursement, employee settlements, and other approved payroll payments.                                                                                                     |
| FR-INT-025 | RESL to Employee Master Data Integration    | The system shall automatically validate employee eligibility for RSSA by retrieving employment status, contract type, service duration, salary, and other required employee information from the Employee Master Data Module.                             |
| FR-INT-026 | RESL to Payroll Integration                 | The system shall automatically transmit approved RSSA repayment schedules and monthly deductions to the Payroll Module for salary deduction processing.                                                                                                   |
| FR-INT-027 | RESL to Core Banking System Integration     | The system shall automatically transmit approved RSSA loan disbursement instructions to the Core Banking System for payment processing.                                                                                                                   |
| FR-INT-028 | Real-Time Data Synchronization              | The system shall synchronize approved employee and organizational data changes across all integrated modules in real time to ensure data consistency and integrity.                                                                                       |
| FR-INT-029 | Event-Driven Integration                    | The system shall support event-driven integration whereby approved transactions and status changes automatically trigger subsequent business processes in dependent modules.                                                                              |
| FR-INT-030 | Cross-Module Notifications                  | The system shall automatically generate notifications and alerts for cross-module events, including approvals, rejections, pending actions, workflow escalations, and policy violations, through ERP notifications and configured communication channels. |

|                                  |                                  |                                                                                                                                                                                                                                    |
|----------------------------------|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-INT-031                       | Unified Audit Trail              | The system shall maintain a centralized and immutable audit trail for all cross-module transactions, recording the originating module, receiving module, transaction details, user information, timestamps, and processing status. |
| FR-INT-032                       | Enterprise Reporting Integration | The system shall consolidate information from all integrated HR modules to provide enterprise-wide dashboards, workforce analytics, compliance reporting, and management reports.                                                  |
| FR-INT-033                       | Consolidated Report Export       | The system shall allow authorized users to export consolidated cross-module reports in standard formats including PDF, Excel, and CSV.                                                                                             |
| <b>Reporting &amp; Analytics</b> |                                  |                                                                                                                                                                                                                                    |
| FR-RPT-001                       | Executive Dashboard              | System shall provide configurable dashboards displaying key HR operational indicators across Attendance, Leave, Payroll, Discipline, Recruitment, and Separation modules.                                                          |
| FR-RPT-002                       | Cross-Module Analytics           | System shall provide analytical reports combining data from multiple HR modules to support workforce planning, compliance monitoring, and management decision-making.                                                              |
| FR-RPT-003                       | Report Export                    | System shall allow authorized users to export reports in configurable formats including PDF, Excel, and CSV.                                                                                                                       |
| FR-RPT-004                       | Scheduled Reports                | System shall allow users to schedule automatic report generation and distribution to designated recipients.                                                                                                                        |
| <b>Notifications</b>             |                                  |                                                                                                                                                                                                                                    |
| FR-NOT-001                       | Configurable Notifications       | System shall generate configurable notifications for approvals, rejections, workflow actions, pending tasks, policy violations, and system events.                                                                                 |
| FR-NOT-002                       | Multi-Channel Notifications      | System shall support notifications through ERP dashboard alerts, email, and SMS where applicable.                                                                                                                                  |
| FR-NOT-003                       | Escalation Notifications         | System shall automatically escalate overdue approval requests according to configurable workflow rules.                                                                                                                            |

|                               |                                |                                                                                                                                                                                     |
|-------------------------------|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Workflow Management</b>    |                                |                                                                                                                                                                                     |
| FR-WF-001                     | Configurable Approval Workflow | System shall support configurable multi-level approval workflows for all HR transactions.                                                                                           |
| FR-WF-002                     | Delegated Approval             | System shall allow authorized users to delegate approval authority during approved absence periods while maintaining full audit history.                                            |
| FR-WF-003                     | Workflow Tracking              | System shall display real-time workflow status, current approver, completed approvals, pending actions, and processing history                                                      |
| <b>Audit &amp; Compliance</b> |                                |                                                                                                                                                                                     |
| FR-AUD-001                    | Enterprise Audit Trail         | System shall maintain immutable audit logs for all create, update, delete, approval, rejection, and administrative actions across all HR modules.                                   |
| FR-AUD-002                    | Historical Data Tracking       | System shall maintain complete historical records of employee transactions without overwriting previous values.                                                                     |
| FR-AUD-003                    | Audit Search                   | System shall allow authorized users to search audit history by employee, transaction type, module, user, and date range.                                                            |
| <b>Security</b>               |                                |                                                                                                                                                                                     |
| FR-SEC-001                    | Role-Based Access Control      | System shall enforce role-based access permissions based on organizational responsibilities and the principle of least privilege.                                                   |
| FR-SEC-002                    | Data Encryption                | System shall protect sensitive employee information using encryption during storage and transmission.                                                                               |
| FR-SEC-003                    | Session Management             | System shall automatically terminate inactive user sessions after configurable periods of inactivity.                                                                               |
| FR-SEC-004                    | Authentication                 | System shall support configurable authentication mechanisms including Single Sign-On (SSO), Multi-Factor Authentication (MFA), or other approved enterprise authentication methods. |

## 27.2 System Integration Specifications

| Integration Point    | Module                        | Description                                                                  |
|----------------------|-------------------------------|------------------------------------------------------------------------------|
| Exam System          | Recruitment                   | Bi-directional sync for test registration and result retrieval.              |
| Interview System     | Recruitment                   | Panel scheduling and scoring capture.                                        |
| PMS                  | Recruitment, Payroll          | Read-only extraction of annual scores.                                       |
| Employee Master Data | All Modules                   | Update of Job Position, Grade, Status, and employee information.             |
| Payroll              | Leave, Separation, Discipline | Transmission of LWP, sick leave tiers, penalties, and final settlements.     |
| Time and Attendance  | Leave, Payroll                | Validate attendance, authorize absences, and identify unauthorized absences. |
| Core Banking System  | Separation                    | Verify loan liabilities and facilitate PF account closures.                  |
| IT Access            | Recruitment, Separation       | Provision and revoke system access.                                          |

## 28. Conclusion

The ERP HR Modules shall provide a comprehensive, integrated, and automated platform for managing the entire employee lifecycle from workforce planning through to separation. The system shall encompass seventeen (17) integrated modules that operate with a single source of truth, enforce business rules and compliance requirements, provide real-time visibility and reporting, and improve employee experience through self-service capabilities.

The implementation of this system shall deliver the following transformative benefits:

- **Operational Excellence:** Automating end-to-end HR processes from workforce planning, recruitment, assessment, onboarding, attendance, leave, payroll, discipline, separation, and analytics shall eliminate manual interventions, reduce processing times, and significantly enhance operational efficiency across all HR functions.
- **Data Integrity and Transparency:** The Employee Master Data Module shall serve as the single source of truth, ensuring data consistency across all modules. The comprehensive

audit trail capability shall provide complete traceability of all HR transactions, strengthening internal controls, regulatory compliance, and stakeholder trust.

- **Strategic Workforce Management:** The integration of Workforce Planning, Recruitment, Competency Management, Career Pathing, and HR Analytics shall enable data-driven workforce decisions, proactive talent management, and strategic alignment of human capital with organizational objectives.
- **Enhanced Employee Experience:** The Employee Self-Service (ESS) portal, HR Portal, Career Pathing, Onboarding, Survey, and Anonymous Feedback modules shall empower employees with transparency, self-service capabilities, and a voice in organizational improvement initiatives, fostering engagement, satisfaction, and retention.
- **Talent Optimization:** The Competency Management System, Career Pathing, and Performance Management integration shall enable systematic talent development, succession planning, and career progression, ensuring the organization has the right capabilities to achieve its strategic ambitions.
- **Compliance and Risk Management:** Automated enforcement of business rules, policy compliance, labor law adherence, and audit trail capabilities across all modules shall strengthen governance, mitigate compliance risks, and provide robust documentation for internal and external audits.
- **Data-Driven Decision Making:** The HR Data Analytics and Business Intelligence Module shall transform raw HR data into actionable insights, enabling evidence-based decision-making, proactive risk identification, and continuous improvement of HR services and organizational performance.
- **Strong Audit Framework:** The system shall provide a comprehensive, immutable audit trail across all modules, capturing every transaction with timestamp, user ID, and change details, ensuring full accountability and facilitating internal and external compliance reviews.

The successful implementation of this integrated ERP HR solution shall result in accurate and consistent HR processes, reduced dependency on manual spreadsheets and paper-based workflows, improved transparency and trust across the organization, enhanced employee engagement and experience, strategic workforce optimization, and a robust foundation for achieving the Bank's vision.
